CALCUTTA:
OFFICE OF THE SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA.
1904.

CALCUTTA :
GOVERNMENT OF INDIA CENTRAL PRINTING OFFICE,
8, HASTINGS STREET.

No. $\frac{370}{2VII}$ OF 1904.

FROM

THE HONOURABLE MR. A. H. T. MARTINDALE, K.C.S.I.,
Agent to the Governor General in Rajputana,

TO

THE SECRETARY TO THE GOVERNMENT OF INDIA,
FOREIGN DEPARTMENT.

Dated Abu, the 14th October, 1904.

SIR,

WITH reference to the correspondence ending with your letter No. 2732 I.A., dated the 26th July, 1904, I have the honour to forward the Annual Report on Sanitation, Dispensaries, and Jails in Rajputana for the year 1903, and on Vaccination for 1903-1904, prepared by Lieutenant-Colonel H. N. V. Harington, I.M.S., lately Officiating Residency Surgeon and Chief Medical Officer in Rajputana.

2. The Report was in proof before the receipt of your letter referred to above. Care will be taken to ensure that future Reports conform more closely with the instructions of the Government of India, both as regards the treatment of the subjects discussed in the Report and the date of its submission, than on the present occasion. This Report has already been delayed unduly by the necessity for frequent revision.

3. The contents appear to demand no special comment beyond the remark that, despite all precautions, plague for the first time attacked Rajputana seriously during the year, the number of fatal cases being 8,947, and that the Statement in paragraph 14 to the effect that the Mewar Darbar have discontinued the submission of vital statistics for the Udaipur City is due to a misapprehension. The ordinary returns will be forwarded as usual by the Darbar to the Residency Surgeon.

4. The improvement of the Vital Statistics generally in the Province, and of Jail accommodation, is receiving attention, though progress in each case is slow.

I have the honour to be,

SIR,

Your most obedient Servant,

A. H. T. MARTINDALE,

Agent to the Governor General in Rajputana.

REPORT

ON

SANITATION, DISPENSARIES, AND JAILS IN RAJPUTANA FOR 1903,

AND ON

VACCINATION FOR THE YEAR 1903-1904.

SECTION I.—SANITATION AND VACCINATION.

METEOROLOGY AND ITS RELATION TO FOOD-SUPPLY.

1. The rainfall throughout Ajmer-Merwara and the States of Rajputana

Rainfall.

was on the whole good, and harvests have been generally very satisfactory.
2. A statement is appended showing average rainfall during the year under report in each State.
3. Locusts did some damage to crops in part of the Western Rajputana States.
4. A few good years of rain are required to bring back the normal ground water level in wells, especially in Alwar and Ajmer-Merwara. Little or no rain fell in Rajputana during the cold weather.

VITAL STATISTICS, BIRTHS, AND DEATHS.

5. According to the birth return for 1903, there were 14,061 births registered in Ajmer-Merwara against 17,207 in 1902 and 7,679 in 1901, a decrease of 3,146 as compared with 1902, *viz.*, of 1,612 males and 1,534 females, the rate *per mille* falling from 36.08 in 1902 to 29.48 in 1903. The percentage of male to female births was 117.66 against 115.25 in 1902. The birth-rate exceeded the death-rate in 18 out of 23 circles of registration against 20 in the previous year.

Births in Ajmer-Merwara.
6. No reason is given for this decrease in birth-rate in a healthy year, the Civil Surgeon can only suggest indifferent registration as the apparent cause.
7. In this Division there were 13,720 deaths registered during the year

Deaths in Ajmer-Merwara.

against 15,672 in 1902, a decrease of 1,952 which is attributed to the absence of severe epidemics in the district. The total death-rate fell from 32.86 to 28.77 per 1,000 of population in 1903. The highest mortality was recorded in the fourth and the lowest in the third quarter of the year.
8. No cholera was reported during the year.
9. There were only 4 deaths recorded from small-pox in Ajmer-Merwara against 3 in the previous year. The total number of deaths from fevers, dysentery, and diarrhoea and injuries, shows a decrease when compared with last year. The Civil Surgeon, Ajmer, reports that "probably many of the deaths returned as 'fever' and 'bronchitis' were due to measles which was prevalent during the year."
10. As the Census Report of 1901 does not show the Christian population according to circles of registration in Ajmer-Merwara, the information required in Sanitary Form No. V cannot be given.
11. The highest number of fatal cases was reported among children under 5 years of age, *viz.*, 7 per cent. higher than in the previous year, which may be partly due to the prevalence of measles. The percentage of mortality between the ages of 50 and 60 and 60 upwards remains unchanged.

12. At Ajmer there is an Assistant Health Officer under the Civil Surgeon who investigates every death in the city and suburbs.

TABLE I.—Births and Deaths in Native States.

NAME.	Population according to Census, 1901.	BIRTHS.				DEATHS.										
		Male.	Female.	TOTAL.	Ratio per 1,000 of population.	Cholera.	Small-pox.	Plague.	Fever.	Dysentery and Diarrhoea.	Respiratory Diseases.	Injuries.	Snake-bite.	All others.	TOTAL.	Ratio per 1,000 of population.

TOTAL	3,370,284	28,467	23,690	52,157	15.48	135	1,075	216	27,363	4,584	3,125	453	196	12,564	50,474	14.93

NOTE.—The information required for this table cannot be obtained in full from Jaisalmer. The total, therefore, of column 16 does not agree with the totals of 9 preceding columns.

13. Registration has been introduced in 18 Native States but with indifferent success. There is some improvement in registration in a few of the capital cities, but little or none in the districts.

Registration of births and deaths in Native States.

14. In Udaipur city the Durbar has stopped all information regarding vital statistics.

15. The agencies for collecting vital statistics in these States are very imperfect and there seems little prospect of an improvement for some time to come, in spite of representation.

16. According to returns received, the birth-rate in cities ranged from 6.37 per mille of population in Sirohi city to 41.89 in Jaisalmer city, and in rural circles from 1.92 in Sirohi State to 25.73 in Dholpur State. This diversity in figures can only be attributed to unreliable registration. [The average for all the States was 15.48 per mille of population.]

17. Small-pox.—The disease appeared in 14 Native States, in which 1,075 deaths were reported during the year under report against 201 in the previous year. Out of the total there were 492 deaths from the disease in Dholpur, 359 in Alwar, 73 in Karauli, 58 in Jaipur, and 46 in Kotah. It is probable some of these cases were measles which was prevalent in many parts of Rajputana.

18. The death-rate varied from 10.08 per thousand of population in Pertabgarh city to 102.59 in Banswara city, and in rural circles from 2.48 per mille in Sirohi State to 25.83 in Pertabgarh State. This discrepancy in figures can only be accounted for by inaccurate registration. The average for all the States was 14.98 per mille of population.

CHOLERA.

TABLE II.—Number of Cholera cases reported in Native States during the year 1903.

Name of State, etc.	APRIL.		MAY.		JUNE.		JULY.		AUGUST.		SEPTEMBER.		OCTOBER.		TOTAL.		Percentage of deaths to cases.
	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	
Bharatpur (City)	...	...	1	1	...	...	2	2	...	...	...	...	...	...	3	3	100.00
Bharatpur (State)	3	3	24	16	11	6	5	3	23	16	37	21	40	31	143	96	67.13

Tonk (State)	...	...	5	4	...	...	...	...	...	...	...	...	...	...	5	4	80.00
Dholpur (State)	...	...	2	2	3	3	1	1	...	...	...	...	...	...	6	6	100.00
Alwar (State)	...	...	...	...	...	...	...	...	7	2	27	16	...	2	34	20	58.82
TOTAL	16	13	122	94	20	15	39	26	30	18	64	37	40	33	331	236	71.30

19. There were no cases of cholera reported in Ajmer-Merwara. Three hundred and thirty-one cases with 236 deaths from cholera were notified from 8 Native States.

20. Reports from Medical Officers in each State tend to show that the disease was caused by importation. As it never assumed a severe epidemic form, no cholera map is appended.

SANITATION.

21. *Ajmer City.*—The chief source of drinking water is by pipes from the Foy Sagar, and to a lesser degree from certain wells.

22. The water from the former has been condemned by analysis in 1900 and again in 1903, but the Civil Surgeon reports that in spite of this water having been reported as non-potable, it does not seem to have a deleterious effect on the people. It is possible the filtering it gets *en route* may have the effect of reducing its impurities. A copy of the last analysis by the Chemical Examiner is attached.

23. There are three villages in the catchment area of this tank, one of which is close to the lake and half its drainage goes direct into it. Cultivation also is carried on round it.

24. The source of contamination is probably greatest from the village close to the tank, its removal to a distance would help to reduce direct contamination, but financial considerations make any improvements difficult.

25. The other two villages are further off and are not such sources of danger. Still it would be better if they also could be removed.

26. As regards cultivation again the financial question comes in, the cost in compensation would be considerable.

27. Conservancy arrangements both in Ajmer and Beawar are under capable supervision and have been working satisfactorily and improvements gradually introduced. Village sanitation is also being improved but advancement is slow.

28. *Native States.*—The water-supply for the capital cities is in most States good and sufficient. In Alwar the wells are low, and in Bharatpur the quality of the water is indifferent.

29. In order to arrange for a permanent supply of water in Alwar a bund has been constructed at Therpur some 6 miles from Alwar city, the intention is to bring the water in by pipes.

30. Drainage too is on the whole good, except in Bharatpur, where the surroundings of the city are generally more or less water-logged in and after the rains.

31. There are good conservancy arrangements in most capital cities under the supervision of Agency Surgeons. The exceptions are those under the

Western Rajputana States, the Eastern Rajputana States, and the Mewar Agencies, in which supervision and control are not in the hands of Agency Surgeons. Bundi and Shahpura have no Agency Surgeon.

32. The Residency Surgeon, Western Rajputana States, reports that in Jodhpur supervision is not maintained and sanitation is not properly carried out. The same is reported of Bharatpur, while in Udaipur very little is done, sanitary arrangements being in the hands of the local police.

33. In some States advancement has been made in village sanitation, but little has been done on the whole.

34. In all States Agency Surgeons have brought to notice sanitary defects, and Durbars have at different times been urged to adopt better measures for improvement on public health grounds, but whether from apathy or for financial reasons, some States appear to prefer the old and primitive methods of conservancy with a few slight modifications.

35. Agency Surgeons when on tour advise and instruct village authorities, and vaccinators are also in some States taught to assist and advise in the more out of the way villages.

VACCINATION.

STATEMENT I.

36. Primary vaccination in Ajmer-Merwara rose from 12,948 in 1902-03 to 13,111 in 1903-04 and 99·17 per cent. of these were successful. This increase is

due to the greater birth-rate shown in the previous year. Re-vaccination rose from 44 to 88 operations.

37. One Native Superintendent and 15 vaccinators were employed in this Division, as in the previous year. The average number of persons vaccinated by each vaccinator rose from 866 in 1902-03 to 880 in the year under report, and each successful vaccination cost 39 against 37 pias in 1902-03; the increase is due to increase of pay of Native Superintendent of Vaccination.

38. In Native States the primary vaccinations rose from 280,374 in 1902-03 to 282,125 in the year under report, and the successful percentage from 98·91 to

99·06. Re-vaccinations fell from 816 to 638 operations. It is difficult to get the people to undergo re-vaccination though it is an important factor in the prevention of small-pox in later life.

39. The average number of vaccinations performed by each vaccinator rose from 1,607 to 1,644 in 1903-04, and the work of each man varied in different States from 2,549 operations in Bharatpur to 197 in Bundi. The attention of the Bundi Durbar has been drawn to the slack work of the two vaccinators employed in the State.

STATEMENT No. II.

40. The expenditure on vaccination in Native States fell from R23,503·7-6 to R23,371·10-6 in 1903-04. The average cost of each successful vaccination in different States varied from 8 pias in Kotah to 104 pias in Jaisalmer. The high cost of vaccination in this State is due partly to loss in population by emigration, partly to absence on leave of the Deputy Superintendent of Vaccination of the State for two months in the season, and partly to the distance between villages.

41. The Residency Surgeon, Jaipur, draws attention to defects in the vaccination work done in the different Thikanas both in quality and quantity; this will be remedied gradually and as early as practicable. The work done by the Thikana vaccinators increased from a total of 9,600 to 10,315 which cannot be said to be satisfactory, considering the large proportion Thikana areas bear to the whole State.

42. Jodhpur.—The total number of primary vaccinations decreased from 52,904 in 1902-03 to 49,621 in 1903-04; this is largely accounted for by almost total emigration to Sind by inhabitants of Malani in Marwar.

43. Of the vaccination work performed in Marwar State, 2,464 vaccinations were done by the Hospital Assistants in Marwar Dispensary towns;

98.01 per cent. of which were successfully vaccinated and the Hospital Assistant at Sirohi performed 239 vaccinations in Sirohi city with a successful percentage of 97.08.

44. Bharatpur, Banswara, and Pertabgarh show a decrease in vaccination said to be due to a low birth-rate.

45. The presence of plague in several States had an appreciable effect on the vaccination work, it also prevented Agency Surgeon's inspecting as many vaccinated children as might otherwise have been done.

46. The Agency Surgeon, Eastern Rajputana States, inspected 535 towns and villages and saw 18,717 children who had been successfully vaccinated, the Residency Surgeon, Jaipur, inspected 816 towns and villages and saw 16,332 successful vaccinations, the Residency Surgeon, Western Rajputana States, inspected 196 towns and villages and saw 5,401 successful cases, the Civil Surgeon, Bikaner, inspected 102 towns and villages and saw 4,096 children who had been successfully vaccinated, the Agency Surgeon, Kotah and Jhalawar, inspected 627 towns and villages and saw 3,765 successful vaccinations, the Agency Surgeon, Alwar, inspected 310 towns and villages and saw 3,512 successful cases, and the Residency Surgeon, Mewar, inspected 98 towns and villages and saw 2,259 children who had been successfully vaccinated.

47. The Residency Surgeon and Chief Medical Officer in Rajputana in his winter tour of inspection examined 4,666 vaccinated children, the results showing very good work on the whole.

48. Lymph is kept up throughout the year in most of the important States by arm-to-arm vaccination in selected places during the hot weather, and humanized lymph is generally used. Buffalo calf lymph is also largely employed in several States in Rajputana.

SECTION II.—DISPENSARIES.

STATEMENT No. I.

NUMBER OF DISPENSARIES.

49. During the year there was a gain of 1 new dispensary, the total number standing at 166 at the end of the year. Two new dispensaries were opened, one at Nimrana on 10th July 1903 and another at Marwar Junction on 1st November 1903. The Purani Chaoni Dispensary at Dholpur was closed on 1st October 1903.

50. A considerable number of improvements to existing hospitals have been carried out during the year under review
Improvements and additions to hospitals. in Ajmer-Merwara or are under consideration.

51. At Ajmer, improvements have been made in the operating room of the General Hospital. New furniture and a good supply of modern instruments have also been obtained.

52. The Committee of the Victoria Memorial Fund has finally decided to devote the funds collected to the improvement of the General Hospital. A Police ward is to be constructed away from the main building and quarters for the Assistant Surgeon and a female Hospital Assistant and out-patient department for women are to be built shortly. It has been decided that the Dāk bungalow at Kekri is to be converted into a dispensary.

53. A new operation room was built in the Perwar Dispensary from money presented by Seth Damodar Dass as a memorial to Her Majesty the late Queen-Empress, and the equipment of the hospital has been improved.

54. At several State dispensaries many improvements in buildings have been made during the year.

STATEMENT No. II.

MEDICAL RELIEF.

55. One million one hundred and ninety-nine thousand one hundred and forty-six patients of all classes were treated against 1,187,401 in the

previous year, an increase of 11,745 among out-patients. Of the total number of patients treated during the year 1903, 15,481 were in-door patients against 17,008 in 1902. The falling off in in-door patients is attributed to the healthiness of the year and the non-prevalence of any serious sickness, and partly to the fact that most of the weakly and chronic cases died during the famine of 1900-01.

STATEMENT No. III.

56. The diseases for which the patients were treated are shewn in this statement. The percentage of cases treated for certain diseases during the years 1902 and 1903 is noted below :—

Diseases.	Percentage during 1902.	Percentage during 1903.
(a) Malarial fevers and spleen	19·89	20·00
(b) Rheumatism	4·19	4·05
(c) Diseases of the eye	10·50	10·54
(d) Lung and respiratory diseases	7·17	7·07
(e) Diarrhoea and dysentery	3·90	3·58
(f) Ulcers	9·95	10·43
(g) Skin diseases	9·15	9·14
(h) Injuries	2·31	2·06
(i) Syphilis	2·40	2·12

LEPROSY.

57. There were 376 admissions for leprosy in Rajputana Hospitals and Dispensaries in 1903 against 401 in 1902. No special methods of treatment have been employed. There is a small Leper Asylum in Alwar and a special site for a Leper Home in Marwar.

CHOLERA.

58. No case of cholera was treated from the hospitals and dispensaries in Ajmer-Merwara during the year under report. From hospitals and dispensaries of Native States only 120 cases were treated against 1,078 in 1902.

SCURVY.

59. There were 1,281 cases of scurvy treated in 1903 against 1,523 in the previous year, the decrease being probably due to vegetables, etc., being more plentiful owing to a good year.

SNAKE POISONING.

60. Calmette's antivenine is kept in stock for use in the treatment of snake-bite in most States.

PLAGUE.

61. *Ajmer-Merwara.*—During the year from 1st April 1903 to 31st March 1904, 178 cases of plague and 19 deaths were reported in Ajmer-Merwara District excluding those detected at Ajmer Railway Inspecting Station, viz., 40 imported cases with 17 deaths at Nasirabad, 2 cases and 1 death at Kekri, and 1 case and 1 death, also imported, was detected at Saradhna. Of these, 133 cases indigenous plague (*pestis minor*), with no casualties, were reported from the Mission Orphanage at Ashahpura from the 2nd September to 23rd October 1903.

62. Necessary precautions were taken and plague and segregation camps put in charge of a Hospital Assistant under the supervision of the Plague Inspecting Officer and the Civil Surgeon, Ajmer.

63. The following imported cases and deaths were detected at Railway Inspecting Stations :—

	Cases.	Deaths.	
Ajmer Railway Station	71	32	Imported.
Bandikui Railway Station	15	16	„
Abu Road Railway Station	4	3	„
Ahmedabad Railway Station	11	1	„
TOTAL	101	52	

NATIVE STATES.

64. Ten thousand seven hundred and thirty-seven cases with 8,947 deaths were reported in Rajputana during the year under report; of these, 115 with 85 deaths were imported and 10,622 cases with 8,862 deaths were indigenous, excluding those detected at Railway Inspecting Stations.

65. The epidemic affected 13 States, namely, Jaipur, Alwar, Mewar, Pertabgarh, Banswara, Jhalawar, Tonk, Shahpura, and Marwar, and 189 villages were infected; 9 imported plague cases with 9 deaths were also detected, *viz.*, 6 cases with 6 deaths at Deeg in Bharatpur, and 1 case with 1 death at Kishengarh, Bikaner city, and at Mount Abu in Sirohi State respectively.

66. *Jaipur*.—Fifty-three imported cases and 42 deaths were reported in arrivals by Railway and 1,392 indigenous with 1,170 deaths; 24 villages and towns being infected.

67. *Tonk*.—Plague was indigenous at the commencement of the year under report in Nimbahera Pargana and continued in April and May and again re-appeared from fresh infection from Indore in August.

Seven hundred and seventy-seven cases in all being reported with 527 deaths, 21 villages were infected.

68. *Alwar*.—Plague was indigenous at commencement of the year 1903. One thousand four hundred and ninety-one cases and 1,125 deaths were reported and 33 villages were infected. The State was free from plague from July to September but was re-infected in October from the Punjab.

69. *Banswara*.—Plague was indigenous at commencement of the year. The city was free from May 1903 to January 1904, but 5 imported cases from Central India with 3 deaths were detected at a village in the vicinity. The city was re-infected from Central India in February 1904, 9 cases and 9 deaths occurring only. Prompt evacuation and energetic measures stopped the spread of the disease.

During the year under report 101 indigenous cases and 80 deaths were reported. Banswara city and two villages only reporting cases.

70. *Udaipur*.—In Mewar plague became indigenous in August 1903, the disease having been introduced from Central India. Twenty-four imported cases with 14 deaths were detected chiefly in arrivals by trains, and 5,479 indigenous cases with 4,892 deaths were reported during the year, 60 villages and towns being infected.

71. *Jhalawar*.—Plague was traced to importation from Central India in October, resulting in 694 cases and 544 deaths, 28 villages being infected.

72. *Pertabgarh*.—In this State plague appeared in December 1903 and 171 cases with 122 deaths were reported from Pertabgarh city and 4 villages.

73. *Shahpura*.—Plague did not gain a footing in this Chiefship till the middle of February 1904. During the year under report Shahpura town and 9 villages were attacked, in which 485 cases and 371 deaths were reported.

74. *Marwar*.—During April 1903, 32 indigenous cases and 31 deaths were reported from Pipar, the disease having been imported from Ahmedabad. The energetic measures employed stopped the epidemic.

Twenty-four imported cases with 17 deaths were also detected in arrivals by Railway in Marwar.

75. In nearly all States the principles as set forth in the Venice Conven-

General precautionary measures.

tion regarding precautions against the introduction of plague into foreign countries were adopted in a modified form, namely, persons from infected areas were examined, suspicious cases and those suspected of carrying infection were detained for disinfection and observation, while the rest were permitted to enter the State under 10 days' surveillance.

76. In infected villages, etc., evacuation, disinfection, and segregation were carried out, largely by the people themselves, the poorer being State-aided. Disinfection by desiccation was employed when possible in several States, otherwise by chemicals and free ventilation.

77. In Tonk (Nimbahera Pargana), Shahpura, Banswara, Jaipur, Marwar, and Jhalawar plague measures were excellent. In Alwar they were very elaborate. In Mewar considerable difficulty was experienced, owing often

to the apathy and passive opposition or negligence of some of the hakims and State officials.

78. The general medical staff in the province was unable to meet all demands and in many States temporary hands had to be entertained. In Mewar some dispensaries had to be partially closed for a short time in order to allow the staff to deal promptly with sudden outbreaks.

79. A weekly plague statement was issued to all Medical Officers in the province showing the States and villages infected in each State in Rajputana for information and general guidance.

80. *Inoculation* for plague with Haffkine's serum was only employed in two States owing to general opposition to the measure.

81. Captain Scott-Moncrieff performed 1,391 operations in the Shahpura Chiefship (including members of the Chief's family); of these, 238 were women. One thousand three hundred were done in Shahpura city and 91 at Dakola village.

82. Among the inoculated 9 deaths occurred and the Agency Surgeon considers that these persons were plague-infected at the time of the operation, 5 of them succumbing within three days. In his opinion Haffkine's serum is certainly a protective, but he gives no time-limit for such protection.

83. In Jaipur 208 inoculations were performed in 1903 with no deaths, but as these were done at the end of an epidemic, the Residency Surgeon is unable to give any opinion as the value of the protective powers of the serum.

84. In addition to the ordinary lines of treatment the administration of carbolic acid to plague cases was tried in Jhalawar and Shahpura. The Agency Surgeon, Kotah and Jhalawar, reports 168 cases treated with this remedy, of which 46 recovered; he considers it chiefly of value in the bubonic form of the disease.

85. The Agency Surgeon, Haraoti and Tonk, treated 39 cases, of which 22 recovered. He considers it better than any other line of treatment at present known, and states that in no case did he detect any symptoms of carbolic acid poisoning.

86. In other States it was seldom that Agency Surgeons had opportunities of treating people, as they preferred their own baidis, etc.

87. Native methods of treatment by hakims and baidis appeared to consist of—

- (1) Cauterization of buboes.
- (2) Application of Madar juice to buboes.
- (3) Fomentations of leaves of the Madar.
- (4) Internal administration of Madar juice in a decoction of Neem leaves.
- (5) Application of leeches.

88. The names of the following Medical Officers were specially mentioned for tact and energy in connection with plague epidemics in Rajputana in the Local Government Administration Report for Rajputana of last year:—

Lieutenant-Colonel J. Crofts;
 Lieutenant-Colonel P. Durrell Pank;
 Major (now Lieutenant-Colonel) R. Shore;
 Major R. C. Mac-Watt;
 Captain F. A. Smith;

and the names of Captain Scott-Moncrieff and Major Lumsden have been noted for special mention in this connection for the year under report.

89. In most of the States in which the plague has been prevalent, work in precautionary measures and in combating the disease has been specially onerous, and Agency Surgeons are to be congratulated on the prompt and thorough measures adopted in the various States for controlling and localizing the outbreaks.

STATEMENT No. IIIA.

OPERATIONS.

90. Sixty-one thousand seven hundred and fifty-five operations of all classes were performed in Ajmer-Merwara and in Native States of Rajputana

during the year under report, against 62,033 in the previous year. Of the persons operated on, 61,302 or 99·12 per cent. were reported as "cured," 218 or ·35 per cent. were "relieved," 98 or ·16 per cent. were "discharged otherwise," 48 or ·08 per cent. "died," and 182 or ·29 per cent. "remained" under treatment on 31st December 1903.

91. Of the operations performed, 693 were extraction of the lens for cataract, against 854 in 1902, of which 546 or 78·78 per cent. were reported successful. As in the previous year, there was no death from this operation or its consequences. Forty-four lithotomies, 93 litholapaxies, and 132 amputations were performed, against 68 lithotomies, 90 litholapaxies, and 153 amputations in 1902.

92. In Native States, Jaipur stands well ahead of all others in surgery. The Jaipur Durbar is especially liberal to the medical institutions of the State, with the result that the Mayo Hospital is equipped with all requirements of modern surgery.

93. The Victoria Hospital, Bharatpur, is also thoroughly up to date, but its proximity to Agra prevents its being so much utilized by the general public

STATEMENT No. IV.

94. Shows the classes and sexes of in-door and out-door patients treated in the dispensaries of Ajmer-Merwara and of Native States in Rajputana as follows:—

	1902.	1903.
Europeans	695	584
Eurasians	1,770	1,507
Hindus	796,997	816,766
Musalmans	312,520	308,646
Other classes	75,419	71,643

53·37 per cent. of those who attended were men, 21·18 women, and 25·45 children, as compared with 53·65 men, 21·58 women, and 24·77 children in the previous year.

STATEMENT No. V.—PART I.

95. Shows the income and expenditure of Government Dispensaries and Hospitals and expenditure only of those in Native States.

96. In the Ajmer-Merwara District expenditure rose from R16,937 to R17,875 in the year under report.

Ajmer-Merwara.

97. The total income of the Ajmer General Hospital was R12,141-9-9 against R6,964-5-1 in 1902, while the total expenditure was R11,583-7-6 as compared with R6,800-13-0 in the previous year. The increase in income was chiefly due to the grant of R2,000 by the District Board for purchase of surgical instruments and of R3,798-11-2 from Victoria Memorial Fund for purchase of hospital furniture and improvements to the hospital building.

98. There is an increase in the cost of establishment paid by Government which is partly attributed to the promotion of Hospital Assistants at Kekri, Beawar, and Ajmer.

99. The decrease of expenditure was under heads medicines, diet, and miscellaneous charges which is due to the healthiness of the year.

100. The invested capital of the dispensaries in Ajmer remained the same as in the previous year. The financial position of the Kekri, Pisangan, Deolia, and Ramsar have improved and all the others have a balance to credit.

101. The money obtained from Victoria Memorial Fund, it is hoped, will be sufficient to entertain a female staff for the female wing of the General Hospital.

102. It is the largest British Hospital in Rajputana and yet has no female Hospital Assistant or staff for attendance on females, whereas, even in Native States, this necessity has been acknowledged and is generally acted upon. It remains for the principal British Medical Institution in Rajputana to be in a backward condition in this respect, when it should be a pattern to those in Native States.

103. The total expenditure on Political Agency and Salt Dispensaries, fell from R13,261 in 1902 to R12,709 in 1903 which is attributed to the

amalgamation of the Rajputana Agency Hospital with the Charitable Dispensary at Abu.

104. There is an increase in the cost of establishment owing to the promotion of the Hospital Assistants attached to the Northern India Salt Revenue Dispensaries at Bhatki and Didwana.

105. The expenditure on hospitals and dispensaries in the Native States of Rajputana rose from R3,06,819 in 1902 to R3,07,054 which is due to the increase in expenditure on Europe medicines and medical staff and to the introduction of the new scheme for improving the position and prospects of the Civil Hospital Assistants in Native States with effect from the 1st August 1903, as laid down in Government of India, Home Department Resolution No. 1002—1014, dated 4th July 1901.

106. Of the total cost of hospitals and dispensaries in these States R59,184 were expended in Jaipur, R45,475 in Jodhpur, R32,111 in Kotah, R31,396 in Bikaner, R31,018 in Alwar, R29,780 in Bharatpur, R25,251 in Mewar, R10,736 in Jhalawar, R7,022 in Dholpur, R6,464 in Tonk, R5,346 in Karauli, R3,747 in Sirohi, R3,029 in Kishangarh, R2,767 in Bundi, R2,406 in Jaisalmer, R1,659 in Shahpura, R1,366 in Banswara, R1,358 in Dungarpur, R1,253 in Pertabgarh, and R544 in Kushalgarh.

107. The average cost of each case treated in Native States was 53 pies as in 1902.

Native States.

108. The Agency Surgeon, Haraoti and Tonk, has been assisting the Bundi authorities with practical advice though the State is not yet under his medical supervision.

109. In Kushalgarh very little is done and there is no qualified Hospital Assistant.

110. Some of the Durbars have been addressed with a view of improving the position and pay of compounders and other menial departmental staff, who, under existing conditions, have little prospect of improved position or pay. Alwar has some years since introduced a good scheme, and Jaipur is now doing so. It is to be hoped that other States will also take the matter up. A good deal of responsibility rests on compounders and dressers and their claims should not be ignored.

MISSION HOSPITALS.

111. There are 6 Mission Hospitals in Rajputana, *viz.*, 2 at Ajmer, 1 at Nasirabad, 1 at Udaipur, 1 at Jodhpur, and 1 at Ashapura which was opened during the year under report, probably owing to the outbreak of *pestis minor* in the Mission Orphanage.

112. The following table shows the total number of in- and out-door patients treated and operations performed in Mission Hospitals in Rajputana during the year under report:—

NAME.	OUT-DOOR PATIENTS.		In-patients.	Operations.	REMARKS.
	New.	Old.			
Ajmer male	17,955	49,422	240	1,101	1,622 patients were visited at their homes.
Ajmer female	5,487	13,502	99	381	
Nasirabad	9,528	19,348	268	631	
Udaipur	22,509	38,945	300	1,647	954 Ditto ditto.
Jodhpur	7,439	31,607	116	1,067	
Ashapura	3,476	...	934	...	
TOTAL	66,394	152,822	1,957	4,827	2,576

RAILWAY HOSPITALS.

113. In 6 Railway Dispensaries on the Rajputana-Malwa Railway within the limits of Rajputana (*viz.*, 1 at Abu Road, 1 at Sojat Road, 2 at Ajmer,

1 at Phalera and 1 at Bandikui) 20,118 patients were treated during the year under report as follows:—

Sojat Road	.	.	.	.	.	2,014
Abu Road	.	.	.	.	.	3,498
Ajmer	.	.	.	.	.	8,842
Thalera	.	.	.	.	.	2,180
Bandikui	.	.	.	.	.	3,584

INSPECTIONS.

114. The Residency Surgeon and Chief Medical Officer in Rajputana inspected the hospitals and dispensaries during the past season in the cities noted below:—

Bikaner, Jodhpur, Ajmer, Dholpur, Alwar, Bharatpur, Jaipur, Tonk, Deoli, Shahpura, Bundi, Kotah, Jhalawar, Udaipur, and Kishangarh, as well as all Imperial Service Corps Hospitals in different States.

SECTION III.—JAILS.

115. *Ajmer*.—The daily average number of prisoners in the Ajmer Jail fell from 540·56 in 1902 to 420·16 in 1903. There was a considerable decrease in the total number of cases treated in hospital, and the mortality was only 3, which was attributed to the healthiness of the year and the absence of epidemic diseases. The 3 deaths which occurred among the convicts were due—2 to “pneumonia” and 1 to tubercular “phthisis”; of these, 2 were in bad health and 1 in indifferent health at the time of admission to jail.

116. In the Ajmer Jail malarial fevers and spleen diseases gave rise to 16 per cent. of the total cases treated against 26 per cent. in the previous year, a decrease of 10 per cent. which is due to the healthiness of the year, and lungs and respiratory diseases contributed 8 per cent. of the sickness against 5 per cent. in 1903. There were fewer cases of dysentery and diarrhoea by 3 per cent., and of ulcers and injuries by 1 per cent. than in the previous year.

117. The new well has been connected with the barracks, factory and garden by means of pipes, but the pump for distribution of the water has not yet been erected, it will probably be in working order by the end of 1904. Water has consequently had to be purchased from the Municipality mains for bathing and drinking purposes during the year.

118. Various structural improvements were undertaken during the year. The construction of 3 new barracks to accommodate from 90 to 120 prisoners and new gallows is still under consideration.

119. The draft of revised Jail Manual for Ajmer Jail has been completed and submitted to the Honourable the Chief Commissioner, Ajmer-Merwara, for approval.

120. The year has been exceptionally healthy and prosperous and its effects on the jail population has been beneficial, resulting in less crime and fewer convictions, and there was little overcrowding.

121. During the year under report the maximum population on any one day was 463 or 31 above the holding capacity of the jail.

122. The review by the Commissioner, Ajmer-Merwara, on the strength, classification, health, employment, and conduct of prisoners, nature of sentences, jail manufactures and expenditure of the Ajmer Jail is given as Appendix A of the report together with statements.

123. *Native States*.—The daily average number of prisoners in jails in Native States of Rajputana fell from 5,966·44 in 1902 to 4,929·29 in 1903, this decrease is probably due to a prosperous year.

124. There was no cholera or epidemic disease in any of the jails in Rajputana in 1903.

125. The following Jails were overcrowded practically throughout the year:—

Jaipur Central Jail, Jodhpur, Bharatpur, Udaipur, Pertabgarh, and Banswara Jails.

126. In Ajmer, Tonk, Shahpura, and Dungarpur Jails there was slight overcrowding during short periods.

127. This overcrowding does not, during the year under report, seem to have affected the death-rate, except perhaps in the cases of the Bharatpur Jail where the ratio is 55·74 *per mille*, Banswara where it is 199·41 and Pertabgarh 70·45, while Dungarpur which was only overcrowded for short periods has a ratio of 101·90 *per mille*.

128. Jaipur Central and Jodhpur Jails, though overcrowded throughout the year, have only a mortality rate of 22·18 and 22·13 *per mille* respectively.

129. The general mortality in the jails in what may be considered a healthy year seems to have been chiefly among those who were convicted during the famine years and were consequently weakly on admission.

130. The Jaipur Central Jail requires accommodation for 200 more prisoners.

131. The Jodhpur Jail also requires more barracks for under-trial prisoners.

132. At Bharatpur improvements are now under consideration for the jail.

133. In Dholpur the new jail was occupied during the year, the accommodation is in excess of the present needs of the State.

134. In Kishangarh Jail there was a good deal of malaria which was largely caused by the jail garden being inside the jail; it is now to be removed to a good site in the vicinity outside the walls.

135. In Kotah Jail arrangements for the segregation of juveniles are being taken in hand.

136. In Udaipur the old women's barrack is being converted into one for juveniles.

The darogah of this jail resigned during the year and his work is being carried on temporarily by his deputy.

137. In Pertabgarh a new jail is under construction.

138. In Banswara a new jail will be built when funds are available.

139. In Dungarpur the site for a new jail has been selected.

140. There is nothing special to report about the jails not noted above, as the prisoners' health has been on the whole satisfactory in them.

141. The Residency Surgeon and Chief Medical Officer in Rajputana

inspected the jails at Bikaner, Jodhpur, Ajmer, Alwar, Bharatpur, Jaipur, Tonk,

Bundi, Kotah, Jhalawar, Udaipur, and Kishangarh.

142. As a result of the inspection, several improvements are being introduced which, it is hoped, will turn out of value.

143. The necessity for regular inspection of district jails was impressed upon Agency Surgeons, progress in jail administration is necessarily slow in Native States, continual supervision is necessary and defects brought to the notice of the State authorities.

144. Major P. J. Lumsden, I.M.S., Agency Surgeon, Kotah and Jhalawar, was temporarily transferred to Baluchistan as Officiating Administrative Medical Officer from 7th June to 17th November 1903. Major R. C. MacWatt, I.M.S., Agency Surgeon, Haraoti and Tonk, Deoli, was sent on deputation with Her Highness the Begum of Bhopal in Central India to Mecca. He left Deoli for Bhopal on the afternoon of 13th October 1903.

145. *Additional Charges.*—The Civil Surgeon, Ajmer, is the Medical Officer 44th Merwara Infantry, the Agency Surgeon, Haraoti and Tonk, is the Medical Officer 42nd Deoli Regiment, the Medical Officer of the Mewar Bhil Corps holds collateral charge of Dungarpur State and superintends the civil dispensaries at Kherwara and Kotra, and the Medical Officer of the 43rd Erinpura Regiment inspects the Sheogunge Dispensary adjacent to the Cantonment of Erinpura.

146. *Warrant Officers.*—One Medical Warrant Officer (retired) was employed temporarily on plague duty at Ajmer.

147. *Assistant Surgeons.*—Two Assistant Surgeons were permanently employed at Ajmer and Beawar and 9 in Native States, *viz.*, 2 in Jaipur, 1 at Jodhpur, 2 at Bharatpur (1 acting temporarily), 1 in Bikaner, 1 at Dholpur, 1 at Jhalrapatan, and 1 at Kishangarh. In addition 4 Assistant Surgeons were locally entertained by the Durbars, *viz.*, 2 at Jaipur and 2 at Jodhpur; they are not under this office.

148. Doctor Deb was transferred from Bandikui to the Northern India Salt Revenue Dispensary at Sambhar on the 27th October, replacing Doctor

Claxton, whose time of service had elapsed. Doctor Newland was appointed to succeed Doctor Deb in charge Railway Plague inspection at Bandikui from 23rd October 1903.

149. In addition to the Hospital Assistants on the British Government list and those on the Native States list there were 10 locally entertained Hospital Assistants employed, *viz.*, 5 in Bharatpur, 4 in Jaipur, and 1 in Mewar, also 4

Local class Native Doctors. local class Native Doctors who were locally entertained by the different States in Rajputana, *viz.*, 1 in Mewar, 1 in Marwar, 1 in Bundi, and 1 in Kushalgarh. These will be gradually absorbed and qualified Hospital Assistants appointed.

150. There were 10 Military Hospital Assistants employed with the Imperial Service Corps in Rajputana, *viz.*, 4 at Alwar, 4 at Bharatpur, 1 at Bikanir, and 1 on special duty with the ex-Maharajah of Bharatpur at Deoli.

151. Six Lady Doctors were employed in Rajputana, 1 at Alwar, Udaipur, Kotah, Jodhpur, Tonk, and Bharatpur respectively, against 4 in the previous year, and there were 11 female Hospital Assistants as in 1902.

FEMALE HOSPITALS AND DHAJ CLASSES FOR WOMEN.

152. *Ajmer*.—If funds permit a female Hospital Assistant will be appointed shortly to medical charge of the women's wards of the General Hospital, Ajmer.

153. Miss Campbell has been in charge of the Mission Hospital for women at Ajmer throughout the year. The number of patients treated is shown under Mission Hospitals.

154. *Beawar*.—Female Hospital Assistant Janki Bai was in charge of the female wards of the Charitable Dispensary at Beawar.

155. The returns received from the women's hospitals in Native States of Rajputana show on the whole a decrease of work done during the year under report in these institutions which is attributed to the healthiness of the year and non-prevalence of epidemic disease.

156. *Alwar*.—The Dufferin Hospital at Alwar continues to be popular and a newly started Dhaj class is doing good work under Miss Lauder, M.D.

157. *Udaipur*.—The Walter Zenana Hospital at Udaipur has not a sufficient staff, and the Durbar has been asked to provide a female Hospital Assistant and a compounder and Residency Surgeon, and Chief Medical Officer understands he is willing to do so; without a proper staff the institution cannot be a success.

158. *Bharatpur*.—Obstetrical work in connection with the Victoria Hospital under Miss Hetherington has been considerably developed. Female Hospital Assistant Bibi Rup Kuar in charge of the Female Hospital has done excellent work and is much liked and trusted by the people.

159. *Kotah*.—Female Hospital Assistant Miss Helen Buldeo Singh was in charge of the Victoria Hospital at Kotah up to the 10th November 1903, when Doctor Miss Wynne was appointed as Superintendent.

160. *Jhalawar*.—Female Hospital Assistant Miss Annie Williams has been in charge of the Crofts Female Dispensary at Chaoni, Jhalrapatan, throughout the year. This institution is an out-door dispensary in which 6,613 patients were treated against 9,316 in 1902. The Agency Surgeon, Kotah and Jhalawar, reports that if the Hospital Assistant and Dhaj were attached to the Chaoni Hospital, he thinks it would be more satisfactory than the present arrangement, and the expense to the State would be less.

161. The Dhaj training class was opened at Ajmer on the 1st April 1903. This is a central Dhaj class intended for the special training of Dhajs from Ajmer-Merwara District and Native States of Rajputana. Twenty-one pupils were admitted into the class for training up to 31st December 1903; of these, four obtained qualification certificates.

162. The Dhaj classes at Jaipur and Bharatpur have been kept up throughout the year; but the Dhaj class at Kotah was closed in November 1903, and that at Alwar re-opened.

163. A female pupil who was educated by the Jodhpur Durbar passed her final examination as a Hospital Assistant in April 1903, gaining the silver medal, and was appointed to the Jaswant Hospital at Jodhpur.

IMPERIAL SERVICE CORPS.

164. The three Regiments of Cavalry, the Camel Corps, the two Transport Corps, and the two Regiments of Imperial Service Infantry at Alwar, Jodhpur, Bikaner, Jaipur, and Bharatpur have well equipped hospitals, which have been regularly inspected by the Residency Surgeon and Chief Medical Officer in Rajputana.

MISCELLANEOUS.

165. Twenty-one lunatics were treated in the Ajmer Jail during the year under report, of whom 6 were transferred to Lahore, 6 were released at the jail, and 6 were made over to their friends and relatives. Only three lunatics remained in the jail on 31st December 1903.

166. In Native States 137 lunatics were treated in 1903, of whom 20 were cured, 16 made over to the custody of their friends and relatives, 21 died, and 80 remained under treatment. No insane were sent to the Lunatic Asylum, Jaipur, by the Kishangarh State during the year.

167. There are no Lunatic Asylums at Sirohi, Kishangarh, Dholpur, Tonk, Bundi, Shahpura, Banswara, Pertabgarh, and Dungarpur.

168. In accordance with Government of India, Home Department, letter No. 60—69 (Medical), dated 19th January 1904, returns of cancer cases treated in various Hospitals in Rajputana were collected but they are very incomplete, and from them it is impossible to make any deductions of practical value.

169. Cancer does not appear to be very prevalent in Rajputana, also the condition of life and the caste prejudices of the majority of the inhabitants of Rajputana are against much prospect of reliable statistical information. Certain classes object to any examination at all.

170. Scientific research amongst natives in the Native States is by no means easy.

171. Caste prejudices and old established customs are much more pronounced and difficult to overcome than in Regulation-Provinces in British territory. Reliable information is seldom available and *post-mortem* examinations are almost invariably refused. Besides the Purdah Nashin system amongst a large section of the people precludes investigation amongst women.

172. In these circumstances and from a perusal of returns received the Residency Surgeon and Chief Medical Officer is of opinion there is little scope for such an investigation in Rajputana at present.

Rainfall return for 1903.

Name of State or District.	January to May.	June to September.	October to December.	TOTAL.

in Rajputana

DATED MOUNT ABU ;
The 14th June 1904.

APPENDIX A.

AJMER JAIL, 1903.

Major H. R. Woolbert, M.B., I.M.S., held charge of the office of Superintendent of the Central Jail at Ajmer throughout the year 1903.

2. The year opened with a jail population of 432 and ended with one of 333. The total number of admissions was 1,234 as compared with 1,978 in 1902. The daily average strength fell from 540.56 in 1902 to 420.16.

3. In the course of the year 18 convicts were released on appeal, 487 on expiry of sentence, 34 on payment of fine, and 96 under the remission rules; while 3 convicts were transferred to other jails and 77 were released in connection with the Coronation Durbar held at Delhi on the 1st January 1903. Three convicts died and 862 remained in the jail at the close of the year.

4. Of 619 under-trial prisoners, 194 were released, 376 were convicted and sentenced, 29 were transferred, and 20 remained in the jail at the close of the year.

5. Of 17 civil prisoners admitted during the year, 16 were released and discharged and 1 remained under detention when the year ended.

6. Of 612 convicts admitted during the year, 5 were Christians (1 European, 2 Eurasians, and 2 Natives), 172 Muhammadans, and 435 Hindus.

By age classification 43 were under 15 years of age, 486 between 16 and 40, and 80 between 40 and 60.

Of the 575 male prisoners, 160 were agriculturists, 272 labourers, 32 shop-keepers and traders, 38 domestic servants, 33 Government servants, and 40 were without occupation. Of the 37 female convicts, 16 were married, 8 unmarried, 12 were widows, and 1 was a prostitute.

7. Of the 612 convicts admitted during the year, 58 were sentenced to simple and 523 to rigorous imprisonment. In the case of 14 convicts, solitary confinement was awarded in addition to rigorous imprisonment, while 17 were sentenced to rigorous imprisonment and to whipping.

The number of convicts sentenced to terms of imprisonment not exceeding one month was 238; 110 were sentenced to imprisonment exceeding one month but not exceeding three months; 128 to terms of imprisonment above three months but not exceeding six months; 71 to imprisonment above six months but not exceeding one year; 39 to imprisonment above one year but not exceeding two years; 12 to imprisonment exceeding two years but not exceeding five years; 12 to imprisonment above five years but not exceeding ten years; and 2 convicts were sentenced to transportation for life.

8. The total number of previously convicted persons admitted during the year was 170, as against 179 in 1902. The ratio per cent. of the number having previous convictions to the total admissions was 27.78, as compared with 17.57 in the preceding year.

9. The daily average number of convicts sentenced to labour on working days was 347.03. Of these, 205.49 were employed on jail manufactures, 129.92 were engaged on prison duties; 14.24 were employed as prison officers, 4.43 were exempted from labour on account of their health, infirm, and 7.15 were sick.

10. The general conduct of the prisoners was good. The number of jail offences decreased from 226 in 1902 to 139. All these offences related to breaches of jail discipline. The prisoner who escaped from custody in 1899 is still at large. There were no escapes during the year.

11. The health of the prisoners was remarkably good in spite of slight overcrowding. The number of admissions into the jail hospital was 164, as compared with 266 in 1902. The number of deaths was 3, as against 16 in 1902.

12. The number of juvenile offenders confined in the Ajmer Jail was 51. Of these, 44 juvenile convicts were released, and only 7 remained in the jail at the close of the year. The number of prison offences fell from 18 in 1902 to 9, but the number of serious breaches of prison rules rose from 1 in 1902 to 5.

The Chunar Reformatory School in the United Provinces of Agra and Oudh has been appointed for the reception of juvenile offenders from Ajmer-Merwara, and rules have been framed under the Act.

13. The cash profit from the jail manufactures amounted to R3,467, as against R3,881 in 1902. The cash earnings per head of those sentenced to labour rose from R8-12-7 in 1902 to R9-15-10.
Jail manufactures.
14. The expenditure incurred in guarding and maintaining prisoners in 1903 amounted to R29,404, as compared with R32,196 in 1902. This includes the expenditure incurred by Magistrates (R794-0-0) on guarding and maintaining under-trial prisoners, and by the Executive Engineer (R7,008) on building and repairs. The average cost per prisoner rose from R9-9-11 to R63-15-11.
Expenditure.
15. The net cost (including the cost of under-trial prisoners maintained by Magistrates) of the jail to Government was R26,569 as compared with R28,315 in the preceding year.
Net cost to Government.
16. Various minor structural alterations were carried out during the year. A jail manual has been prepared and submitted to the Honourable the Chief Commissioner.
General remarks.

P. J. MELVILL, Major,
Commissioner, Ajmer-Merwara.

GENERAL SUMMARY.

Showing the Distribution of the Prisoners of all classes confined in the Ajmer Central Jail during the year 1903.

Vide Instructions issued with Jail Department Circular No. 42 of 1885.

Serial Number.	Station.	Place of confinement.	Classes of Prisoners.	5		6		7		8		9		10		11		REMARKS.
				Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	
1	Ajmer.	Central Jail.	Convicts	454	10	579	37	1,033	47	1,080	679	39	718	391-31	7-29	412-04	8-12	420-16

			Civil	2	...	15	...	17	...	17	16	...	16	1-46	...	1-46	...	
			TOTAL	471	11	1,158	76	1,629	87	1,716	1,256	77	1,333	412-04	8-12	420-16		

* Whether a Central Prison, District Jail or Subordinate Jail.

NOTE.—When Civil Prisoners are in a separate place of confinement and under some authority other than that of the Jail Department, such, for example, as the Nazir of the Civil Court, they should not be included in these statements.

No. I.—Statement showing the number and disposal of convicts in the Central Jail at Ajmer for the year 1903.

Serial Number.	Station.	Place of confinement.	Classes of Prisoners.	5		6		7		8		9		10		11		REMARKS.
				Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	
1	Ajmer.	Central Jail.	Convicts	454	10	579	37	1,033	47	1,080	679	39	718	391-31	7-29	412-04	8-12	420-16
			Under-trial	15	1	564	39	579	46	619	561	38	599	19-27	83	20-10	...	
			Civil	2	...	15	...	17	...	17	16	...	16	1-46	...	1-46	...	
			TOTAL	471	11	1,158	76	1,629	87	1,716	1,256	77	1,333	412-04	8-12	420-16		

* Of this number 44 Boys under 16 years.

NOTE. 1.—This and the other statements numbered 1 to 7 only convicted prisoners are to be included.

2.—Debtors and others detained for default of Government revenue will appear in No. 8.

3.—The "Total," column 6, is obtained by adding together the totals of columns 4 and 5, and represents with sufficient accuracy the number of different individuals who have been in prison during the year.

4.—The "Total," column 8, is the sum of columns 6 and 7, and necessarily includes many who are counted more than once.

5.—The "Daily average number," column 3, is obtained by adding together the number presented on each day of the month, and dividing the whole by the number of days in the month.

6.—When prisoners are transferred from one Jail to another on their way to undergo transportation beyond seas, they should be entered in column 7 B. When prisoners are sent to undergo transportation beyond seas, they should be entered in column 11.

7.—When the prisoners are employed extramurally under the orders of Government No. 1,632-43, dated 28th October 1899, they should be considered as forming a separate Jail, and the name of the Jail, that is, of the place where they are employed, should be entered in italics in each statement.

AJMER JAIL OFFICE ;

The 8th February 1904.

H. R. WOOLBERT, M.B., Major, I.M.S.,
Superintendent, Central Jail, Ajmer.

[illegible]

NOTE.—It is of importance that the particulars given in this, and also in No. 8, should not include the same individual more than once, and hence all transfers should be omitted. The Totals should correspond with the number in column 6, Statement 1: "Imprisoned during the month." But they should do so with the "Total" column 6, for January only, as the number remaining on the last day of the previous year (31st December) is to be included in that month.

STATEMENT No. III.—Statement showing the convicts admitted into the Jail at Ajmer during the year 1903 and those remaining on the 31st December of that year according to the nature and length of sentence.

The female column should be filled in in *italics*.

1		2																				3			
		NUMBERS ACCORDING TO LENGTH OF SENTENCE.																							
		A		B		C		D		E		F		G		H		I				J		TOTAL.	
		Not exceeding one month.		Above one and not exceeding three months.		Above three months and not exceeding six months.		Above six months and not exceeding one year.		Above one year and not exceeding two years.		Above two years and not exceeding five years.		Above five years and not exceeding ten years.		Exceeding ten years.		SENTENCED TO TRANSPORTATION BEYOND SEAS.				Sentenced to death.			

(A) Prisoners admitted during the year should only be shown here. *vide* column 5 of monthly statement No. 1, from January to December.

* Classes A, B, C, and D should be amalgamated for this total. Prisoners who escaped and were recaptured during the year should only be shown here, *not* column 9 or monthly schedules. (A) Prisoners acquitted during the year should only be shown here, *not* column 9 or monthly schedules.

(a) This figure should tally with those shown in column 16 of Monthly Return No. 1 for December.

AJMER JAIL OFFICE;
The 8th February 1904

H. R. WOOLBERT, M.B., Major, I.M.S.,
Superintendent, Central Jail, Aimer.

STATEMENT No. IV.—Statement showing the convicts admitted into the Ajmer Jail during the year 1903 who had been previously convicted.

Szt.	Number admitted during the year.	NUMBER PREVIOUSLY CONVICTED.				Ratio of column 2 D to column 1.	JUVENILE PRISONERS UNDER 16 YEARS OF AGE (SECTION 399 OF THE CRIMINAL PROCEDURE CODE).		REMARKS.
		A	B	C	D		A	B	
		Once.	Twice.	More than twice.	TOTAL.		Number admitted during the year.	Number previously convicted.	
Male	575	73	28	67	168	29.22	40	1	
Female	37	1	1	...	2	5.41	6	...	
TOTAL	612(a)	74	29	67	170	27.78	46(b)	1	

(a) NOTE.—In column 1 will be entered the prisoners admitted during the year, vide column 5 of Monthly Statement No. 1, from January to December 1903. Numbers in column 2 will be inclusive of the number in column 4.

(b) The figures in column 4 A should tally with those shown in column 3 A of Monthly Return No. II for the year.

STATEMENT No. V.—Statement showing the escapes and recaptures of convicts in the Central Jail at Ajmer for the year 1903.

1	2			3	4			5			6			
Remaining uncaptured on the last day of the past year.	ESCAPED DURING THE YEAR.			GRAND TOTAL.	RECAPTURED DURING THE YEAR.			REMAINING UNCAPTURED.			UNSERVED PORTION OF SENTENCE OF THOSE WHO ESCAPED DURING THE YEAR.			
	A	B	C		A	B	C	A	B	C	A	B	C	D
	From inside the Jail.	From outside the Jail.	TOTAL.		Those who escaped in previous years.	Those who escaped during the present year.	TOTAL.	Of previous years.	Of present year.	TOTAL.	Under 1 year.	Above 1 and under 3 years.	Above 3 and under 7 years.	Above 7 years.
1	...	...	...	1	...	...	...	1	...	1	...	...	...	...

In column 1, and also in column 5 A, only those should be included who have escaped during the previous seven years. In 4 A, if any are entered who have been at large for upwards of seven years, a special note should be added. A footnote should show how many have been struck off, each having escaped more than seven years previously.

STATEMENT No. VI.—Showing the offences committed by the convicts, and the punishments inflicted on them in the Jail of Ajmer, during the year 1903.

1	2	3	4			5						6	7	
SEX.	Average number of Convicts.	Criminal Offences.	BREACHES OF JAIL RULES.			PUNISHMENT INFLICTED.						Ratio of column 5 C to column 2.	REMARKS.	
			Smoking or having possession of forbidden articles	Offences relating to work.	Other offences against prison discipline.	A By Criminal Court.	B—BY JAIL OFFICERS.							C Total punishment.
							A Solitary confinement.	B Solitary confinement, with reduced diet.	C Reduced diet.	D Corporal punishment.	E Other punishment.

TOTAL	398.60	...	17	74	98	...	9	...	8	11	161	189	47.42	

The nature of the Criminal offences committed should be noted on the back of this return.

* In contradistinction to offences against prison discipline.

H. R. WOOLBERT, M.B., Major, I.M.S.,
Superintendent, Central Jail, Ajmer.

AJMER JAIL OFFICE ;
The 8th February 1904

STATEMENT No. VIII.—Statement showing the employment of convicts as Prison Officers in the Central Jail Ajmer for the year 1903.

1	2	3	4	5	6	
SEX.	Average number of convicts.	Average number employed as Prison officers.	Ratio of column 3 to column 2.	Total number employed as Prison officers.	Number of reductions or other punishments.	
Male	391.31	14.24	3.64	20	1	Convict Ward
Female	7.29	...	...	...	...	Ditto Overseer
						Ditto Writers
						Ditto Mohurrir
TOTAL .	398.60	14.24(c)	3.57	20(a)	1(b)	TOTAL

(a) The nature of the offices held by convicts should be given in column of remarks.
 (b) Detail of the nature of punishments ordered should be given as directed in paragraph 19 of the Government Review on the Jail Reports for 1899.
 (c) Column 3 should tally with column 7 of Return No. XII. Column 5 should show the total number of convicts employed as Warders, etc. merely the total sanctioned number of situations.

STATEMENT No. IX.—Statement showing the Scales of Diet in force in the Ajmer Central Jail during the year 1903.

1	2	3	4
Diet scales of labouring prisoners.	Diet scale of non-labouring prisoners.	Punishment diet scale.	Note of any change effected in diet scales during the year.
Atta of Gram 1/3 } 12 Chittaks daily. „ Barley 2/3 } Dal alternately . 2 Chittaks. Vegetables alternately 8 „ Oil with vegetables 1/10* „ Salt „ „ 1/4 „ „ „ Dal 1/6 „ Chillies with vegetables 2 M. „ „ Dal . 1 „ Fuel 4 Chittaks.	Atta 8 chittaks on Sunday and Monday and 10 chittaks on other days. Other articles are same as for labouring prisoners.	Labouring prisoners 8 chittaks atta, with the usual quantity of salt; the period of this diet is ninety-six consecutive hours.	Prisoners on mills receive 14 chittaks of atta instead of 12 chittaks, Bhishities were also given 14 chittaks of atta up to the 31st October 1903 when there was scarcity of water in the Jail and it had to be brought from the new well in mashaks.

NOTE.—A complete statement of all the diet scales in use for labouring prisoners according to length of sentence should be given in column 1, with details as to the articles used, and the variations in different days of the week.

* Or (4) chittaks for 25 prisoners.

H. R. WOOLBERT, M.B., Major, I.M.S.,
 Superintendent, Central Jail, Ajmer

AJMER JAIL OFFICE;
 The 6th February 1904.

STATEMENT No. X (FINANCIAL).—Showing the expenditure in guarding and maintaining the prisoners in the Central Jail at Ajmer during the year 1903, excluding the cost of building new Jails, of Additions, Alterations, or Repairs.

Serial Number.	NAME OF JAIL.	AVERAGE NUMBER OF PRISONERS.			RATIONS.		ESTABLISHMENT.		MUNICIPALITY.		HOSPITAL CHARGES.		CLOTHING.		CONTINGENCIES.		Grand Total expended.	Cost per head of average strength.	Serial Number.	REMARKS.
		Under trial.		Total.	Cost per head of average strength, excluding civil prisoners.	Total cost.	Cost per head of average strength.	Total cost.	Cost per head of average strength.	Total cost.	Cost per head of average strength.	Total cost.	Cost per head of average strength.	Total cost.	Cost per head of average strength.	Total cost.				
		Cop. victs.	Civil.																	
1	Central Jail, Ajmer Add for District Lockups	398-60	20-10	1-46	420-16	9,499-22	11-0	9,254-22	4-5	416-0	15-10	58-9	7-7	1,083-0	2-9	5-1,350-0	21,602-51	6-8	1

3. Do. without do.	...	...	...	...	...	...	...	...	...	...	...	...	45	45			...	7,007 15 0
TOTAL	26	...	...	...	...	...	30	...	6	...	38	34	422	556				
4. Total average population	7.18	...	...	...	...	...	19.27	...	50	...	8.75	7.12	374.88	420.16				

NOTE.—1. When female, Civil and Under trial convicts are placed in the part of the Jail devoted to female convicts, columns 7 and 9 will be blank. In columns 2 and 3 enter the number of beds that the Hospital is intended to hold.
2. In column 13 draw attention to defects in the Jail, and to alterations made during the year, also explain how prisoners were accommodated when there was overcrowding.
3. Total average population of sick prisoners who were accommodated in Hospital should be shown in columns 2 and 3.
4. Here state the total accommodation in square yards of the Jail, calculated at 36 square feet of superficial area and 648 cubic feet of capacity per prisoner in association.
5. To obtain column 16 divide the figures shown under note 4 by the number in column 15.
6. The capacity should be shown according to the number of beds, or according to measurement, whichever is found to be larger than the other.

STATEMENT No. B.—Showing the condition of the Prisoners discharged from the Central Jail at Ajmer during the year 1903.

1	2	3	4	REMARKS.

8, HASTINGS STREET.

No. 298 OF 1905.

FROM

THE HON'BLE MR. E. G. COLVIN, I.C.S.,
Officiating Agent to the Governor-General, Rajputana,

TO

THE SECRETARY TO THE GOVERNMENT OF INDIA,
FOREIGN DEPARTMENT.

Dated Abu, the 15th September 1905.

SIR,

WITH reference to the correspondence ending with Sir Arthur Martindale's letter No. 370, dated the 14th October, 1904, I have the honour to forward the Annual Report on Sanitation, Dispensaries and Jails in Rajputana for the year 1904, and on Vaccination for 1904-1905, prepared by Lieutenant-Colonel D. ff. Mullen, I.M.S., Residency Surgeon and Chief Medical Officer in Rajputana.

2. The general sanitation of the Ajmer city leaves much to be desired but the local authorities are fully alive to their responsibilities in this matter. The Municipal Committee propose to devote a large part of their present surplus balance of about Rs80,000, towards improving the sanitary condition of the city and certain urgently required works were carried out during the year under report. The question of the protection of the Foy Sagar water-supply is being considered.

3. Little attention is paid to Sanitation in Native States, but the anxiety of the inhabitants to prevent the recurrence of a severe epidemic of plague may stimulate their interest in this respect.

4. The number of in-patients and out-patients who attended at the dispensaries of the Province during 1904, was less by 23,160 than in the previous year. It may be doubted whether fear of being detained under suspicion of being infected with plague, was the cause of this decrease as is suggested in paragraph 64 of the Report; for it is observed that attendance increased in Alwar and Bharatpur where plague was most severe.

4. The commonest diseases were malarial fevers, diseases of the eye, skin diseases and ulcers.

5. The sale of quinine at the Post offices in Rajputana was as follows :—

' 1903-04	.	.	.	°	63,931	five grain powders.
1904-05	.	.	.	.	50,525	seven grain powders.

The quantity sold during the year 1904-1905 thus amounted to nearly 50 $\frac{1}{40}$ lbs. as against 46 lbs. in the previous year.

6. As was remarked in Sir Arthur Martindale's Review for the year 1903-1904, the question of vital statistics and of jail accommodation is receiving attention though progress in each case is slow.

7. The proposal made in paragraph 160 of the Report to convert the Veterinary College building at Ajmer into a Lunatic Asylum for Native States cannot in my opinion be recommended, as the building is likely to be required for other more important objects.

I have the honour to be,

SIR,

Your most obedient Servant,

E. G. COLVIN.

*Officiating Agent to the Governor-
General, Rajputana.*

REPORT

ON

SANITATION, DISPENSARIES, AND JAILS IN RAJPUTANA FOR 1904.

AND ON

VACCINATION FOR THE YEAR 1904-1905.

SECTION I.—SANITATION AND VACCINATION.

METEOROLOGY AND ITS RELATION TO FOOD-SUPPLY.

1. During the year under report 16·80 inches of rain were registered in
Ajmer against 18·23 inches in the previous
year, the average of previous six years was
16·27 inches.
Rainfall.
2. A statement is appended showing average rainfall during the year in each State.
3. The rainfall recorded in Rajputana generally has been below that of the previous year with the exception of 5 Agencies, namely, Eastern Rajputana States, Alwar, Kotah Jaipur and Tonk in which the rainfall of 1904 was in cases of the previous year.
4. The Kharif crops gave a fair yield, but severe cold in the winter season somewhat injured the Rabi crops.

VITAL STATISTICS, BIRTHS AND DEATHS.

5. There were 15,997 births registered in Ajmer-Merwara in 1904, against 14,061 in 1903, an increase of 1,936 which is attributed to the normal increase in population during a healthy year and cheap food. Of the total births registered 8,529 were males and 7,468 females, and the birth-rate was 33·54 per mille of population, against 29·48 per mille in the previous year. The percentage of male to female births was 114·21, against 117·66 in 1903. The birth-rate exceeded the death-rate in 20 out of the 23 circles of registration, against 18 in the previous year.
Births in Ajmer-Merwara.
6. During the year there were 13,149 deaths registered in this division, against 13,720 in 1903. The decrease in general mortality is due to a diminished rainfall causing less fevers and cheap grain food. The decrease in mortality from fevers alone was 581, corresponding almost exactly with the decreased number of deaths, viz., 571.
Deaths in Ajmer-Merwara.

VITAL STATISTICS OF AJMER CITY AND SUBURBS.

Ajmer City Population	52,074
Ajmer Suburbs Population	21,765
GRAND TOTAL	73,839

7. The Vital Statistics of Ajmer City and Suburbs are fairly trustworthy and are given here as a means of comparison with those of the District Ajmer-Merwara. The statistics are for the official year and not for the calendar year, so that allowance must be made for certain differences due to that fact.

BIRTHS.

8. There was an increase of 326 births as compared with previous year, and the birth-rate increased from 19·98 per mille to 24·39. This increase is due partly to cheaper food, improved general health and better registration. A certain number of births escape registration for which there is no remedy, as the mothers go to their native villages for their confinement, but there is still much room for improvement. According to the registers, the number of deaths during the year exceeded the births by 1,324, which is evidently misleading as the population of the city is steadily increasing year by year; the question of house accommodation is becoming urgent, and there is much overcrowding. The large number of primary vaccinations performed, namely, 3,159, although partly due to the small-pox scare, is also some evidence of a healthy birth-rate.

DEATHS.

9. The total number of deaths registered during the year in Ajmer City and Suburbs was 3,125, against 3,523 last year, a decrease of 398 deaths.

10. This gives a death-rate of 42·32 per mille of population, against 47·71 in the previous year.

11. Of the total mortality the number of deaths among children under 5 years was 1,521, as against 1,793 in 1903, and accounts for 48·67 per cent. of the total deaths. There were 765 deaths among children under 1 year, as against 943 in the previous year.

12. The decrease in general mortality is due to a diminished rainfall in the latter part of the year causing less fever. There were only 1,189 deaths attributed to fever, a decrease of 305 as compared with 1903, and there were 95 less deaths from bowel complaints, showing that grain was good and cheap.

13. Respiratory diseases, on the other hand, showed a slight increase and there were 56 deaths from plague, as compared with 32 deaths in previous year. Small-pox of rather a severe type accounted for 256 deaths, as against 9 in 1903; it principally attacked the children of Banias and well-to-do persons who are averse to vaccination; the children of the poor who are comparatively well vaccinated escaping to a large extent. Strange to say re-vaccination among Europeans was almost invariably successful, even amongst those with goods marks of previous vaccination. It is notable that Ajmer kept practically free from plague owing to excellent railway inspection until Nasirabad got infected and the Nasirabad people invaded Ajmer by road with unfortunate results.

14. The mortality statistics of Ajmer City and Suburbs are most reliable as every death is personally investigated and reported by the Assistant Health Officer, who is specially entertained for this work alone.

TABLE I—Births and Deaths in Native States.

* Imported.

NOTE.—The information required for this table cannot be obtained in full for Jaisalmer. The total, therefore, of column 16 does not agree with the total of 9 preceding columns.

15. Registration has been attempted in 18 Native States as in the previous year, but so far with unsatisfactory results. The Mewar Darbar have not yet supplied information regarding births and deaths of Udaipur city.

16. Some of the tables show an improvement on those of previous years, but they are still far from correct. Endeavours are being made to improve the Agencies for collecting these statistics.

17. The Residency Surgeon and Chief Medical Officer in Rajputana considers that the inhabitants of the capital cities, and especially in those States under European management, are now sufficiently advanced and intelligent to allow the collection of correct vital statistics, if the work is tactfully performed. It is merely necessary to impress on the Chiefs and Political Officers the advisability and advantages of correct Statistics, the cost would be trifling and it would ensure the early detection of epidemic disease, poisoning, etc., and also act as a standard of comparison for checking the district returns as is done at Ajmer.

CHOLERA.

18. There were no cases of cholera reported in Ajmer-Merwara during the year under report.

19. As regards cholera in the Native States of Rajputana, the year may be considered a non-cholera year, only three cases having occurred, *viz.*, one indigenous case of cholera in Dholpur City on the 1st March 1904 in the Magistrate's house, due to eating unripe plums, and two indigenous cases in Shahpura between 25th June and 12th July 1904, one of which proved fatal.

20. The usual precautionary and preventive measures were taken.

SANITATION.

21. The water from the Foy Sagar Lake is freely used for drinking purposes both in the city and suburbs. During the year under report pipes have been extended so as to supply water to the Mayo College and the eastern part of the Civil and Railway lines between the Mayo College and the Military limits.

22. As regards the improvement in the quality of water-supply at Ajmer from the reservoir, the Residency Surgeon and Chief Medical Officer is of opinion that the cost of removing the villages from the catchment area would be prohibitive, but he is strongly of opinion that cultivation should be restricted as much as possible within half a mile of the tank or at least that no manuring of the soil should be allowed. If the Municipality could buy up the ground within the half-mile limit and re-sell it with these conditions attached, *viz.*, non-use of manure, it would be of much benefit.

23. Experience of filtering the water-supply from the Foy Sagar has not been successful, and if the risk of contamination of the water-supply by typhoid and cholera from the neighbouring villages could be minimized, it would be a decided advance. The villages are within municipal limits and their sanitary arrangements should be very carefully attended to and all cases of infectious disease notified.

24. Unfortunately when water was laid on for Ajmer city by pipes from the Foy Sagar, no proper arrangements were made to carry off refuse water by suitable drainage, etc., and consequently the health of the inhabitants did not benefit as much as it should be by the improved water-supply. Cholera has certainly diminished and guinea-worm, but typhoid is very prevalent among the native populace. House sanitation and drainage are very defective and the latrines in private houses are in many cases deplorably filthy; there is also much overcrowding.

25. The Civil Surgeon, Ajmer, reports that the following improvements have been made in conservancy arrangements in Ajmer town:—

- (1) Extension of the municipal trenching ground for the disposal of the sewage in shallow trenches and by the Nagpur system.
- (2) Purchase of new carts for the removal of solid and liquid matters from the city to the tramway station.
- (3) A large collecting tank for liquid excreta outside the Usrigate has been abolished and conservancy carts now remove these fluids direct to the tramway station.
- (4) The Municipality have established the principle that new balconies and new private privies are not to be allowed in very narrow streets, where the former would interfere with free ventilation and the privies further pollute the stagnant air.

26. The rules for the improvement of village sanitation in Ajmer-Merwara have been recently extended to Jethana—copy attached, *vide* Appendix A. The number of prosecutions under the rules in Ajmer were 345, while the number in Merwara was small.

NATIVE STATES.

27. The light railway continues to perform valuable work in removing foul water, night-soil and dead animals, etc., in increasing quantities. Rubbish and city sweepings were burnt in furnaces in the city at the depôts to save the

expenses of carriage. An Assistant Surgeon has charge of the Sanitary Department, and village sanitation is receiving some attention, although it is still backward. Twenty-seven wells were deepened and cleaned owing to the water level in all the city wells being very low.

28. The Sanitary Steam Tramway has worked satisfactorily at Jodhpur.

Jodhpur.

The condition of the City of Jodhpur is not as successful as it might be. The

Residency Surgeon, Western Rajputana States, reports that the large towns in Marwar are in a very bad condition as regards sanitation, and if cholera or other epidemic disease occurs, it will be controlled with great difficulty. He has drawn the attention of the Darbar to this subject. There is a special Hospital Assistant for sanitary work in Jodhpur.

29. The sanitation of the city is satisfactory, as it is supervised by the

Bikaner.

Municipal Committee and the Civil Surgeon. There is a special Hospital

Assistant for sanitary work in Bikaner.

30. In the City of Alwar the water level in the city-wells was dangerously

Alwar.

low in the spring and it again became necessary to further deepen 120 wells at a

cost of some 1,300 rupees. The work was done cheaply and well by the Municipal Overseer under the direction of a special sub-committee appointed for the purpose. The sanitary arrangements of the city are under the direction of Mr. Heatherly, the Chief Sanitary Inspector. The night-soil is buried in trenches by a contractor.

31. The following towns have a municipality, and they are under official supervision :—

Rajgarh.
Tijara.
Behror.

Ramgarh.
Gobindgarh.
Bahadarpur.
Shahbad.

32. The sanitary arrangements in the capital city are in the hands of the

Udaipur.

police and are decidedly defective in comparison with the capitals of other

large States. The attention of the Darbar has been drawn to this, and it is hoped some improvements may be introduced.

33. Residency and Agency Surgeons have been encouraged to spend as much of the cold weather as possible in Camp where they have frequent opportunities of advising village authorities in those sanitary measures which can be most easily and cheaply carried out.

34. The question of sanitary instruction, in schools is of great importance if a suitable primer could be obtained. The Residency Surgeon and Chief Medical Officer in Rajputana feels sure that the authorities would not object to its introduction. It is suggested also that all Agency Surgeons should examine both the central and the village schools when on tour, to test the vaccination work done in the past.

VACCINATION.

STATEMENT I.

35. In Ajmer-Merwara there was an increase of 1,099 in primary vaccina-

Ajmer-Merwara.

tion, viz., 14,210, against 13,111 in 1903-04; 99·08 per cent. of these were success-

ful and re-vaccination rose from 88 to 503 operations. This increase is due partly to the scare of small-pox and in the case of primary vaccination to the increased birth-rate.

36. The average number of operations performed by each vaccinator rose from 880 in 1903-04 to 980 in the year under report, and consequently each successful vaccination cost 35 pies, against 39 pies in the previous year.

37. The number of vaccinators was 15 as in 1903-04, and there was one Native Superintendent.

38. During 1904-05 29·52 per mille of the population of Ajmer-Merwara were successfully vaccinated, against 27·42 per mille in the previous year, and although it is satisfactory to be able to note an increase in this direction, there is still much room for improvement.

39. The Civil Surgeon, Ajmer, inspected 1,017, against 895 vaccinations in the previous year and the Native Superintendent inspected 445 villages and saw 8,143 vaccinated children, against 7,492 in 1903-04.

40. The proposal for a new vaccination station to be attached to the Dispensary building at Beawar is under consideration by the Beawar Municipal Committee.

41. In Native States primary vaccinations rose from 2,82,125 in 1903-04 to 2,85,630 in the year under report and 99·65 per cent. of these were successful, against 99·06 in 1903-04. This increase is due partly to increased supervision of vaccination by the Agency and Residency Surgeons in their States and no doubt also to an increased birth-rate as in Ajmer-Merwara. Re-vaccination also rose from 638 to 998 operations.

42. The average number of vaccinations performed by each vaccinator rose from 1,644 to 1,686 in 1904-05 and the work of each man varied in different States from 3,483 operations in Kotah to 222 in Jaisalmer.

STATEMENT II.

43. The expenditure on vaccination in Native States rose from Rs. 23,371-10-6 in the previous year to Rs. 24,225-15-4 in 1904-05 ; this is due to the increased number of vaccinators employed in Marwar and Jaipur. The average cost of each successful vaccination in different States varied from 8 pies in Kotah to 106 pies in Jaisalmer. The high cost of vaccination in Jaisalmer is due to diminished population in scattered villages and also to laziness on the part of the Vaccination Staff.

44. The Residency Surgeon, Western Rajputana States, reports that of the work performed in Marwar State 2,731 vaccinations were done by Hospital Assistants in Marwar Dispensary towns, 98·72 per cent. of which were successful and the Hospital Assistant at Sirohi performed 288 vaccinations in Sirohi City with a successful percentage of 99·57.

45. The presence of plague in most of the States in Rajputana had an appreciable effect on the vaccination work ; it also prevented Agency Surgeons inspecting as many vaccinated children as they might otherwise have been done.

46. The Residency Surgeon, Jaipur, inspected 622 towns and villages and saw 11,755 successful vaccinations ; the Agency Surgeon, Alwar, inspected 576 towns and villages and saw 6,622 children who had been successfully vaccinated ; the Residency Surgeon, Western Rajputana States, inspected 259 towns and villages and saw 6,161 successful cases ; the Agency Surgeon, Eastern Rajputana States, inspected 135 towns and villages and saw 5,722 successful vaccinations ; the Agency Surgeon, Kotah and Jhalawar, inspected 1,209 towns and villages and saw 4,500 successful cases ; the Civil Surgeon, Bikaner, inspected 64 towns and villages and saw 4,341 children who had been successfully vaccinated ; and the Residency Surgeon, Mewar, inspected 32 towns and villages saw 935 successful vaccinations and Medical Officer, Dungarpur State, inspected 1 town and saw 37 successful cases.

47. The Residency Surgeon and Chief Medical Officer in Rajputana in his winter tour of inspection examined 1,562 vaccinated children and found the work mostly very good, but on account of the severe cold and the presence of plague in certain capitals it was thought better not to harass the people by insisting on seeing more cases than were necessary to enable him to form an opinion of the work done.

48. With regard to the remarks by the Sanitary Commission on the Rajputana vaccination report for 1903, the Residency Surgeon and Chief Medical Officer paid particular attention to the high percentage of successful vaccinations and found the figures correct.

49. Lymph is kept up throughout the year in most of the important States and humanised lymph is generally used. Buffalo calf lymph is also largely employed in several States.

SECTION II.—DISPENSARIES.

STATEMENT A.

Number of Dispensaries.

50. In accordance with the orders contained in Government of India, Home Department, letter No. 678-86 (Medical), dated the 16th July 1904, the revised annual statements A, B, C, F, G, H, and J, for the annual report of Civil Hospitals and Dispensaries for the year ending 31st December 1904, have been adopted in lieu of those used for 1903, with the exception that the numbers of *Male and Female* (Children) and of *Male and Female* (Adults) required in the revised statements B and F are not available this year, but they will be in future annual returns.

51. During the year under report there were 166 hospitals and dispensaries in Rajputana as in the previous year. Two dispensaries were opened, one Railway Dispensary at Hanumangarh which though opened in 1903 but its figures are now shown in Annual Dispensary Statements for 1904 for the first time, and another, a Raj Dispensary, at Sagwara in the Dungarpur State on the 15th January 1904. Mirzawala Dispensary and the Crofts Female Hospital at Chaoni Jhalrapatan were closed on the 1st October and the 17th July 1904, respectively.

52. The dispensaries have been classified under the orders of the Government of India, Home Department quoted, above as follows :—

Dispensaries, Rajputana :—

I. State Hospitals	.	.	.	.	.	7
II. State Special	.	.	.	.	.	10
V. Private non-aided	.	.	.	.	.	149
(i.e. Native States)	.	.	.	.	.	...

Besides these there are six Mission and six Railway dispensaries open for the treatment of patients.

53. A considerable number of improvements to existing hospitals have been carried out during the year under review, or are under consideration in Ajmer-Merwara.

Improvements and additions to hospitals and dispensaries.

54. At Ajmer, new quarters for the Assistant Surgeon, and for a Female Hospital Assistant and an out-patient department for women are under construction in the General Hospital compound. A police ward has been constructed near the General Hospital at Ajmer and is now occupied. A proposal for the construction of a new hospital at Kekri is under consideration, and it is badly needed.

55. At several State dispensaries many improvements in buildings have been made during the year.

56. At Jaipur, new compounding, dressing and out-door patient rooms at a cost of Rs. 3,245-15-3 were constructed in connection with the Mayo Hospital and are a decided acquisition.

57. The new hospital at Khetri will be completed and probably opened during the current year.

58. At Kishangarh the quarters for the Assistant Surgeon have been completed and occupied, two wards for respectable families are being built by private subscriptions, the construction of new wards for in-door patients are not yet taken in hand.

59. A new operating theatre in the Bhagwandas Hospital at Bikaner is under construction. It will contain all the latest improvements.

60. A new hospital at Alwar is under construction ; it is to be named after Queen Alexandra and will, when completed, be one of the finest and best equipped hospitals in India. It is believed that it will be the first hospital to be called after Her Majesty, and her statue will adorn the grounds in front of the building.

61. The Maharaja is taking the greatest interest in the matter and, it is hoped that the relief to suffering and disease which this institution will afford will fittingly typify the benevolent sentiments of Her Most Gracious Majesty towards the people of the Indian Empire.

62. Assistant Surgeon's quarters and wards for females in the Dholpur Sudder Dispensary are under construction.

STATEMENT B.

Medical Relief.

63. Shows the total number of patients treated, both in-door and out-door, separately, during the year under report.

64. During the year one million, one hundred and seventy-five thousand nine hundred and eighty-six patients of all classes were treated, against 1,199,146 in 1903. A decrease of 23,160 in the number treated in the hospitals and dispensaries as shown in the regular standard statements numbers B, C, and F. and a falling-off is noted against Ajmer-Merwara, Agency and Salt Dispensaries and Native States, which is attributed to the healthiness of the year and to the presence of plague, as the public in many cases were afraid to go to hospital for fear they might be detained.

STATEMENT C.

65. The diseases for which the patients were treated are shown in this statement. The percentage of cases treated under each chief cause during the years 1903 and 1904 is noted below :—

Diseases.	Percentage during 1903.	Percentage during 1904.
(a) Malarial fevers and spleen	20.00	18.67
(b) Rheumatism	4.05	3.97
(c) Diseases of the eye	10.54	11.94
(d) Lungs and respiratory diseases	7.07	6.80
(e) Diarrhoea and dysentery	3.58	3.62
(f) Ulcers	10.43	10.83
(g) Skin diseases	9.14	9.38
(h) Injuries	2.06	2.20
(i) Syphilis	2.12	1.97

LEPROSY.

66. Three hundred and sixty-eight were treated for leprosy in Rajputana hospitals and dispensaries in 1904, against 376 in 1903. This shows a decrease of eight cases. No special methods of treatment have been employed.

SNAKE-POISONING.

67. Calmette's antivenine is kept in the stock and used for the treatment of snake-bite when opportunity offers for *testing* its value in virulent snake-poisoning.

PLAGUE.

68. During the year from 1st April 1904 to 31st March 1905 Twenty-six thousand five hundred and eighty-two cases of plague and twenty-two thousand six hundred and twenty-nine deaths were reported and 627 towns and villages infected in Rajputana including Ajmer-Merwara. The whole province was infected except Kishangarh, Dungarpur, Bundi and Jaisalmer, where there was no plague. The percentage of total plague deaths to population was 0.34.

69. The subjoined table shows the severity of the epidemic in certain Native States and Ajmer-Merwara District as well as the rapidity of its spread in recent years, and the percentage of total plague deaths to population since 1896.

70. The disease which is principally of the bubonic type is spread from village to village chiefly by the agency of human intercourse and infected clothes. In the villages rats play an important part in the dissemination of

the disease and it is possible that they may carry plague from one village to another in the course of their migrations. The Cantonment Magistrate at Nasirabad reports that infection was spread there by cats and dogs.

71. During the year under report 11 imported cases with six deaths were reported in Ajmer-Merwara excluding those detected at Ajmer Railway Inspecting Station and 1,181 indigenous cases with 977 deaths; 28 villages and towns being infected.

72. Necessary precautions were taken and plague and segregation camps put in charge of a Hospital Assistant under the supervision of the Civil Surgeon, Ajmer.

73. It is worthy of note that Ajmer City was kept for a long time practically free from plague owing chiefly to excellent railway inspection arrangements, but the disease was ultimately introduced by fugitives who came to Ajmer from Nasirabad, a small town 14 miles distant. In March 1905 only three indigenous cases occurred in the city.

74. Inoculation was successfully performed in a few cases only, and always at the request of individuals desirous of this form of protection.

75. The following imported cases and deaths were detected at Railway Inspecting Stations :—

	Cases.	Deaths.
Ajmer Railway Station	66	39
Bandikui Railway Station	1	1
Bharatpur Railway Station	2	0
Marwar Junction Railway Station	3	2
Abu Road Railway Station	1	0
Ahmedabad Railway Station	4	0
TOTAL	77	42

76. The Ahmedabad Plague Inspecting Station on the Rajputana border was abolished on the 8th August 1904 owing to the decrease of plague in the Bombay Presidency.

77. Twenty-five thousand three hundred and twenty-four cases with 21,607 deaths were reported in Native States of Rajputana during the year under report; of these 34 cases with 30 deaths were imported, 25,283 cases and 21,574 deaths were indigenous and 7 cases and 3 deaths were detected at the Railway Inspecting stations in Native States as shown above excluding Ahmedabad.

78. The epidemic affected 15 States and 599 villages in 1904-1905, against 13 States and 189 villages in the previous year. In Pertabgarh, Shahpura and Mewar the percentage of total plague deaths to population was 3.84, 2.44 and 1.01, respectively.

79. On the 31st March 1905 plague was in existence in the States and District mentioned in the table given in the map. The figures after that date will be given in the Report for 1905-1906.

80. In infected villages of all Native States evacuation, disinfection and segregation were carried out largely by the people themselves, the poor being State-aided. The measure on which most reliance has been and must be placed is evacuation.

It is satisfactory to note that the villagers now appreciate the advantages of early evacuation.

81. Disinfection ranks next to evacuation as a measure of practical importance, but its value is very much less. The people do not desire to have their houses disinfected chemically by the official agency maintained for the purpose. Desiccation has lately been offered to the people as a valuable measure. It is a matter of congratulation that the people have readily adopted the idea of desiccation with an improved and effective stove of Dr. Sawhney's invention.

82. The segregation and treatment of patients and the avoidance of contact with infected places, persons and things unfortunately continue to receive insufficient attention from the people, but no compulsion is used, we trust to giving good advice and to the sad teaching of experience, in a great measure.

83. *A propos* of giving advice, the Residency Surgeon at Udaipur laughingly promised the married woman of the Capital that they would all have male children next year if they vacated their houses and went into Camp for two months until the plague subsided, and their houses were disinfected. The women were delighted at the prospect held out to them and said they would go into Camp every year on these terms.

84. I visited the Camps several times and found them perfectly contented and happy in spite of the cold weather, and I feel sure that all male children born within the next 12 months in the city will be put down to the Camp episode. Natives are like children and a little tact and good humour goes a long way with them. The Residency Surgeon deserves credit for his happy thought which put every one in good humour.

85. The Residency Surgeon and Chief Medical Officer in Rajputana suggested that a supply of rat poison should be obtained from Messrs. Smith Stanistreet and Company, Calcutta, and distributed freely throughout the province and it is hoped that it will be given a fair trial.

86. In addition to the ordinary lines of treatment the administration of carbolic acid to plague cases was tried in Alwar, Kotah and Jhalawar. The Agency Surgeon, Alwar, reports that "carbolic acid" was administered with some success, but not sufficient to warrant its continuation to the exclusion of other means; whereas the Agency Surgeon, Kotah and Jhalawar, writes that carbolic acid in x to xv minimum doses was tried with disappointing results.

87. With regard to the treatment employed by the people themselves, Major Lumsden, I.M.S., reports that they used chiefly madar juice and nim leave juice both internally and externally with cauterization of buboes; their methods of treatment have apparently little or no beneficial effect.

88. In other States it was seldom that Agency Surgeons had opportunities of treating plague cases owing to the opposition or apathy of the people.

89. The names of the following medical officers are specially noted for tact and energy in connection with plague epidemics in Rajputana for the year under report:—

Lieut-Colonel R. Shore, I.M.S.
Lieut-Colonel P. D. Pank, I.M.S.
Major P. J. Lumsden, I.M.S.
Major H. R. Woolbert, I.M.S.
Captain F. A. Smith, I.M.S.

Hospital Assistants Suraj Narain in Kotah, Hospital Assistant Anant Ram at Nasirabad and other Hospital Assistants in most of the States in which plague has been prevalent did excellent work.

90. A plague map showing the mortality, the ratio per 10,000 of population and dates of first and last cases is herewith attached. I am sorely afraid that next year's map will have few blank spaces.

STATEMENT F.

91. Shows the classes and sexes of in-door and out-door patients treated in the dispensaries of Ajmer-Merwara and of the Native States in Rajputana.

	Number.
Europeans and Eurasians	= 1,728
Hindus	= 803,968
Musalmans	= 294,572
Other classes	= 75,718

92. The discrimination between male and female "adults" and of male and female "children" as required in revised Statement F is not available for the report for 1904, as it is not obtainable from the registers of in-and out-door patients kept in hospitals and dispensaries according to the old forms, and hence the total number of each class has been shown in the statement.

STATEMENT G.

Operations.

93. The details of surgical work performed in the hospitals and dispensaries are furnished in Statement G. Sixty thousand two hundred and sixty-six operations of all classes were performed in Ajmer-Merwara and in the Native States of Rajputana during the year under report, against 62,127 operations done in the previous year. Of the persons operated on 59,275, or 98·98 per cent., were 'cured', 236 or ·39 per cent. were 'relieved', 86, or ·14 per cent., were discharged otherwise and 77, or ·13 per cent., died, while 212, or ·36 per cent., remained under treatment on 31st December 1904.

94. Of the operations performed, 968 were extraction of the lens for cataract, against 693 in 1903, of which 808, or 83·47 per cent., were reported successful. Fifty-one lithotomies, 86 litholapaxies and 139 amputations were performed, against 44 lithotomies, 93 litholapaxies and 134 amputations in 1903.

95. In Native States Jaipur stands well ahead of all others in surgery.

STATEMENT H.

96. Shows the income and expenditure of Government dispensaries and hospitals and only the expenditure on those in Native States.

97. In Ajmer-Merwara the total expenditure fell from Rs. 17,875 to Rs. 16,108 in the year under report. This decrease was under the heads 'diet and miscellaneous charges' which is due to the healthiness of the year. The cost per case treated was 51 pies, against 55 pies in 1903.

98. The total income of the Kekri Dispensary was Rs. 10,777, against Rs. 1,703. This increase is attributed to the donation of Rs. 3,000 from the Kekri Municipality and to the receipt of Rs. 5,900 on account of sale proceeds of the old dispensary building. For the construction of a new hospital a sum of Rs. 8,900 is to be devoted.

99. The invested capital of the dispensaries in Ajmer remained the same as in the previous year.

100. The Ajmer General Hospital is the largest British hospital in Rajputana, and yet has no Female Hospital Assistant or staff for attendance on females, whereas in Native States this necessity has been acknowledged and acted upon.

101. The total expenditure on Political Agency and Salt Dispensaries rose from Rs. 12,709 in 1903 to Rs. 12,936 in 1904, which is attributed to the increase in expenditure on Europe medicines supplied to the Residency Hospital at Jaipur and the Agency Hospital at Kotra.

102. The total expenditure on hospitals and dispensaries in the Native States of Rajputana fell from Rs. 307,054 to Rs. 300,476 in 1904. This decrease of expenditure under heads medicines, diet and miscellaneous charges is due principally to the healthiness of the year.

103. There is an increase in the cost of establishment which is partly attributed to the promotion of Hospital Assistants and partly to the introduction of a revised scale of local allowances for Hospital Assistants in Native States with effect from the 1st March 1904 by the orders of the Hon'ble the Agent to the Governor-General and with the consent of the States concerned.

104. Of the total cost of hospitals and dispensaries in these States, Rs. 54,846 were expended in Jaipur, Rs. 49,778 in Jodhpur, Rs. 31,622 in Alwar, Rs. 31,033 in Kotah, Rs. 29,147 in Bikaner, Rs. 26,121 in Bharatpur, Rs. 24,537 in Mewar, Rs. 8,148 in Jhalawar, Rs. 6,520 in Dholpur, Rs. 6,048 in Tonk, Rs. 5,299 in Karauli, Rs. 3,923 in Sirohi, Rs. 3,522 in Bundi, Rs. 3,319 in Kishangarh, Rs. 2,961 in Jaisalmer, Rs. 2,697 in Dungarpur, Rs. 1,839 in Shahpura, Rs. 1,387 in Banswara, Rs. 1,323 in Pertabgarh and Rs. 532 in Kushalgarh.

105. The average cost of each case treated in Native States was 52 pies, against 53 pies in the previous year.

106. Very little is done in Kushalgarh and Bundi, as there are no qualified Hospital Assistants attached to the dispensaries there.

107. The Agency Surgeon, Haraoti and Tonk, has been assisting the Bundi State and Shahpura Chiefship with practical advice, though they are not as yet under his medical supervision.

108. As a good deal of responsibility rests on compounders and dressers, some of the Darbars have been addressed with a view to improving the position and pay of compounders and others of the menial departmental staff.

MISSION HOSPITALS.

109. During the year under report there were six Mission Hospitals in Rajputana as in the previous year, viz., two at Ajmer (one male and one female), one at Nasirabad, one at Ashapura, one at Udaipur and one at Jodhpur.

110. The following table shows the total number of in-and out-door patients treated and operations performed in Mission Hospitals in Rajputana during the year 1904:—

Name of Station.	OUT-DOOR PATIENTS.		In-patients.	Operations.	REMARKS.
	New.	Old.			
Ajmer, Male	18,225	53,048	210	1,186	
Ajmer, Female	5,967	13,526	130	325	2,171 patients were visited at their homes.
Nasirabad	6,394	21,171	157	581	
Ashapura	3,119	7,980	665	...	200 patients were visited at their homes.
Udaipur	15,332	28,818	200	1,117	
Jodhpur	7,294	31,927	111	976	614 patients were visited at their homes.
TOTAL	56,331	156,470	1,473	4,185	2,985

RAILWAY HOSPITALS.

111. There were 20,070 patients treated during the year under report in six Railway Dispensaries on the Rajputana-Malwa Railway within the limits of Rajputana, viz., one at Abu Road, one at Sojat Road, two at Ajmer, one at Phalera and one at Bandikui, as follows:—

	Rs.
Abu Road	4,345
Sojat Road	2,102
Ajmer	7,851
Phalera	1,970
Bandikui	3,802
TOTAL	20,070

INSPECTIONS.

112. The Residency Surgeon and Chief Medical Officer in Rajputana inspected the hospitals and dispensaries during the past season in the cities noted below:—

Ajmer, Alwar, Bharatpur, Dholpur, Jaipur, Udaipur, Jodhpur, and Bikaner.

His tour was curtailed, as he could not leave Abu until the question regarding the civil medical charge of the Abu Station during his absence was settled by the appointment of Major Carr, R.A.M.C.

JAILS.

113. *Ajmer*.—The daily average number of prisoners in the Ajmer Jail fell from 420·16 in 1903 to 349·40 in 1904, the daily average sick fell from 7·35 to 6·71, the mortality fell from 3 to 2 and the death-rate from 7·14 to 5·72 per mille of average strength, which may be attributed to the healthiness of the year as well as to improved jail management, and in a large measure to the fact that there was ample accommodation for the diminished number of prisoners.

114. A pump has been put up at the new jail well which distributes water to all parts of jail, and garden operations were commenced on the plot of ground near the well. Various structural improvements were undertaken during the year. An enclosure wall for the gallows has been constructed.

115. A revised Jail Manual has been completed, but has not been printed on account of the cost. The Residency Surgeon and Chief Medical Officer suggests that it should be somewhat modified so as to serve for the whole Rajputana Province and the various Darbars be asked to contribute to the cost of printing and publishing. It would be advantageous to codify the jail rules at present in force in Native States, so that they might all be worked on similar lines.

116. The Review by the Commissioner, Ajmer-Merwara, on the strength, classification, health, employment and conduct of prisoners, nature of sentences, jail manufacturers and Expenditure of the Ajmer Jail is given as Appendix B of the Report, together with statements.

117. *Native States*.—The daily average number of prisoners in these jails fell from 4,929·29 in 1903 to 4,729·46 in 1904. There was a considerable decrease in the total number of cases admitted and in the mortality, which is due to the general healthiness of the year and to the able supervision of the medical officers.

118. The following jails were overcrowded practically throughout the year :—

Jaipur Central Jail, Jodhpur, Bharatpur, Alwar and Banswara jails, but in a naturally healthy year the mortality is not so much affected by overcrowding as in years when the general health of the public is indifferent; overcrowding then greatly aggravates the jail mortality and sickness.

119. There were no deaths in the jails at Dholpur, Sirohi, Tonk and Jhalawar. Dholpur, before the new jail was erected, had an unenviable notoriety for its high death-rate. The local authorities naively complained that the Jail Hospital accommodation is excessive for the requirements of the sick, although it is on the usual scale.

120. There was no cholera or other epidemic disease in any of the jails in Rajputana, with the exception of a few cases of suspected pneumonic plague which occurred in the Alwar Jail and which were subsequently proved by microscopical examination of the sputa to be due to infectious pneumonia of a peculiar type.

121. *Jaipur*.—At the Central Jail, Jaipur, more accommodation is still required for prisoners.

122. *Jodhpur*.—The Jodhpur Jail also requires more barracks for under-trial prisoners.

123. *Bikaner*.—The jail is well managed on up-to-date principles. The Carpet Factory is a great success. The management reflects great credit on Captain Kilkelly, I.M.S., and the Native Superintendent, Manak Lal.

124. *Udaipur*.—In this jail 16 deaths occurred, against 19 in the previous year; of these five were due to pneumonia, four to dysentery, three to diarrhoea, two to phthisis, one to meningitis and one to congestion of liver. Most of these deaths took place amongst prisoners who were in a very bad state of health on admission into the jail. The old female ward has been converted into one for juveniles.

125. In Pertabgarh the building of a new jail is in progress.

126. In Banswara a new jail is under construction.

127. *Alwar*.—The high mortality in the jail is almost entirely due to overcrowding. It is expected that two new barracks for 156 prisoners will be taken in hand in the current year. A new office for the Superintendent and his clerks and a new factory for the manufacture of *darries* have been constructed during the year.

128. Steady if slow progress is being made year by year in jail management in the Rajputana States and most of the jails are in good order. The water-supply, the food and the vegetable gardens of the jails are receiving more attention than hitherto.

129. The Residency Surgeon and Chief Medical Officer in Rajputana inspected the jails at Ajmer, Alwar, Bharatpur, Dholpur, Jaipur, Udaipur, Jodhpur, and Bikaner. Everything requiring remedy was pointed out at these inspections and many improvements were sanctioned which will be carried out as far as possible.

130. *Qualified Medical Staff.*—Lieutenant-Colonel H. N. V. Harington, I.M.S., Officiating Residency Surgeon and Chief Medical Officer in Rajputana, was, on return from leave of Lieutenant-Colonel D. H. Mullen, I.M.S., was temporarily transferred to Central India as Residency Surgeon, Indore, and Administrative Medical Officer, Central India, with effect from the 3rd October 1904.

131. Captain Scott-Moncrieff, I.M.S., Agency Surgeon, Haraoti and Tonk, was posted temporarily as Civil Surgeon, Bikaner, from the 15th July to the 18th September 1904.

132. Major H. E. Drake-Brockman, I.M.S., Agency Surgeon, Eastern Rajputana States, was appointed as Officiating Residency Surgeon, Kashmir, from the 17th March 1904.

133. Captain C. Bowle Evans was appointed as Agency Surgeon, Haraoti and Tonk, with effect from the 8th November 1904.

134. *Additional charges.*—The Civil Surgeon, Ajmer, is the Medical Officer, 44th Merwara Infantry; the Agency Surgeon, Haraoti and Tonk, is the Medical Officer, 42nd Deoli Regiment; the Medical Officer, Mewar Bhil Corps, holds collateral charge of the Dungarpur State and superintends the Civil Dispensaries at Kherwara and Kotra, and the Medical Officer of the 43rd Erinpura Regiment inspects the Sheogunge Dispensary close to the Cantonment of Erinpura.

135. *Warrant Officer.*—One Medical Warrant Officer (retired) was on plague duty at Ajmer during the year.

136. *Assistant Surgeons.*—There were two Assistant Surgeons permanently employed in the Ajmer-Merwara district, *viz.*, one at Ajmer and one at Beawar and nine in Native States, of whom five were placed on the "Rajputana unpensionable graded list for service in Native States," under the new scheme, *viz.*, one at Dholpur, one at Kishangarh, one at Jodhpur, one at Jhalrapatan and one at Bharatpur, which last is at present vacant owing to the death of Assistant Surgeon Banwari Lal on the 10th July 1904. This Assistant Surgeon was provisionally employed at the Victoria Hospital at Bharatpur on the 10th June 1904 in place of Assistant Surgeon Abnashi Ram, who was appointed as Medical Adviser to the young Maharaja and Her Highness the Maji Sahiba of Bharatpur and for Palace work generally with effect from the 10th April 1904. In addition four Assistant Surgeons were locally entertained by the Darbars, *viz.*, two at Jaipur, and two at Jodhpur; they are not under this office.

137. Doctor Debb was in temporary charge of the Northern India Salt Revenue Dispensary at Sambhar and Doctor Newland on plague duty at Bandikui throughout the year.

138. In addition to the qualified Hospital Assistants on the British Government List and those transferred for service in Native States there were eight locally entertained Hospital Assistants employed, against 10 in the previous year, of whom two retired on pension in the Jaipur State. There were also four locally entertained Native Doctors by the different States in Rajputana, *viz.*, one in Mewar, one in Marwar, one in Bundi and one in Khushalgarh. These will be gradually replaced by qualified Hospital Assistants.

139. *Military Hospital Assistants.*—There were 11 Military Hospital Assistants employed with the Imperial Service Corps in Rajputana, of whom one took over-charge of the Transport Corps Hospital, Jaipur, on the afternoon of the 11th September 1904.

140. *Lady Doctors.*—Six lady doctors were employed in Rajputana, one at Jodhpur, one at Alwar, one at Tonk, one at Udaipur, one at Bharatpur and one at Kotah, as in 1903, and there were 10 Female Hospital Assistants, against 11 in the previous year.

FEMALE HOSPITALS AND DHAI CLASS FOR WOMEN.

141. *Ajmer*.—A new out-patient department for females and quarters for a female Hospital Assistant were under construction during the year under report, and when and if funds permit a female Hospital Assistant will be appointed to the medical charge of the Women's Wards of the General Hospital, Ajmer.

142. Miss Campbell has been in charge of the Mission Hospital for Women at Ajmer throughout the year. The number of patients treated is shown under Mission Hospitals.

143. *Beawar*.—The female out-patients department of the Beawar Dispensary was closed throughout the year for want of a qualified female Hospital Assistant whose appointment is in the hands of the Beawar Municipality.

144. The returns received from the Women's Hospitals in Native States of Rajputana show on the whole a decrease of work done during the year under report in these institutions which is attributed to the healthiness of the year.

145. *Alwar*.—In the Lady Dufferin Hospital at Alwar, there was a decrease in the number of both in-and out-patients treated during the year under report which is partly due to the advent of plague in the City. There is a marked increase in the number of obstetric cases in 1904 which is attributed to some of the cases attended by the local Dhais under instruction in the hospital being included with the cases occurring in the hospital and attended in their homes by the hospital staff.

146. *Jodhpur*.—There was a decrease in the number of in-patients treated in the Jaswant Hospital for Women which is due to the fact that a female Hospital Assistant, Mrs. Thomas, was separately appointed by the State in the spring of the year under report to attend midwifery cases in the city without fees, and to take charge of the Female Wards of the Hewson Hospital, Jodhpur. This arrangement is not satisfactory and will have to be altered, as the two institutions compete with each other for the treatment of a similar class of patients.

Her Excellency Lady Curzon has very kindly presented £35 to the Jaswant Hospital from funds at her disposal for the purchase of an operating table.

147. *Tonk*.—The Walter Female Hospital at Tonk continues to be popular. A Dhai class was started in October 1904 and the number of pupils is at present three.

148. *Bharatpur*.—Female Hospital Assistant Bibi Rup Kunwar in charge of the Female Hospital has done excellent work and is popular and liked by the people. Miss Hetherington in charge of the obstetrical ward of this institution resigned on the 30th April 1904, and Mrs. Milton, a diplomaed midwife, was appointed as a temporary measure in her place from the 6th August 1904. Twenty-one native midwives receive instruction in midwifery from Mrs. Milton and the duration of each course is two years.

149. *Kotah*.—Miss Jenny Newborough Wynne, L.R.C.P. and S., was in charge of the Victoria Hospital at Kotah up to the 31st October 1904, Miss Helen Buldeo Singh from the 1st to the 9th November 1904, when she was relieved by Lady Doctor Miss Newton. The Dhai class at Kotah was re-opened on the 1st December 1904.

150. *Jhalawar*.—Female Hospital Assistant Miss Annie Williams was in charge of the Crofts Female Dispensary at Chaoni Jhalrapatan up to the 17th July 1904, when this institution was closed owing to reduction in medical expenditure. The Female Hospital Assistant and a portion of the staff were attached to the Chaoni Hospital for the treatment of women there.

151. *Bikaner*.—A purdah hospital building, though sanctioned, has not yet been commenced. The Darbar have promised to build it during the current year, if possible.

152. *Udaipur*.—There was an increase in the number of both in-and out-door patients treated in the Walter Zenana Hospital during the year under report, which is partly due to the appointment of a female Hospital Assistant for three months and partly to prevalence of malarial fever during the first three months of the year. The female Hospital Assistant resigned her appointment on the 16th November 1904.

This hospital is sadly in need of re-organization and new blood. The present medical staff are not a success.

153. There were 15 women admitted to the Dhai class, Ajmer, for training up to 31st December 1904; of these seven obtained Qualification Certificates.

154. The course has now been extended to 10 months and an examination will be held once a year, at the end of a 10 months' course of instruction. Mrs. Harris, the Lady Superintendent in charge, has done much to make the Dhai class a success, and it is hoped that the various Darbars will supply more pupils, as the teaching is excellent.

155. The departure of Lady Martindale is a great loss to Rajputana, as she took the utmost interest in the instruction of Dhais, and she was of the greatest assistance in financing the scheme and making it a success. The Residency Surgeon and Chief Medical Officer has every confidence that her successor will take an equal interest in the subject, and she has kindly promised every assistance in her power.

IMPERIAL SERVICE CORPS.

156. The three Regiments of Cavalry, the Camel Corps, the two Transport, Corps and the two Regiments of Imperial Service Infantry at Alwar, Jodhpur Bikaner, Jaipur and Bharatpur have well-qualified hospitals which have been regularly inspected by the Residency Surgeon and Chief Medical Officer in Rajputana.

LUNATICS.

157. There were 22 lunatics (four females and 18 males) in the Ajmer Central Jail during the year under report; of these eight were transferred to the Lahore Lunatic Asylum, five were released and eight were made over to their friends and relatives; only one lunatic remained in the jail at the close of the year.

158. In Native States 151 lunatics were treated in 1904, of whom 45 were cured, 10 were made over to the custody of their friends and relatives, 24 died and 72 remained under treatment.

159. Sanction has been received from the Government of India for the transfer to Lahore and Agra asylums of dangerous lunatics from Rajputana jails at all times without further reference to head-quarters.

160. There are no lunatic asylums at Sirohi, Kishangarh, Dholpur, Tonk, Bundi, Shahpura, Pertabgarh, and Banswara. Some arrangements for the care and treatment of the insane by these Darbars ought be made. It is suggested that a Central Asylum might be started at Ajmer, supported by the Native States and most of the local asylums abolished. It would cost the States little more than the present arrangements and the insane would be scientifically treated and cared for by an experienced staff. The building known as the Veterinary College could be utilized as an asylum at small cost for necessary alterations.

161. The date of submission of the annual reports from the Executive Medical Officers is unnecessarily late and has caused much inconvenience and delay in the preparation of this report.

D. H. MULLEN, M. D., *Lieut.-Col., I.M.S.,*
Residency Surgeon and Chief Medical
Officer in Rajputana.

APPENDIX A.

Rules for the improvement of sanitation in villages in Ajmer-Merwara.

In exercise of the powers conferred by sections 3 and 4 of the Ajmer-Village Sanitation Regulation (IV of 1895), and with the previous sanction of the Governor-General in Council, the Chief Commissioner is pleased to make the following rules for the improvement of sanitation in villages in Ajmer-Merwara.

1. With the previous approval of the Commissioner, the Assistant Commissioner may by order in writing,—

- (i) prohibit the performance of offices of nature in any specified area within or immediately adjoining the inhabited site of any village, if such prohibition is, in his opinion, necessary for the protection of the water-supply or for the comfort of the majority of the inhabitants;
- (ii) direct that any well shall be surrounded by a parapet wall no less than $2\frac{1}{2}$ feet high;
- (iii) prohibit bathing or washing upon the parapet of any well used for drinking purposes, or the tethering of animals, or the deposit of filth or refuse, or the performance of offices of nature within such distance from the well not exceeding 15 feet as he may specify;
- (iv) direct that the carcasses of all animals which die within the limit of a village shall be removed to places, which may be fixed by him, at a distance of not less than 300 yards from the inhabited portion of the village;
- (v) direct that all prickly pear or other undergrowth, in or near a village, shall be cleared away wherever he may consider this desirable on sanitary grounds;
- (vi) direct that in the case of Khalsa villages, the cost of demarcating an area, or building a parapet wall, under rules 1 (i) and 2, shall be borne by village Shamlat funds, or, in the case of istimrari and jagir villages, by the istimrardar or jagirdar concerned.

2. Every order made under the preceding rules shall be in writing, and a copy in the vernacular shall be posted in the Hatai of the village.

3. The village headman shall obey all orders issued under these rules and, as far as possible, enforce the observance of the rules by other persons. He shall report breaches of the rules to the Assistant Commissioner or other officer when he inspects the village as required by Rule (vi).

4. (i) Any person who (a) acts in contravention of an order issued under these rules; (b) defiles the water in a well, and
- (ii) any village headman who neglects any of the duties devolving on him under Rule 3, shall, on conviction before a Magistrate, be liable to a fine not exceeding ten rupees.

Persons in charge of infants or of sick or infirm persons shall be held responsible for preventing any public nuisance being committed by or arising in connection with such infant or persons.

5. No complaint against any persons for breach of these rules, whether preferred by a public servant or by a private person, shall be entertained by a Magistrate, except on an occasion of his actually visiting the village, or on the report of an officer not invested with magisterial powers made after inspection of the village under Rule (vi).

6. The Tahsildar or Naib Tahsildar, as the case may be, shall inspect each village in respect of which any order has been issued under these rules at least once in every three months; and the Assistant Commissioner shall inspect the same at least once a year.

APPENDIX B.

AJMER JAIL, 1904.

Major H. R. Woolbert, M.B., I. M.S., held charge of the office of Superintendent of the Central Jail at Ajmer throughout the year 1904.

2. The year opened with a jail population of 383, and ended with one of 361. The total number of admissions was 1,037, as compared with 1,234, in 1903. The daily average strength fell from 420·16 in 1903 to 349·40.

3. In the course of the year, 23 convicts were released on appeal, 362 on expiry of sentence, 16 on payment of fine and 114 under the Remission Rules; while 9 convicts were transferred to other Jails, and 2 were executed and 2 died. 351 convicts remained in the jail at the close of the year.

4. Of 530 under-trial prisoners, 180 were released, 296 were convicted and sentenced, 44 were transferred, and 10 remained in the jail at the close of the year.

5. All the 11 Civil prisoners admitted during the year 1904 were released and discharged, and none remained under detention at the close of the year.

6. Of 509 convicts admitted during the year, 3 were Christians (1 European and 2 natives) 154 Muhammadans, and 352 Hindus.

By age classification, 30 were under 16 years of age, 429 between 16 and 40, 47 between 40 and 60 and 3 above 60 years.

Of the 470 male prisoners 142 were agriculturists, 162 labourers, 45 shopkeepers and traders, 54 domestic servants, 44 Government servants, 1 miscellaneous occupation, and 22 were without occupation. Of the 39 female convicts, 17 were married, 3 unmarried 17 were widows, and 2 were prostitutes.

7. Of the 509 convicts admitted during the year, 46 were sentenced to simple and 443 to rigorous imprisonment. In the case of 13 convicts, solitary confinement was awarded in addition to rigorous imprisonment, while 7 were sentenced to rigorous imprisonment and to whipping.

The number of convicts sentenced to terms of imprisonment not exceeding one month was 190; 97 were sentenced to imprisonment exceeding one month but not exceeding three months; 70 to terms of imprisonment above three months, but not exceeding six months; 55 to imprisonment above six months but not exceeding one year; 48 to imprisonment above one year, but not exceeding two years; 19 to imprisonment exceeding 2 years, but not exceeding five years; 19 to imprisonment above five years, but not exceeding ten years; 1 to imprisonment exceeding 10 years; 7 were sentenced to transportation for life and 3 were sentenced to death.

8. The total number of previously convicted persons admitted during the year was 103 as compared with 170 in 1903. The ratio per cent. of the number having previous convictions to the total admissions was 20·24, as compared with 27·78 in the preceding year.

9. The daily average number of convicts sentenced to labour on working days was 290·42. Of these 176·54 were employed on Jail Manufactures, 87·90 were engaged on prison duties: 17·61 were employed as prison officers: 2·06 were exempted from labour on account of their health, and 6·31 were sick.

10. The number of jail offences rose from 189 in 1903 to 229 in 1904. All these offences related to breaches of jail discipline. The punishments inflicted are noted below:—

Solitary confinement	.	.	.	.	.	.	.	.	6
Corporal punishment	.	.	.	.	.	.	.	.	4
Other punishments	.	.	.	.	.	.	.	.	219

The prisoner who escaped from custody in 1899 is still at large. There were no escape during the year.

11. The health of the prisoners was remarkably good during the year. The number of admissions into the Jail Hospital was 166, as against 164 in 1903. The number of deaths was

2, as compared with 3 in the preceding year.

12 The number of Juvenile offenders confined in the Ajmer Jail was 37, of whom 30 were released during the year under report, and only 7 remained in the jail at the close of the year. There were 9 prison offences, as against 9 during the preceding year, but they were all of not a very serious nature.

No Juvenile offender was sent to the Reformatory School at Chunar during the year under report, but the attention of the subordinate Courts has been invited to the fact that the rules issued under the Reformatory Act should be followed strictly in future.

13. The cash profit from the Jail Manufactures amounted to Rs. 3,769, as compared with Rs. 3,467 in 1903. The cash earnings per head of those sentenced to labour amounted to Rs. 12-15-7, as compared with Rs. 9-15-10 in 1903.

14. The expenditure incurred in guarding and maintaining prisoners in 1904 amounted to Rs. 28,249, as compared with Rs. 29,404 in 1903. This sum includes the expenditure incurred by Magistrates (Rs. 625) on guarding and maintaining under-trial prisoners, and by the Executive Engineer, Ajmer Provincial Division (Rs. 8,469) on building and repairs. The average cost per prisoner rose from Rs. 69-15-11 to Rs. 80-10-9.

15. The net cost (including the cost of under-trial prisoners incurred by Magistrates), of the Jail to Government was Rs. 27,015 as compared with Rs. 26,569 in the preceding year.

16. The Inspector General of Jails for the United Provinces of Agra and Oudh inspected the jail during the year under report and found everything satisfactory.

Plans and estimates have been prepared for increased accommodation in the jail and for the construction of cubicles.

P. J. MELVILL, *Lieut.-Col.*,
Commissioner, Ajmer-Merwara.

Male .	1,18,933	324.95	354	470*	824	8	...	832	3	6	23	330	16	...	...	113	2	2	337			
Female .	2,325	6.35	8	39†	47	...	...	47	...	...	...	32	...	...	...	1	...	...	14			
TOTAL	1,21,258	331.30	362	509	871	8	...	879	3	6	23	362	16	...	...	114	2	2	351			

NOTE. 1.—This and the other statements numbered 1 to 7 only convicted prisoners are to be included.
2.—Debtors and others detained for default of Government revenue will appear in No. 8.
3.—The "Total," column 6, is obtained by adding together the totals of columns 4 and 5, and represents with sufficient accuracy the number of different individuals who have been in prison during the month.
4.—The "Total population," column 8, is the sum of columns 6 plus 7, and necessarily includes many who are counted more than once.
5.—The "Daily average number," column 3, is obtained by adding together the number presented on each day of the month, vide column 2, and dividing the whole by the number of days in the month.
6.—When prisoners are transferred from one Jail to another on their way to undergo transportation beyond seas, they should be entered by the transferring Jail in column 9 B, and by the Jail which received them, they should be entered in column 7 B. When prisoners sentenced to transportation beyond seas are despatched from any Jail, so that they will leave the Province without passing through any other Jail in it they should be entered in column 11.
It will be observed that transportation applies only to those prisoners sent beyond seas.—Transportation to a Central Prison is regarded merely as a transfer.
7.—When the gangs are employed extramurally under the orders of Government No. 1632—43, dated 28th October 1869, they should be considered as forming a separate Jail, and the name of the Jail that is, of the place where they are employed, should be entered in italics in each statement.

AJMER JAIL;
The 16th February 1905.

H. R. WOOLBERT, Major, M.B., I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. 2.—*Shewing the religion, age and previous occupation of the convicts in Jail at Ajmer for the year 1904.*

[illegible]

NOTE.—It is of importance that the particulars given in this, and also in No. 3, should not include the same individual more than once, and hence all transfers should be omitted. The totals should correspond with the number in column 5, Statement I: "Imprisoned during the month." But they should do so with the "Total" Column 6, for January only, as the number remaining on the last day of the previous year (31st December) is to be included in that month.

STATEMENT No. III.—Statement showing the convicts admitted into the Jail at Aymer during the year 1904, and those remaining on the 31st December of that year, according to the nature and length of sentence.

The female column should be filled in *in red ink*.

1		2		3																									
NATURE OF IMPRISONMENT OF THOSE ADMITTED.		NUMBERS ACCORDING TO LENGTH OF SENTENCE.																											
		A		B		C		D		E		F		G		H		I				J		TOTAL.

(A) Prisoners admitted during the year should only be shown here, *vide* column 5 of monthly statement No. 1, from January to December.

* Prisoners captured during the year should only be shown as having been captured on the date of capture. Prisoners who escaped and were recaptured during the year 1994 should not be shown in this and Annual Statement No. IV. ** Classes A, B, C and D should be amalgamated for this total. Prisoners who escaped and were recaptured during the year 1994 should not be shown in this and Annual Statement No. IV.

(a) This figure should tally with those shown in column 16 of Monthly Return No. 1 for December.

ATMER JAIL OFFICE:

The 16th February 1905.

H. B. WOOLBERT, Major, M.B., I.M.S.,

Superintendent, Central Jail, Ajmer.

STATEMENT No. IV.—Statement showing the convicts admitted into the Ajmer Jail during the year 1904 who had been previously convicted.

SEX.	1	2				3	4	
	Number admitted during the year.	NUMBER PREVIOUSLY CONVICTED.				Ratio of column 2 D to column I.	JUVENILE PRISONERS UNDER 16 YEARS OF AGE (SECTION 399 OF THE CRIMINAL PROCEDURE CODE.	
		A	B	C	D		A	B
		Once.	Twice.	More than twice.	TOTAL.		Number admitted during the year.	Number previously convicted.
Male	470	40	21	37	98	20·85	27	3
Female	39	5	...	...	5	12·82	3	1
TOTAL	509(a)	45	21	37	103	20·24	30 (b)	4

(a) NOTE.—In column 1 will be entered the prisoners admitted during the year, vide column 5 of Monthly Statement No. 1, from January to December 1904. Numbers in column 2 will be inclusive of the number in column 4.
(b) The figures in column 4 A should tally with those shown in column 3A of Monthly Return No. II for the year.

STATEMENT No. V.—Statement showing the escapes and recaptures of convicts in the Central Jail at Ajmer for the year 1904.

1	2			3	4			5			6			
Remaining uncaptured on the last day of the past year.	ESCAPED DURING THE YEAR.			GRAND TOTAL.	RECAPTURED DURING THE YEAR.			REMAINING UNCAPTURED.			UNEXPIRED PORTION OF SENTENCE OF THOSE WHO ESCAPED DURING THE YEAR.			
	A	B	C		A	B	C	A	B	C	A	B	C	D
	From inside the Jail.	From outside the Jail.	TOTAL.		Those who escaped in previous years.	Those who escaped during the present year.	TOTAL.	Of previous years.	Of present years.	TOTAL.	Under 1 year.	Above 1 and under 3 years.	Above 3 and under 7 years.	Above 7 years.
1	...	...	...	1	...	...	...	1	...	1	...	...	...	...

In column 1, and also in column 5 A, only those should be included who have escaped during the previous seven years. In 4 A, if any are entered who have been at large for upwards of seven years, a special note should be added. A footnote should show how many have been struck off, each having escaped more than seven years previously.

STATEMENT No. VI.—Showing the offences committed by the convicts, and the punishments inflicted on them in the Jail of Ajmer during the year 1904.

1	2	3	4			5						6		
SEX.	Average number of convicts.	Criminal offences.*	BREACHES OF JAIL RULES.			PUNISHMENT INFLICTED.						Ratio of column 5 C to column 2.		
			Smoking or having possession of forbidden articles.	Offences relating to work.	Other offences against prison discipline.	A	B.—BY JAIL OFFICERS.						Total punishment.	
							By Criminal Court.	Solitary confinement.	Solitary confinement, with reduced diet.	Reduced diet.	Corporal punishment.			Other punishment.
Male	324·95	...	33	78	117	...	6	...	...	4	218	228	70·16	
Female	6·35	...	...	...	1	...	...	...	...	...	1	1	15·75	
TOTAL	331·30	...	33	78	118	...	6	...	...	4	219	229	69·12	

The nature of the Criminal offences committed should be noted on the back of this return.
* In contradistinction to offences against prison discipline.

H. R. WOOLBERT, Major, M.B., I.M.S.,
Superintendent, Central Jail, Ajmer.

AJMER JAIL OFFICE;
The 15th February 1905.

STATEMENT NO. VIII.—Statement showing the employment of convicts as Prison Officers in the Central Jail at Ajmer for the year 1904.

1	2	3	4	5	6	7
SEX.	Average No. of convicts.	Average number employed as Prison officers.	Ratio of column 3 to column 2.	Total number employed as Prison officers.	Number of reductions or other punishments.	REMARKS.
Male . . .	324.95	17.61	5.42	19	11	No. Convict Warders . . . 3 Do. Overseers . . . 14 Do. Writers . . . 1 Do. Mohurrirs . . . 1 Total . . . 19
Female . . .	6.35	...	...	...	...	
TOTAL .	331.30	17.61(c)	5.32	19(a)	11(b)	

(a) The nature of the offices held by convicts should be given in column of remarks.
(b) Detail of the nature of punishments ordered should be given as directed in paragraph 19 of the Government Review on the Jail Reports for 1884.
(c) Column 3 should tally with column 7 B of Return No. XII. Column 5 should show the total number of convicts employed as Warders, etc., and not merely the total sanctioned number of situations.

STATEMENT NO. IX.—Statement showing the Scales of Diet in force in the Ajmer Central Jail during the year 1904.

1	2	3	4
Diet Scales of Labouring Prisoners.	Diet scale of non-labouring prisoners.	Punishment diet Scale.	Note of any change effected in diet scales during the year.
Atta of Gram 1/3 } " Barley 2/3 } 12 Chittaks daily. " Wheat 1/3 } Dál alternately . . . 2 Chittaks. Vegetables alternately 8 " Oil with vegetables 4/25 " Salt " " 1/4 " " " Dál . . 1/6 " Chillies with vegetables 2 M. " " Dál . 1 " Fuel . . . 4 Chittaks.	Atta 8 Chittaks on Sundays and Mondays and 10 Chittaks on other days. Other articles are same as for labouring prisoners.	Labouring prisoners 8 Chittaks atta, with the usual quantity of salt; the period of this diet is ninety-six consecutive hours.	Prisoners on the Mills were given 14 Chittaks of atta instead of 12 Chittaks, vide paragraph 7 of letter No. 742 II, dated 20th July 1899, from the First Assistant to the Honourable the Agent to the Governor-General and Chief Commissioner, Ajmer-Merwara.

NOTE.—A complete statement of all the Diet Scales in use for labouring prisoners according to length of sentence should be given in column 1, with details as to the articles used, and the variations in different days of the week.

H. R. WOOLBERT, Major, M.B., I.M.S.,
Superintendent, Central Jail, Ajmer.

AJMER JAIL OFFICE;
The 16th February 1905.

STATEMENT No. X. (FINANCIAL).—Showing the expenditure in guarding and maintaining the prisoners in the Central Jail at Ajmer during the year 1904, excluding the cost of building new jails, of Additions, Alterations, or Repairs.

1	2	3				4	5	6		7			8		9		10	11	12		
Serial No.	Name of Jail.	AVERAGE NUMBER OF PRISONERS.				RATIONS.		ESTABLISHMENT.		MERWARA BATTALION.		HOSPITAL CHARGES.			CLOTHING.		CONTINGENCIES.		Grand Total expended.	Cost per head of average strength.	Serial number.
		Convicts.	Undertrial.	Civil.	Total.	Cost per head of average strength excluding civil prisoners.	Total.	Total.	Cost per head of average strength.	Cost per head of average strength.	Cost per head of average strength.	Cost per head of average strength.	Cost per head of average strength.	Cost per head of average strength.	Cost per head of average strength.	Cost per head of average strength.	Total cost.	Cost per head of average strength.			
1	Central Jail, Ajmer Add for District Lockups.	331-30	17-86	74	349-40	Rs 19 0 3	Rs 9,253	Rs 26 7 9	Rs 0 14 11	Rs 48 9 4	Rs 1,350	Rs 3 13 11	Rs 4 9 1	Rs 1,506	Rs 54 13 2	Rs 19,155 625	Rs 54 13 2	1			
	GRAND TOTAL	..	..	..	..	..	..	..	..	..	..	..	..	..	..	19,780	..	..			

When prisoners of different classes are confined in the same Jails, the expenditure on establishment and other items with which all are concerned should be divided over all. The cost per head under any items of expenditure is to be calculated on prisoners actually concerned in it or contributing to it, and not otherwise. Hospital charges (col. 7) should include rations and also the cost of medicines supplied from the Bazar and the Medical Store Depot. In this series (Financial) annas and pies are only to be shown where there are columns for them.

AJMER JAIL.

STATEMENT No. XII.—Showing the employment of convicts in the Jail at Ajmer during the year 1904.

1	2	3	4	5	6	7										8	9		
						AVERAGE NUMBER EMPLOYED ON WORKING DAYS.

AJMER JAIL OFFICE ;
The 16th February 1905.

H. R. WOOLBERT, Major, M.B., I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. A.—Showing the nature and amount of accommodation for each class of Prisoners in the Ajmer Central Jail at the close of the year 1904.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19
NUMBER OF PRISONERS WHO COULD BE ACCOMMODATED ON THE 31st DECEMBER 1904 IN THE PART OF THE JAIL DEVOTED TO:—																		
DESCRIPTION OF ACCOMMODATION.	HOSPITAL.		OBSERVATION CELLS.		CIVIL PRISONERS.		UNDER TRIAL.		EUROPEANS.		Juvenile convicts.	Female convicts.	Male convicts.	GRAND TOTAL.	Superficial area as per prisoner in square yards in the enclosure (ward and workshop) to which the prisoners are ordinarily confined.	By Jail Department.	By Public Works Department.	REMARKS.
	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.								
1. Cells	...	...	...	...	...	...	...	...	...	...	...	2	12	14	72 yards	Rs a. p.	Rs a. p.	
2. Barracks with separate sleeping accommodation	26	...	...	...	...	...	30	...	6	...	38	32	365	497				
Do. without do.	...	...	...	...	...	...	...	...	...	...	...	...	45	45				
TOTAL	26	...	...	...	...	...	30	...	6	...	38	34	422	556		...	8,468 11 3	
4. Total average population	6.68	.08	...	...	...	.68	15.71	1.25	.17	...	7.25	5.57	312.00	349.40				

NOTE.—1. When female, Civil and Under trial convicts are placed in the part of the Jail devoted to female convicts, columns 7 and 9 will be blank. In columns 2 and 3 enter the number of beds that the Hospital is intended to hold.
2. In column 19 draw attention to defects in the Jail, and to alterations made during the year, also explain how prisoners were accommodated when there was overcrowding.
3. Total average population of sick prisoners who were accommodated in Hospital should be shown in columns 2 and 3.
4. Here state the total accommodation in square yards of the Jail, calculated at 86 square feet of superficial area and 648 cubic feet of capacity per prisoner in association.
5. To obtain column 16 divide the figures shown under note 4 by the number in column 15.
6. The capacity should be shown according to the number of births, or according to measurement, whichever is found to be larger than the other.

STATEMENT No. B.—Showing the condition of the Prisoners discharged from the Central Jail at Ajmer during the year 1904.

1	2	3				4				REMARKS.	
Number discharged during the year.	Number who had neither lost nor gained weight in Jail.	NUMBER WHO HAD GAINED WEIGHT.				NUMBER WHO HAD LOST WEIGHT.					
		A	B	C	D	A	B	C	D		
		Up to 1 lb.	From 1 to 5 lbs.	From 5 to 10 lbs.	Over 10 lbs.	Up to 1 lb.	From 1 to 5 lbs.	From 5 to 10 lbs.	Over 10 lbs.

CALCUTTA :
OFFICE OF THE SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA.
1906.

CALCUTTA:
GOVERNMENT OF INDIA CENTRAL PRINTING OFFICE,
8, HASTINGS STREET.

No. 326 of 1906.

FROM

THE HON'BLE LIEUTENANT-COLONEL C. HERBERT, I.A.,
Officiating Agent to the Governor-General, Rajputana,

TO

THE SECRETARY TO THE GOVERNMENT OF INDIA,
FOREIGN DEPARTMENT.

Dated Abu, the 1st September 1906.

SIR,

WITH reference to the correspondence ending with the letter from the Government of India in the Foreign Department, No. 2946-I. A., dated the 18th July 1906, I have the honour to forward the Annual Report on Sanitation, Dispensaries and Jails in Rajputana for the year 1905, and on Vaccination for 1905-1906, prepared by Lieutenant-Colonel D. ff. Mullen, I.M.S., Residency Surgeon and Chief Medical Officer in Rajputana.

2. The steps already taken to improve the defective sanitation of Ajmer City have been reported in my predecessor's letter No. 668, dated the 20th June 1906. The Municipality have since applied for the services of an expert Sanitary Engineer to advise them regarding a thorough scheme of reform, and it is probable that a reference to the Government of India will shortly be made on the subject.

3. A severe epidemic of Plague visited the province, and eleven States and Ajmer-Merwara were affected. Bharatpur suffered most severely, and nearly half the total deaths, which amounted to 22,263, occurred in that State. It is satisfactory to notice that the people show a readiness to adopt of their own accord the useful measures of segregation and evacuation.

4. Apart from plague, the year, in spite of the prevalence of scarcity and famine in many parts of the province, was on the whole healthy, and the figures relating to fevers, eye diseases and ulcers show a large decrease compared with those of 1904.

5. It is feared that the registration of vital statistics in the Native States is still very imperfect, but opportunities will be taken as they offer to impress the importance of reform.

6. Improvements are gradually being effected in the Jails and Hospitals, but the embarrassed condition of the finances in many States prevents rapid progress in these directions.

I have the honour to be,

SIR,

Your most obedient Servant,

C. HERBERT, *Lieut-Col.*,

*Offg. Agent to the Governor-General
Rajputana.*

REPORT
ON
**SANITATION, DISPENSARIES, AND JAILS IN
RAJPUTANA FOR 1905,**

AND ON
VACCINATION FOR THE YEAR 1905-1906.

SECTION I.—SANITATION AND VACCINATION.

METEOROLOGY AND ITS RELATION TO FOOD-SUPPLY.

1. During the year under report 7·11 inches of rain were registered in
Rainfall of Ajmer-Merwara. Ajmer as against 16·80 inches in the pre-
vious year, the average of previous six
years was 16·90 inches.
2. The rainfall during the monsoon season was only 6·11 inches or 7·24
inches less than last year.
3. A statement is appended showing the average annual rainfall in each
State.
4. In most of the Native States of Rajputana the rainfall was scanty.
In Jaipur, Eastern Rajputana States, Alwar, Kishangarh, Tonk, Shahpura,
Marwar, Bundi, Kotah, Jhalawar and Mewar the partial failure of the monsoon
produced famine or scarcity.
5. Most of the tanks throughout the country are dry and the wells un-
usually low and containing brackish water; so good drinking water is in most
places unprocurable. In Jaipur, Eastern Rajputana States, Alwar, Kishan-
garh and Marwar scarcity of fodder and grass prevailed owing to failure of
rain.

VITAL STATISTICS, BIRTHS AND DEATHS.

6. According to the birth return for 1905, the number of births registered
Births in Ajmer-Merwara. shows an increase of 1,805 as compared
with the previous year, which is partly
attributed to improved registration and healthiness of the year.
7. Of the total births registered 9,564 were males and 8,238 females, and
the birth-rate was 37·32 per mille of population against 33·54 per mille in
1904. The percentage of male to female births was 116·10 against 114·21 in
the previous year. The birth-rate exceeded the death-rate in 18 Circles out of
the 23 Circles of registration against 20 in 1904.
8. In this division there were 16,332 deaths registered during the year
Deaths in Ajmer-Merwara. against 13,149 in the previous year,
an increase of 3,183 which is mainly
attributed to the outbreak of plague in the district which accounted for 2,480
mortalities. The total number of deaths from respiratory diseases was 561
against 240 in 1904, an increase of 321 which is due to the intense cold in winter.
9. The mortality from small-pox was 277 against 129 in the previous year,
an increase of 148. It appeared in the cold season and the highest mortality
was recorded in February.
10. No cases of cholera were reported during the year.

11. In accordance with the Government of India, Home Department, letter No. 1647-1654 (Medical), dated the 27th September 1905, Annual Sanitary Statements XI and XII showing the monthly incidence of deaths from respiratory diseases and plague respectively are appended to the Annual Sanitary Report for 1905.

VITAL STATISTICS OF AJMER CITY AND SUBURBS.

Ajmer City Population	52,074
Ajmer Suburbs Population	21,765
GRAND TOTAL	<u>73,839</u>

12. According to the Vital Statistics for 1905-06, there were 1,729 births and 1,005 deaths of children under a year old, leaving 724 children available for vaccination.

13. Similarly in 1904-05 there were 1,801 births and 765 deaths of children under a year old, leaving a balance of 1,036 children available for vaccination. On the other hand there were 2,783 children under one year old vaccinated in 1905-06 and 2,286 children under one year old vaccinated in 1904-05.

Thus the two years under reference show 1,760 children under one year old available for vaccination and at the same time 5,069 children under a year old are shown as vaccinated.

14. This anomalous state of affairs is due in part to defective registration of births and in part to the fact that many married women go to their homes elsewhere, and to different Native States, for their confinements and return afterwards with a baby who has thus escaped registration. The registered birth-rate for the two years under reference was only 24·73 and 23·74, respectively, which is obviously below the real birth-rate.

15. The Civil Surgeon calls attention to the heavy mortality from phthisis, *viz.*, 375 deaths and to the number of phthisical cases attending the General Hospital for treatment.

16. He attributes the cause to impure air, the result of overcrowding in narrow ill-ventilated streets and lanes which scarcely let the sunlight enter. It is noticeable, however, that the city mortality, *viz.*, 37·77 compares very favourably with that of the suburbs where, although, there is more room the mortality was 62·57, this apparently high-rate may be due in part to under-estimating the suburban population and also to defective water-supply.

17. There were 3,329 deaths reported as against 3,125 last year, an increase of 204.

18. The death-rate rose from 42·32 last year to 45·08 in the present year, the increase was due principally to plague which accounted for 173 deaths.

19. The mortality statements of Ajmer City and Suburbs are most reliable, as every death is personally investigated and reported by the Assistant Health Officer who has been especially entertained for this work alone.

20. Ajmer was visited during the cold weather by Lieutenant-Colonel J. T. W. Leslie, M.B., I.M.S., Sanitary Commissioner, with the Government of India; he inspected the water-supply and sanitation of Ajmer City and Suburbs.

TABLE I—Births and Deaths in Native States.

NAME.	Population according to Census of 1901.	BIRTHS.				DEATHS.											Ratio per 1,000 of population.
		Male.	Female.	Total.	Ratio per 1,000 of population.	Cholera.	Small-pox.	Plague.	Fever.	Dysentery and Diarrhoea.	Respiratory diseases.	Injuries.	Snake-bite.	All others.	Total.

NOTE.—The information required for this table cannot be obtained in full from Jaisalmer. The total, therefore, of column 16 does not agree with the totals of nine preceding columns.

21. Registration has been attempted in 20 Native States against 18 in the previous year. Even in the capital States. towns of the most advanced Native States the collection of vital statistics is not properly supervised and checked. The remedy for this is to appoint a special officer for the purpose under the direct control of the Agency and Residency Surgeons. It would have been desirable to impress on the Durbars and Political Officers the advisability and advantages of correct statistics which would ensure the early detection of epidemic diseases, etc.

CHOLERA.

22. There were no cases of cholera reported in Ajmer-Merwara during the year under report.
Ajmer-Merwara.
23. As regards cholera in Native States of Rajputana the year may be considered a non-cholera year, only four cases having occurred in Tonk City, three of which proved fatal. Three of the four cases occurred in March and one in May.
Native States.
24. The usual precautionary and preventive measures were taken.

SANITATION.

25. *Ajmer Division.*—The water from the Foy Sagar is freely used for drinking purposes both in the City and Suburbs. The matter regarding improvement in the quality of the water-supply at Ajmer is being investigated by the Executive Engineer, Ajmer Provincial Division.

26. Owing to the scarcity of rainfall the Foy Sagar and Ana Sagar lakes did not fill. The latter quite dried up by the end of November, its bed being utilized for growing corn crops.

27. The sanitary tramway has worked satisfactorily at Ajmer during the year and the trenching grounds have been well looked after.

28. The Municipality have established the principle that new balconies and new private privies are not to be allowed in very narrow streets where the former would interfere with free ventilation and the private privies further pollute the stagnant air.

29. The question regarding the substitution of open saucer drains for covered drains in the principal streets and bazaars in the City of Ajmer is still under the consideration of the Municipality.

30. Overcrowding and faulty conservancy are the main causes of insanitation in Ajmer. Tubercular disease is very common and on the increase.

31. Rules for the improvement of village sanitation which have been introduced in the marginally-noted villages worked fairly well. The number of persons prosecuted under the rules were 102 in Ajmer and 56 in Merwara.
Ajmer—Ramsar, Srinagar, Junia, Harmara, Pushkar and Jethana.
Beawar—Beawar, Jawaja, Todgarh, Bhim and Barar.

32. The huts in the plague observation camp near the railway station at Ajmer are kept in good repair.

33. The Municipal Committee continue to supervise sanitation in Beawar. For want of funds the question of open saucer drains instead of covered drains in the streets and bazaar of Beawar Town is still in abeyance.

34. Endeavours are being made to provide a wholesome permanent water-supply for the town. A trial well in the rear of the Jalia tank is being sunk, but the quality of the water that has been reached, has not yet been ascertained.

35. *Native States.*—In several of the Native States the medical officers do not control the work of sanitation and registration of vital statistics of the head-quarter stations to which they are accredited and these important matters are entirely in the hands of native officials with unsatisfactory results. Where there is a Municipality the Agency Surgeon should be Chairman and take an active interest in its working. At present Alwar and Bikaner are the only places where this is done.

36. *Jodhpur.*—Owing to the failure of rains during the year under report there was great scarcity of water in the city of Jodhpur. The Gulab Sagar tank which is in the heart of the city and on which the inhabitants largely depend and other tanks were dry and all the wells were low. Arrangements were however made for a supply of drinking water through pipes from the wells at Mandaur into the Gulab Sagar tank. Fortunately good rain fell in January and February 1906, and further anxiety as to the water-supply has been relieved; there appears to be now sufficient water in the tanks to last with careful supervision till the commencement of the monsoon.

37. The conservancy arrangements of Jodhpur City are supervised and controlled by local durbar officials connected with the Municipality. There is

no expert sanitary officer on the Municipal Committee and the Residency Surgeon, Western Rajputana States, suggests that the Assistant Surgeon in charge of the Hewson Hospital at Jodhpur who is sanitary adviser to the Municipality should be a member of the Committee and have a large control in sanitary matters. In all cases of difficulty he can consult the Residency Surgeon.

38. *Bharatpur*.—The Agency Surgeon, Eastern Rajputana States, reports that the repeated suggestion to start some sort of sanitary Boards in the larger towns in the Bharatpur State has at last been sanctioned by the Durbar, and it is expected will soon be brought into being.

39. The services of Assistant Surgeon, Kali Charan Dube, who served in the dual capacity of Chairman and Health Officer, have been dispensed with from 3rd June 1905. Pandit Ganpat Lal, Nazim of the Bharatpur Circle, is now the *ex-officio* Chairman of the Municipality.

40. The Assistant Engineer and the Assistant Surgeon have been appointed *ex-officio* members, and the Agency Surgeon and the State Engineer as Advisers in their professional lines, which is an improvement on the old system.

41. At the request of the State Mr. C. A. White, M.I.C.E., Superintending Engineer, Indian Public Works Department, visited Bharatpur in the month of September 1905 to prepare a report on a drainage scheme for the city and its suburbs. His report is at hand now and shows in a striking manner the necessity of drastic reforms in the sanitary state of the city.

42. The year has been a particularly dry one, sub-soil water having been kept at a lower level.

43. *Banswara*.—The conservancy arrangement in Banswara City is under a Municipal Committee since 1904. It has now been receiving closer attention from the Assistant Resident and the State is contributing R2,004 per annum towards its up-keep. The public who were formerly apathetic about sanitation have since the outbreak of plague begun to take more interest in the subject. Since March there has been scarcity in the water-supply.

44. Owing to famine the tours of most of the Agency Surgeons were curtailed. However the necessity for improvement in village sanitation and its effects on the public health should be constantly urged upon Durbar officials, and the Residency and Agency Surgeons lose no opportunity while on tour in impressing on the villagers the advantages to health which accrue from a pure water-supply, the removal of stagnant water by thorough surface drainage and good hygienic surroundings. Sanitation ought to be taught in all schools in Native States and made a subject of examination.

VACCINATION.

STATEMENT I.

45. The number of primary vaccinations in Ajmer-Merwara rose from 14,210 in 1904-05 to 14,510 in 1905-06,

Ajmer-Merwara.

an increase of 300 which is partly due to

the fact that all children present, *viz.*, 4,162 in the famine camps and works in the Ajmer and Merwara districts were vaccinated and partly to the increased birth-rate. The percentage of primary and secondary successful cases fell from 99.08 and 86.28 to 95.50 and 81.65 respectively in 1905-06, this decrease is chiefly attributed to the fact that the results could not be verified in the case of those who emigrated soon after being vaccinated on account of famine.

46. Of the successful primary operations 11,303 were performed on infants of one year of age and under, 2,726 on children over one year but under six years of age and 234 on children over six years of age.

47. Each vaccinator performed 996 vaccination operations in 1905-06 against 980 in the previous year, and the number of vaccinators employed was 15, the same as in 1904-05, and there was one Native Superintendent.

48. During 1905-06, 30.63 per mille of the population of Ajmer-Merwara were successfully vaccinated against 29.52 per mille in the previous year and although it is satisfactory to be able to note an increase in this direction, there is still much room for improvement.

49. The Civil Surgeon, Ajmer, inspected 923 vaccinated children, the Famine Medical Officer 646 vaccinations and the Native Superintendent inspected 273 villages and saw 9,369 against 8,143 in the previous year, an increase of 1,226.

50. *Expenditure*.—The total expenditure amounted to R2,849-1-7 as against R2,659-2-11 in 1904-05 and was distributed as below :—

	R	a.	p.
From Imperial Funds	1,060	5	1
From Local Funds	807	14	3
From Municipalities	980	14	3
TOTAL	2,849	1	7

This increase is due to the fact that the Beawar Municipality paid R96 for a moharrir and R60 for a chaprasi. The average cost of each successful vaccination was therefore 37 pies against 35 pies in the previous year.

51. In Native States primary vaccinations fell from 285,630 in 1904-05 to 279,357 in the year under report and 97·34 of these were successful against 99·65 in 1904-05. This decrease is due to the following points :—

- (a) The emigration of people of certain pergunahs of Western Rajputana States where the distress of famine was felt on account of absence of rain.
- (b) Prevalence of plague and famine in the Eastern Rajputana States, Alwar and Jaipur as the people left their villages to seek for work.

But re-vaccination rose from 998 in 1904-05 to 3,721 in 1905-06. 69·04 per cent. of these were successful.

52. The average number of vaccinations performed by each vaccinator fell from 1,686 to 1,685 in 1905-06 and the work of each man varied in different States from 3,776 in Kotah to 266 in Bundi. The attention of the Bundi Durbar has been drawn to the slack work of the two vaccinators employed in the State.

53. There were 168 vaccinators employed against 170 in the previous year. The reduction consisting of one vaccinator in Marwar and two in Jaisalmer. One additional vaccinator was engaged in Kotah. As there is no vaccinator at Deoli, vaccination work is performed by an apprentice compounder and hence no expenditure on establishment.

54. The Residency Surgeon, Western Rajputana States, reports that of the work performed in Marwar, 2,194 vaccinations were done by Hospital Assistants in Marwar Dispensary towns, 99·41 per cent. of which were successful, the Hospital Assistant at Sirohi performed 187 in Sirohi City and the Hospital Assistant at Jaisalmer 124 in Jaisalmer City.

55. The presence of plague and famine in most of the States in Rajputana had an appreciable effect on the vaccination work, it also prevented Agency Surgeons inspecting as many vaccinated children as they might otherwise have done.

STATEMENT No. II.

56. The expenditure on vaccination in Native States rose from R24,225-15-4 in 1904-05 to R25,420-14-7 in 1905-06 and the cost of each successful case from 16 to 18 pies which is due to the fact of prevalence of local scarcity which caused emigration to a very large extent.

57. The Agency Surgeon, Eastern Rajputana States, inspected 525 towns and villages and saw 8,927 successful vaccinations, the Civil Surgeon, Bikaner, inspected 90 towns and villages and saw 5,095 successful cases, the Residency Surgeon, Mewar, inspected 113 towns and villages and saw 2,673 children who had been successfully vaccinated, the Agency Surgeon, Kotah and Jhalawar, inspected 501 towns and villages and saw 2,443 successful cases, the Residency Surgeon, Jaipur, inspected three towns and saw 1,587 successful vaccinations, the Agency Surgeon, Alwar, inspected six towns and villages and saw 1,439 children who had been successfully vaccinated, the

Residency Surgeon, Western Rajputana States, inspected 15 towns and villages and saw 1,225 successful cases and the Medical Officer, Dungarpur State, inspected six towns and villages and saw 207 successful vaccinations.

58. The number inspected by the Residency Surgeon, Western Rajputana States, was smaller than usual owing to his carrying on the duties of the Chief Medical Officer in Rajputana for two months in addition to his own work and the Agency Surgeon, Haraoti and Tonk, could not leave the city of Tonk owing to the outbreak of plague there.

59. The Residency Surgeon and Chief Medical Officer in Rajputana in his winter tour of inspection examined 3,028 vaccinated children and found the work mostly very good.

60. Lymph is kept up throughout the year in most of the important States and humanized lymph is generally used.

SECTION II.—DISPENSARIES.

STATEMENT A.

Number of Dispensaries.

61. There are now 167 hospitals and dispensaries in Rajputana against 166 in the previous year, one new dispensary at Bansur in Alwar State was established on the 5th July 1905. Besides these there are six Mission and six Railway Dispensaries open for the treatment of patients.

62. During the year under report the Raj Dispensary at Bhatki on account of meagre attendance was transferred to Sanchore, the Head-quarters of that Hakumat.

63. The dispensaries have been classified in accordance with the orders contained in Government of India, Home Department, letter No. 678-86 (Medical), dated the 16th July 1904, as follows:—

I. State Public	9
II. State Special	10
V. Private non-aided (i.e., Native States)	148

64. At Ajmer, new quarters for the Assistant Surgeon and for a Female Hospital Assistant, and an out-patient department for women have been completed in the General Hospital compound. Their cost has been defrayed from the Victoria Memorial Fund.

65. Assistant Surgeon has occupied his new quarters, his old residence having been converted into special ward suitable for purdah women or patients of the better class.

66. The construction of a new dispensary at Todgarh in Merwara District has been completed during the year.

67. At several State dispensaries many improvements in buildings have been made during the year.

68. At Jaipur the lighting of the operation room has been improved in the Mayo Hospital by enlarging the window looking to the north and small ward attached to the operation room block has been changed into an operation room. This will be used for cases which it is not possible to treat aseptically.

69. The new Hospital at Khetri was completed, opened and named "Ajit Singhji Hospital, Khetri" during the current year.

70. At Kishangarh the wards for respectable families have been completed and are being utilized. The construction of new wards for in-door patients has not yet been taken in hand.

71. Assistant Surgeon's quarters and wards for females in the Dholpur Sudder Dispensary have been completed and occupied.

72. The new operating theatre at the Bhagwan Dass Hospital at Bikaner is in course of construction and will be completed shortly.

STATEMENT B.

73. Shows the total number of patients treated both in-door and out-door separately during the year under report.

74. One million, ninety thousand, nine hundred and forty-five patients of all classes were treated against 1,175,986 in 1904. A decrease of 85,041 in the number treated in the hospitals and dispensaries as shown in the regular standard Statements B, C and F is attributed to the healthiness of the year (excluding plague which is not generally treated in the dispensaries).

75. Of the total number of patients treated 14,624 were in-door and 1,076,321 out-door against 14,957 in- and 1,161,029 out-patients in the previous year.

STATEMENT C.

76. Shows diseases for which patients were treated in hospitals and dispensaries in Rajputana. The percentage of cases treated under each chief cause during the years 1904 and 1905 is shown below :—

Diseases.	Percentage during 1904.	Percentage during 1905.
(a) Malarial fevers and spleen	18·67	14·83
(b) Rheumatism	3·97	4·30
(c) Diseases of the eye	11·94	12·07
(d) Lungs and respiratory diseases	6·80	7·73
(e) Dysentery and diarrhoea	3·62	3·62
(f) Ulcers	10·83	10·51
(g) Skin diseases	9·38	10·34
(h) Injuries	2·20	2·45
(i) Syphilis	1·97	1·89

77. There were eight patients treated at the Victoria Hospital, Bharatpur, by "X-rays" and four by "Finsen light" during the year under report. The decrease in the patients treated by those methods was due to the fact of the building in which the dynamo is kept, having been under repair almost the whole of the year.

LEPROSY.

78. Three hundred and nineteen patients were treated for leprosy in Rajputana hospitals and dispensaries in 1905 against 368 in 1904 and 376 in 1903. This shows a decrease of 49 cases in 1905. No special methods of treatment have been employed.

SNAKE-POISONING.

79. In accordance with the orders contained in Government of India, Home Department, letter No. 239—247 (Sanitary), dated the 12th February 1906, Medical Officers have been instructed that if Anti-venine and Anti-diphtheritic sera are required requisitions may be prepared on the Director, Central Research Institute, Kasauli, and submitted to this office for counter-signature and direct despatch to Kasauli. The sera will be supplied to Government institutions free of charge and on payment to Native States in Rajputana.

80. Calmettes' Anti-venine is kept in stock for use in the treatment of snake-bite in most States.

PLAGUE.

81. During the year from 1st April 1905 to 31st March 1906, twenty-five thousand seven hundred and fifteen cases of plague and twenty-two thousand five hundred and sixty-four deaths were reported and 698 towns and villages infected in Rajputana including Ajmer-Merwara. The whole province was infected except Jaisalmer and Dungarpur where there was no plague owing to their isolated positions. The percentage of total plague deaths to population was 0·57.

82. The subjoined table shows the severity of the epidemic in certain Native States and Ajmer-Merwara District as well as the rapidity of its spread in recent years and the percentage of total plague deaths to population since 1896.

83. In the year 1905-06, two thousand one hundred and thirteen plague cases with 1,648 deaths were reported in Ajmer-Merwara against 1,258 cases and 1,022 deaths in the previous year; of these 2,027 cases with 1,565 deaths occurred in the Ajmer District and 86 cases with 83 deaths in the Beawar town of Merwara up to the end of May 1905.

84. The disease which had invaded the district in the previous year from the adjoining Native States, prevailed in epidemic form during March 1905 and continued to the end of May 1905 after which the district was free from pestilence for five months. In November, plague broke out in the village of Jaithana in Ajmer District, 16 cases and 13 deaths were reported between the 5th and 16th November. It re-appeared in the same village in March 1906 by the end of which month 51 cases and 35 deaths were recorded.

85. In Ajmer town and suburbs 180 cases occurred up to the end of May 1905, of these 173 proved fatal; since then no local cases were recorded. Sixty-four towns and villages were infected in Ajmer District by the disease.

86. Necessary precautions were taken and plague and Segregation Camps were established and put in charge of a Hospital Assistant under the supervision of the Civil Surgeon, Ajmer.

87. The following imported cases and deaths were detected at Railway Inspecting Stations:—

	Cases.	Deaths.
Ajmer Railway Station	30	23
Bandikui „ „	4	1
Bharatpur „ „	1	1
Marwar Junction Railway Station	2	2
Abu Road Railway Station	8	7
TOTAL	45	34

88. The Plague Inspection Station at Bandikui was abolished indefinitely on the 1st July 1905 owing to the decrease of plague in the Punjab and United Provinces of Agra and Oudh.

89. Twenty-three thousand six hundred and two cases with 20,916 deaths were reported in Native States of Rajputana during the year under report, of these 63 cases with 46 deaths were imported and 23,524 cases and 20,859 deaths were indigenous. This does not include cases detected at Railway Inspecting Stations.

90. The epidemic affected 15 States and 633 towns and villages in 1905-06 against 15 States and 599 villages in 1904-05. In Partabgarh, Shahpura, Bharatpur, Tonk, Alwar and Mewar the percentage of total plague deaths to population was 3.86, 2.62, 1.72, 1.22, 1.19 and 1.09 respectively.

91. On the 31st March 1906, plague was in existence in Kotah, Mewar, Tonk, Jaipur, Alwar, Bharatpur and Ajmer District. The figures after that date will be given in the report for 1906-07.

92. In infected villages of all Native States, evacuation, disinfection and segregation were carried out largely by the people themselves, the poor being state aided. The measure on which most reliance has been and must be placed is evacuation. It is satisfactory to note that the villagers now appreciate the advantages of early evacuation.

93. The people have appreciated the method of dessication with an improved and effective stove of Doctor Sawhney's invention.

94. One hundred and ninety-two persons were inoculated during the year under report, 137 in Jaipur and 55 in Tonk. None of them were subsequently attacked by plague as far as is known.

95. The general medical staff in the province was unable to meet all demands and in many States temporary hands had to be entertained.

STATEMENT F.

96. Shows the classes and sexes of in-door and out-door patients treated in the dispensaries of Ajmer-Merwara and of Native States in Rajputana as follows:—

	1904.	1905.
European and Eurasians	1,728	2,009
Hindus	803,968	739,287
Musalmans	294,572	278,668
Other classes	75,718	70,981

97. This calls for no comment as it is merely introduced for statistical purposes.

STATEMENT G.

Operations.

98. A total number of 65,010 operations were performed on 64,433 patients in Ajmer-Merwara and in the Native States of Rajputana during the year 1905, the numbers for 1903 and 1904 being 62,127 and 60,266 total operations, respectively.

Surgical Operations.

99. Of the persons operated on 63,951 or 98·93 per cent. were "cured," 289 or 0·45 per cent. were "relieved," 103 or 0·16 per cent. were "discharged otherwise," and 67 or 0·10 per cent. died, while 233 or 0·36 per cent. remained under treatment on 31st December 1905.

100. In 61 persons vesical calculi were removed by litholapaxy with three deaths, a ratio of mortality of 4·92 per cent. In 43 patients vesical calculi were removed by lithotomy with six deaths.

101. Two patients were treated by lithotrity, all were discharged as cured.

102. One hundred and forty-seven amputations were performed with eight deaths, a ratio of mortality of 5·44 per cent.

103. Other operations of which over 500 cases were performed in 1905 were as follows:—

	Number of cases.
Removal of foreign bodies	532
Extraction of the lens for cataract	854
Operations on fractured bones	957
Reductions of dislocations	105
Extraction of guinea worm	872

STATEMENT H.

104. Shows the income and expenditure of Government dispensaries and hospitals and the expenditure only on those in Native States.

105. In Ajmer-Merwara the total expenditure rose from R16,108 to R34,695 in the year under report. This increase was mainly due to:—

- (a) Improvement to the Ajmer General Hospital Building.
- (b) Construction of the new Dāk Bungalow building at Kekri and expenses connected with the proposed conversion of the old Dāk Bungalow into a dispensary building.
- (c) Construction of a new dispensary building at Todgarh in Merwara. The cost of these buildings amounted to R20,258 which were paid from the Victoria Memorial Fund.
- (d) Increase of pay of Assistant Surgeon, Ajmer, as he was promoted to second grade from the 28th September 1904. The arrears of pay at the increased rate for 1904 were paid in September 1905.
- (e) Increase in number of diets supplied and increased price of food due to scarcity.
- (f) A more liberal supply of both Europe and bazaar medicines.

106. The cash balance in favour of the Pisangan Dispensary on 31st December 1905 was R387 against R626 in the previous year, as the Raja failed to pay his annual subscription of R300 this year.

107. The invested capital of the dispensaries in Ajmer-Merwara remained the same as in the previous year.

108. The total expenditure on Political Agency and Salt Dispensaries fell from R12,936 to R12,713 in 1905, a decrease of R223 which is attributed to a considerable falling off in the number of in-door patients treated as owing to scarcity in Marwar people left their homes.

109. The total expenditure on hospital and dispensaries in the Native States of Rajputana rose from R3,00,476 in 1904 to R3,34,734 which is due to increase in expenditure on medical staff and on buildings and repairs, to the promotion of Hospital Assistants and replacement of Native doctors by qualified Hospital Assistants and to improvements in the buildings of the Mayo Hospital at Jaipur, and the Bhagwan Dass Hospital at Bikaner.

110. Of the total cost of hospitals and dispensaries in these States R64,255 were expended in Jaipur, R44,906 in Jodhpur, R43,789 in Bikaner, R35,558 in Kotah, R33,199 in Alwar, R32,332 in Bharatpur, R25,740 in Mewar, R8,150 in Tonk, R8,028 in Jhalawar, R7,000 in Dholpur, R4,957 in Karauli, R4,237 in Bundi, R3,718 in Sirohi, R2,967 in Kishangarh, R2,664 in Jaisalmer, R2,263 in Dungarpur, R1,705 in Shahpura, R1,513 in Banswara, R1,308 in Partabgarh, and R514 in Kushalgarh.

111. The average cost of each case treated in Native State hospitals and dispensaries was 63 pies against 52 pies in the previous year.

112. The scheme for improving the position and pay of compounders, dressers and others of the menial departmental staff is still under the consideration of some of the Durbars.

MISSION HOSPITALS.

113. During the year under report there were six Mission Hospitals in Rajputana the same as in the previous year.

114. The following table shows the total number of in-and-out-door patients treated and operations performed in Mission Hospitals during the year 1905:—

Name of Hospital.	OUT-DOOR PATIENTS.		In patients.	Operations.	REMARKS.
	Old.	New.			
Ajmer (Male)	52,392	16,107	195	1,212	...
Ajmer (Female)	11,027	4,314	136	284	1,480 patients were visited at their homes.
Nasirabad	18,260	6,066	165	519	...
Ashapura	11,262	3,753	209	108	...
Udaipur	32,192	13,951	249	1,143	...
Jodhpur	31,080	5,417	105	984	705 patients were visited at their homes.
TOTAL	156,213	49,608	1,059	4,250	2,185

RAILWAY HOSPITALS.

115. There were six Railway Dispensaries on the Rajputana-Malwa Railway within the limits of Rajputana, *viz.*, one at Abu Road, one at Sojat Road, two at Ajmer (one of these being a large head-quarter hospital for Europeans and Natives with male and female wards), one at Phalera and one at Bandikui.

116. Seventeen thousand, eight hundred and fifty-one patients were treated in the above hospitals during the year under report, *viz.*, 2,620 at Abu Road, 2,118 at Sojat Road, 7,142 at Ajmer, 1,594 at Phalera and 4,377 at Bandikui.

INSPECTIONS.

117. The Residency Surgeon and Chief Medical Officer in Rajputana inspected the hospitals and dispensaries during the past season in the following cities :—

Ajmer, Udaipur, Jaipur, Bikaner, Jodhpur, Tonk, Deoli, Shahpura, Bharatpur, Dholpur and Alwar. His tour was curtailed owing to the scarcity of fodder in Bundi, Kotah and Jhalawar.

JAILS.

118. *Ajmer*.—The daily average number of prisoners in the Ajmer Jail rose, owing to famine, from 349·40 to 412·29, the daily average sick from 6·71 to 9·18, the mortality from 2 to 7 and the death-rate from 5·72 to 16·98 per mille of average strength in 1905.

119. The pump put up at the new well being constantly out of order and the supply of water both from the new well and the Mir Shahali well being insufficient (owing to the general deficiency of the rain in 1905), water was purchased from the Municipal Mains for bathing and drinking purposes and consequently the Jail garden could not be cultivated during the year under report.

120. The Review by the Commissioner, Ajmer-Merwara, on the strength, classification, health, employment and conduct of prisoners, nature of sentences, jail manufactures and Expenditure of the Ajmer Jail is given as Appendix A of the Report, together with statements.

121. *Native States*.—The daily average number of prisoners in these Jails rose from 4,729·46 in 1904 to 4,824·97 in 1905, a slight increase which is probably due to famine and scarcity. The total number of cases admitted in hospitals fell from 2,395 in 1904 to 2,026 in 1905, and the daily average sick from 95·83 to 84·64, but the mortality rose from 84 to 95 and the death-rate from 17·76 to 19·68 per mille.

122. *Jaipur*.—There has been some overcrowding in the Cental Jail, Jaipur, throughout the year. The daily average sick fell from 7·85 to 5·08 in 1905. In the District Jail the average daily sick rose from 5·24 in 1904 to 5·66 in 1905. The health of the prisoners in both the jails was fairly satisfactory. The jails on the whole are well managed and the factories seem to be in a flourishing condition. The Residency Surgeon, Jaipur, reports that the city Hawalats (Foujdari and Police) are both periodically visited by the Superintendent and necessary recommendations made to the Council in regard to them; during the past three years the accommodation of these lock-ups has been much improved.

123. *Jodhpur*.—The mortality and the death-rate in this jail rose from 9 and 8·55 in 1904 to 16 and 14·77 per mille of average strength in 1905, which is due to overcrowding and mismanagement.

124. Lieutenant-Colonel H. N. V. Harington, I.M.S., the Residency Surgeon, Western Rajputana States, has drawn up a scheme for improving the Jail factory, and the management of the jail generally which, it is hoped, will be approved by the Durbar shortly.

125. The accommodation for under-trial prisoners is very deficient and the number of prisoners suffering from scurvy is still large, notwithstanding that the Residency Surgeon ordered fresh limes daily and vegetables.

126. *Bikaner*.—The jail as usual is quite up to date in every way. The only complaint is that there are not sufficient prisoners to supply the workshops with the labour necessary to comply with orders for carpets, etc., from both India and England.

127. *Udaipur*.—The health of this jail has improved wonderfully within the year and much credit is due to the jail management.

128. The Hawalat is under the supervision of the Foujdari Court. The health of the inmates seems to be fair. Some of the prisoners were suffering from dysentery and fever.

129. *Alwar*.—The high mortality in the jail is almost entirely due to overcrowding. Two barracks each with accommodation for 44 prisoners are in course of construction.

130. *Bharatpur*.—There has been much overcrowding in the jail since the abolition of the District Jail at Dig in April 1905.

131. There were no deaths in the jails at Kishangarh, Karauli, Shahpura, Jhalrapatan and Partabgarh.

132. There was no cholera or other epidemic disease in any of the jails in Rajputana during the year under report.

133. The Residency Surgeon and Chief Medical Officer in Rajputana inspected the jails at Ajmer, Udaipur, Jaipur, Bikaner, Jodhpur, Tonk, Shahpura, Bharatpur, Dholpur and Alwar. Matters requiring alteration or improvement were pointed out at these inspections and many improvements were sanctioned which will be carried out as far as possible.

134. The necessity for regular inspection of jails away from head-quarters has been impressed upon Medical Officers as material progress in jails cannot be expected unless attention is drawn to defects during visits of inspection.

135. *Qualified Medical Staff*.—There were 10 Commissioned Medical Officers employed in Rajputana at the end of the year under report besides the

Commissioned Medical Officers.

Military Medical Officers, as below :—

136. Lieutenant-Colonel D. French Mullen, M.D., I.M.S., Residency Surgeon and Chief Medical Officer in Rajputana, went to Calcutta on the 27th December 1905 for two months' training in Military Medical Administration in the office of the Principal Medical Officer, Presidency and Assam Brigades.

137. Major P. P. Kilkelly, I.M.S., Civil Surgeon, Bikaner held additional charge of the duties of the Residency Surgeon, Western Rajputana States, from the 7th May to the 10th August 1905 when Lieutenant-Colonel H. N. V. Harington, I.M.S., was appointed to succeed Lieutenant-Colonel J. Crofts on the latter's retirement from the service.

138. *Additional Charge*.—The Civil Surgeon, Ajmer, holds collateral charge of the 44th Merwara Infantry, the Medical Officer, Mewar Bhil Corps, is the Medical Officer of the Dungarpur State and superintends the Civil Dispensaries at Kherwara and Kotra, and the Medical Officer of the 43rd Erinpura Regiment inspects the Sheogunge Dispensary close to the Cantonment of Erinpura. A Medical Officer has been posted as separate Medical Officer of the 42nd Deoli Regiment.

139. The Assistant Surgeon at Beawar was deputed for famine inspection duty in Merwara District from 1st September 1905, after the date of his promotion to the 2nd grade his post at Beawar is still vacant, also that of an Assistant Surgeon to the Victoria Hospital at Bharatpur and of Assistant Surgeon Abnashi Ram, Medical Adviser to the Maharaja of Bharatpur, who died on the 29th April 1905. Proposals regarding the first two appointments have been submitted to the Local Government for sanction.

140. The services of Doctor P. Deb, in charge of the Northern India Salt Revenue Dispensary at Sambhar, have been extended for one year, and those of Doctor Newland, Inspecting Plague Medical Officer at Bandikui, have been dispensed with from the 1st July 1905, owing to the abolition of the Plague Camp.

141. In addition to 21 Hospital Assistants permanently employed by the British Government and 157 Government Hospital Assistants transferred for service in Native States there were only 7 locally entertained unqualified Hospital Assistants employed against 8 in the previous year, of whom one resigned and a qualified Hospital Assistant was appointed in his place. There were also three Native Doctors locally employed by the different States in Rajputana, *viz.*, one in Marwar, one in Mewar and one in Kushalgarh. An Assistant Surgeon has been locally entertained by the Durbar at Bundi in place of a Native Doctor whose services have been dispensed with during the year under report.

142. *Military Hospital Assistants*.—There were ten Military Hospital Assistants employed with the Imperial Service Corps in Rajputana against eleven in 1904, of whom one lately on special duty with the ex-Maharaja of Bharatpur reverted to the Government Military Department.

143. *Lady Doctors*.—There were six lady doctors employed in Rajputana as in the previous year, and there were 12 Female Hospital Assistants against 10 in 1904. One Female Hospital Assistant was employed by the Municipality

at Beawar on the 15th June 1905 and another was attached to the Female Hospital at Bharatpur on the 14th September 1905, in place of Bibi Rup Kunwar who was appointed as medical attendant to the palace ladies there.

FEMALE HOSPITALS AND DHAI CLASS FOR WOMEN.

144. *Ajmer*.—A new out-patient department for females and quarters for female Hospital Assistant have been completed, and when and if funds permit a female Hospital Assistant will be appointed to the medical charge of the women's wards of the General Hospital, Ajmer.

145. Miss Campbell has been in charge of the Mission Hospital for women at Ajmer throughout the year. The number of patients treated is shown under "Mission Hospitals."

146. *Beawar*.—The female ward of the Charitable Dispensary at Beawar was re-opened on the 15th June 1905, when female Hospital Assistant Anku Bai was appointed. During the period of five and half months 26 in and 3,580 out-patients were treated and 203 operations were performed.

147. The returns received from the Women's Hospitals in Native States of Rajputana show on the whole a decrease of work done during the year under report in these institutions which is attributed to the healthiness of the year.

148. *Jodhpur*.—There was a considerable decrease in the number of both in- and out-door patients in the Jaswant Female Hospital for women which is attributed to the fact that Miss Marsh, M. D., Lady Superintendent in charge, was on ten months' leave, from the 1st May 1905.

149. *Bharatpur*.—There were 255 in-door patients treated and 206 operations performed in the Female Hospital in 1905 against 172 and 108 in the previous year; this increase is due to the fact that Miss Hetherington was put in charge of the institution from the 14th January 1905. Female Hospital Assistant Bebi Rup Kunwar was appointed as medical attendant to the palace ladies on the 14th September 1905, when she was relieved by Miss Reid, a certificated Eurasian of the Lahore Medical College.

150. There was a decrease in the number of out-patients treated which is partly due to the advent of plague in the city in the spring and partly owing to men being constantly in the courtyard as a new operation room and a ward for in-patients were under construction, purdah ladies were unable to attend the hospital.

151. *Alwar*.—Miss Lauder has been in charge of the Dufferin Hospital at Alwar throughout the year. There was a decrease in the number of in-patients treated during the year under report which is partly owing to the absence of female Hospital Assistant Sugna Bai on leave for nine months in 1905. But it is satisfactory to note that 141 obstetric cases were treated during the year under report by the hospital staff and Dhais under instruction in the hospital against 93 in 1904.

152. *Tonk*.—There was a decrease in the number of both in- and out-door patients treated during the year under report which is due to some cases of plague having been reported from the hospital. This frightened the people and kept the numbers down.

153. Six pupils who were instructed by Miss Reed in the Dhai Class at Tonk during the year were examined by the Agency Surgeon, Haraoti and Tonk, in November 1905, and passed creditably.

154. *Kotah*.—Miss Jeani Newton, L. R. C. P. and S. (Edinburgh), has been in charge of the Victoria Jubilee Hospital at Kotah throughout the year with the exception of the period from the 15th July to 31st August 1905, when she was on leave. During her absence female Hospital Assistant Miss Helen Baldeo Singh held charge of the institution. The hospital staff worked satisfactorily throughout the year.

155. The Dhai Class was restarted on the 1st December 1904 and has since continued. There are 17 pupils attending the class who receive a scholarship of Rs 2 per mensem each from the State.

156. *Udaipur*.—The Walter Zenana Hospital at Udaipur was in charge of Miss Graham, L. R. C. P. and S., up to the 25th September 1905, when her services were dispensed with. Miss McGlashan, M.B., Ch.B., was placed in charge of the hospital on the 25th October 1905. There was a considerable

decrease in the number of both in-and out-door patients treated during the year under report which is mainly attributed to the fact that the hospital was closed for four-and-a-half months owing to plague in Udaipur City and partly to departure on leave for five weeks of Miss Graham.

157. A compounder has been appointed for the hospital, but the services of a Female Hospital Assistant are urgently needed.

158. *Jhalawar*.—Female Hospital Assistant Miss Annie Williams has been in charge of the Female ward of the Chaoni Hospital throughout the year. There is a marked decrease shown in the number of patients treated against that in the previous year which is attributed to the fact that the women do not like to attend the dispensary as it is situated outside the city.

159. *Jaipur*.—Female Hospital Assistant Birji Bai has been in charge of the Female ward of the Mayo Hospital at Jaipur. There has been a decrease in the number of out-door attendance as compared with the previous year which is attributed to the prevalence of plague in the city and the districts.

160. The Dhai Class has been kept up throughout the year.

161. It has been proposed at various times to establish a separate Female Hospital at Jaipur where it is much needed for *purdah nashins*.

162. *Bikaner*.—Bibi Ashrafi was in charge of the female ward of the Bhagwan Dass Hospital at Bikaner up to the 4th February 1905, when she was relieved by Female Hospital Assistant Elizebeth (Mrs. Moji Ram) who remained in charge throughout the rest of the year.

163. A purdah hospital building, though sanctioned, has not yet been commenced.

164. *Karauli*.—Female Hospital Assistant Miss Kitty Habibullah in charge of the Female Dispensary at Karauli was absent on nine months' sick leave, from the 13th December 1904. As she continued ill and unable to resume her duties her services were dispensed with from the 14th October 1905, since then no Hospital Assistant has been entertained in her place.

165. During the year under report ten women were admitted into the Dhai Class at Ajmer for training up to 31st December 1905. Of these three

Dhai Class, Ajmer.

obtained qualification Certificates, one who failed was advised to resign as there was no hope of her ever becoming an intelligent Dhai and six are in the present class which began on the 1st July 1905, of these two are from Sirohi, two from Kishangarh, one from Beawar and one from Ajmer. They are instructed in the rudiments of midwifery and general obstetric practice.

166. Since the opening of this class on the 1st April 1903, 14 Dhais have passed out, of these, the Lady Superintendent reports, one is in Udaipur, one in Jodhpur, one in Sirohi, one in Alwar, three in Ajmer, two are employed in the Women's Hospital, Ajmer (one as nurse and one as matron), two others have stayed on in order to gain experience and the remaining three she has lost touch with. Mrs. Harris believes that some are trying to carry into practice the instructions they have received. Their chief difficulty, as far as she knows, lies in the expense of keeping themselves provided with the necessary appliances and disinfectants. No doubt in course of time ways and means will be found to provide these requisites.

167. As the Dhais who are admitted into the Dhai Class at Ajmer for training receive a scholarship of Rs 5 only per mensem each, which is insufficient for their support, the Residency Surgeon and Chief Medical Officer suggests that the amount of scholarship be raised to Rs 7 per mensem each, and in lieu of a reward of Rs 10 in cash to each successful pupil necessary appliances may be awarded.

IMPERIAL SERVICE CORPS.

168. The three Regiments of Cavalry, the Camel Corps, the two Transport Corps and the two Regiments of the Imperial Service Infantry at Alwar, Jodhpur, Bikaner, Jaipur and Bharatpur have well equipped hospitals which have been regularly inspected by the Residency Surgeon and Chief Medical Officer in Rajputana.

INSANES.

169. There were 13 lunatics in the Ajmer Central Jail during the year under report, of these three were transferred to the Lahore Lunatic Asylum, two

were handed over to the Police for escort to their homes, four were cured and two were made over to their friends and guardians. Only two lunatics remained in the Jail on the 31st December 1905.

170. In Native States 182 lunatics were treated in 1905 of whom 48 were cured, nine were made over to the custody of their friends and relatives, 19 died, six were transferred to the Lahore and Agra Lunatic Asylums (five to Lahore from Bikaner and one to Agra from Bharatpur) under Government of India, Foreign Department, Notification No. 1524 I. A., dated the 28th April 1905, and 100 insanes remained under treatment at the close of the year. No insanes were sent to the Lunatic Asylum, Jaipur, by the Kishangarh State during the year.

171. The Bundi Council have sanctioned the construction of two lunatic wards which, it is hoped, will shortly be taken in hand.

172. Insanes are kept under the supervision of the Police in the Mohtaj Khana in Udaipur City.

173. As little attempt is made in most of these Asylums to cure the patients who are merely detained, fed and medically treated when suffering from ordinary disease it is suggested that a Central Asylum might be started at Ajmer supported by the Native States and most of the local Asylums abolished.

174. Formerly the lepers of Jodhpur were segregated at Kaga beyond Nagori Gate of the City. A Leper Asylum has now been constructed at *Nimba* about 8 miles from the city and occupied by them.

175. Arrangements are being made to prevent intercourse with the general population.

FAMINE 1905.

176. Owing to the failure of the monsoon a Conference was held at Beawar on the 10th August 1905 by the Hon'ble the Chief Commissioner, Ajmer-Merwara, regarding the prospects of famine in the Ajmer and Merwara Districts at which it was decided that the following additional medical establishment be entertained to meet the requirements:—

- 1 European Medical Officer.
- 1 Clerk.

In Merwara District.

- 1 Assistant Surgeon.
- 4 Hospital Assistants for works.
- 2 Hospital Assistants for two Poor-houses.
- 10 Compounders.
- 10 Dressers.

In Ajmer District.

- 1 Assistant Surgeon.
- 4 Hospital Assistants for works.
- 1 Hospital Assistant for Poor-house.
- 9 Compounders.
- 9 Dressers.

177. The services of a junior Commissioned Medical Officer were applied for and Captain J. R. J. Tyrrell, I. M. S., was selected by the Government of India for the post of Medical Officer for famine duty in Ajmer and Merwara Districts.

178. Assistant Surgeon I. T. Mittra, late in sub-medical charge of the Civil Station at Beawar, was deputed for famine duty in Merwara District from 1st September 1905, and Assistant Surgeon Ajudhia Pati, late in charge of the Bhagwan Dass Hospital at Churu in Bikaner State, was appointed to famine duty in Ajmer District.

179. A state of famine was officially declared in the Districts of Ajmer and Merwara in September 1905, and a number of relief works were opened in both.

180. At the end of the year under report there were 12 relief works in the Ajmer District and three in Merwara.

181. The Ajmer works which were scattered over the northern, eastern and western portions of the district gave relief to about 17,500 persons daily. This number being fairly evenly divided amongst the various works.

182. For the 12 works there were only two Hospital Assistants, one stationed at Ramsar and the other at Barla.

183. A Famine Hospital at Ramsar was opened on the 16th October 1905, and the Hospital Assistant in charge was also deputed to supervise four other works separated from his head-quarters by distances varying from 8 to 12 miles.

184. The Hospital at Barla was opened on the 26th November 1905, and the Hospital Assistant had one other work to look after at a distance of about 4 miles.

185. No records of patients treated in famine camps in Ajmer District were maintained during the year under report. Indeed there was no sickness to speak of, the general health being excellent. The people on the works live in the villages round and come to the works daily, when ill they naturally stay in the villages and when they die, die in the villages, their deaths being noted in the district returns.

186. In Merwara the following relief work hospitals were opened on the dates specified against their names :—

(1) Barakhan-Sojat Road	.	.	.	.	10th September 1905.
(2) Makrera Tank	.	.	.	.	15th „ „
(3) Bhim-Todgarh Road	.	.	.	.	22nd „ „

187. These works gave relief to an average of 12,719 persons daily.

188. The total number of cases treated up to 31st December 1905 was 1,361, and the total deaths in hospitals were two, of these 643 cases were treated in Makrera, 446 in Barakhan-Sojat Road and 272 in Bhim-Todgarh Road Relief Hospitals.

189. In Merwara as well as in Ajmer there were few serious cases of illness up to the end of 1905 and there was no outbreak of any infectious disease.

190. The mortality in both districts was below normal with the exception of the month of September 1905, when in Merwara it rose considerably above the normal (chiefly from malaria). On the whole the general health was good and the mortality less than in other years of scarcity, partly owing to relief works having been started early, before the people had become emaciated, and partly on account of emigration which reduced the numbers of persons in distressed areas.

191. There are ample supplies of medicines and medical comforts.

192. No kitchens or poor-houses were required to be opened and it is hoped that they will not be necessary.

193. Distress will continue until the next monsoon is established, but it is not anticipated that it will become very severe as neighbouring countries, such as Malwa, are not affected as they were in 1899-1900 and emigration has supplied a useful safety valve.

194. The organisation for famine relief is believed to be sufficiently elastic to meet any conditions now likely to arise, and it is hoped that the population will be brought through the present period of famine without any deaths from actual starvation, none having been reported to date.

195. During the year under report famine relief works were opened in the following Native States in which medical arrangements were made :—

Native States.

Marwar. | Bharatpur.
Dholpur.

196. In Alwar, Karauli, Jaipur, Tonk, and Kishangarh States and Shahpura Chiefship famine relief works were started later on in 1906.

197. In Mewar, Dungarpur, Partabgarh, Banswara, Kotah, Jhalawar, Sirohi, Jaisalmer, Bundi and Bikaner famine has not been declared, although there was some scarcity both of food and water.

198. Bikaner obtained exceptionally good rain in September and was saved entirely thereby, this rain also relieved much possible distress in Marwar

and other States and saved a good deal of the crops and made fodder for etc., sufficient.

199. There has been heavy emigration from all the affected States, mostly in the direction of Sind, and the Punjab on canal works from Marwar, and of Malwa from the other States. Distress has thereby been much relieved, but local measures have in most States been found necessary. Relief works are in progress in all the affected areas, and all the States concerned have since formally declared famine except Mewar and Shahpura.

200. Distress will continue until the next monsoon and will probably increase with the hot weather, but three causes have operated to lessen the severity of the present famine :—

- (i) The limited extent of the affected area and the consequent possibility of emigration to more favoured countries.
- (ii) Opportune rainfall in September and February which saved Bikaner and a great part of Marwar, and by its effect in the Punjab and the United Provinces prevented the prices in Rajputana from falling to the lowest level.
- (iii) Smaller population affected owing to heavy depletion of the classes most liable to distress in the famine of 1899-1900.

201. There is no reason to anticipate any serious loss of life as the arrangements in nearly all the affected states are now believed to be adequate though they are, of course, less systematic and thorough than in Ajmer-Merwara.

202. In Marwar 32 relief works were opened from 1st September to the 31st December 1905, of which medical arrangements were made in the following works on the date specified against their names :—

Bankli Bund	7th September 1905.
Poondla Bund, Jodhpur	1st October „
Jor Bund and Sewa Ram's Tank, Phalodi	10th December „

203. In Bankli Bund 535 patients were treated, and in Jor Bund and Sewa Ram's Tank, Phalodi, 69 in 1905. Poondla Bund, Jodhpur, is medically supervised by the Hospital Assistant in charge of the second branch dispensary at Jodhpur. The workers live in their villages and there is practically no camp.

204. There were 17 poor houses open in different Hakumat towns on 31st December 1905, the daily total average strength of which was 782 persons.

205. In the Eastern Rajputana States eight famine relief works were opened in Bharatpur and one in Dholpur State, in which medical arrangements were made till the end of the year under report.

206. No medical returns were received from Native States except from Marwar during 1905.

APPENDIX A.

AJMER JAIL, 1905.

Lieutenant-Colonel H. R. WOOLBERT, M.B., I.M.S., held charge of the office of Superintendent of the Central Jail at Ajmer throughout the year 1905.

2. The year opened with a jail population of 361, and ended with one of 466. The total number of admissions was 1,384, as compared with 1,037 in 1904. The daily average strength rose from 349·40 in 1904 to 412·29.

3. In the course of the year 1905, 32 convicts were released on appeal, 412 on expiry of sentence, 24 on payment of fine, 122 under the Remission Rules and one on account of sickness, while five convicts were transferred to other jails and seven died in the jail. Four hundred and twenty-one convicts remained in the jail at the close of the year.

4. Of 707 under-trial prisoners, 191 were released, 433 were convicted and sentenced, 40 were transferred and 43 remained in the jail at the close of the year 1905.

5. Of 14 civil prisoners admitted during the year 1905, 12 were released and discharged and two remained under detention at the close of the year.

6. Of 665 convicts admitted during the year, six were Christians (one Eurasian and five Natives), 195 Muhammedans and 464 Hindus.

By age classification, 46 were under 16 years of age, 558 between 16 and 40, 55 between 40 and 60, and six above 60 years.

Of the 626 male convicts 213 were agriculturists, 251 labourers, 47 shop-keepers and traders, 48 domestic servants, 18 Government servants and 49 were without occupation. Of the thirty-nine female convicts, 20 were married, three unmarried, 14 were widows and two were prostitutes.

7. Of 665 convicts admitted during the year 52 were sentenced to simple imprisonment and 595 to rigorous imprisonment. In the case of 7 convicts solitary confinement was awarded in addition to rigorous imprisonment, while 11 were sentenced to rigorous imprisonment and to whipping.

The number of convicts sentenced to terms of imprisonment not exceeding one month was 229, 130 were sentenced to imprisonment exceeding one month but not exceeding three months; 142 to terms of imprisonment above three months but not exceeding six months; 74 to imprisonment above six months but not exceeding one year; 52 to imprisonment above one year but not exceeding two years; 24 to imprisonment exceeding two years but not exceeding five years; 11 to imprisonment above five years but not exceeding 10 years; two to imprisonment exceeding 10 years and one was sentenced to transportation for life.

8. The total number of previously convicted prisoners admitted during the year was 110 as compared with 103 in 1904. The ratio per cent. of the number having previous convictions to the total admissions was 16·54 as compared with 20·24 in the preceding year.

9. The daily average number of convicts sentenced to labour on working days was 339·01. Of these 218·20 were employed on jail manufactures; 90·41 were engaged on prison duties; 18·00 were employed as prison officers; 3·28 were exempted from labour on account of their health; and 9·12 were sick.

10. The number of jail offences fell from 229 in 1904 to 203 in 1905. All these offences related to breaches of jail discipline. The punishments inflicted are noted below:—

Conduct of prisoners.	
Solitary confinement	10
Reduced diet	1
Corporal punishment	4
Other punishments	188

The prisoner who escaped from custody in 1899 is still at large. There were no escapes during the year.

11. The health of the prisoners was remarkably good during the year. The number of admissions into the Jail Hospital was 161 against 166 in 1904. The number of deaths was seven as compared with two in the preceding year.

12. The number of juvenile offenders confined in the Ajmer Jail was 53, of whom 63 were released during the year under report, and only 17 remained in the Jail at the close of the year. There were 18 prison offences as against nine during the preceding year, but they were not of a very serious nature.

No juvenile offender was sent to the Reformatory School at Chunar during the year under report.

13. The cash profit from the jail manufactures amounted to R3,781, as compared with 3,769 in 1904. The cash earnings per head of those sentenced to labour amounted to R9-12-9, as compared with R12-15-7 in 1904.

14. The expenditure incurred in guarding and maintaining prisoners in 1905 amounted to R30,613, as compared with R28,249 in 1904. This sum includes the expenditure incurred by the Magistrates (R1,037) on guarding and maintaining under-trial prisoners and by the Executive Engineer, Ajmer Provincial Division (R6,749) on buildings and repairs. The average cost per prisoner fell from R80-10-7 to R74-4-0.

15. The net cost (including the cost of under-trial prisoners incurred by Magistrates) of the Jail to Government was R20,569, as compared with R27,015 in the preceding year.

Munshi Maya Dass, Jailor, who was an old servant of the Jail, died during the year 1905, and he was succeeded by Lala Jawahir Lal, Deputy Jailor.

Plans and estimates are being prepared for increased accommodation in the Jail.

P. J. MELVILL, *Lt.-Col.*,
Commissioner, Ajmer-Merwara.

TOTAL	1,41,703	388.23	351	665	1,016	8	...	1,024	4	1	32	412	24	1	122	...	...	7	421			

* Of this number, 44 Boys under 16 years.

† Of this number, 2 Girls under 15 years.

NOTE. 1.—This and the other statements numbered 1 to 7 only convicted prisoners are to be included.

2.—Debtors and others detained for default of Government revenue will appear in No. 8.

3.—The "Total," column 6, is obtained by adding together the totals of columns 4 and 5, and represents with sufficient accuracy the number of different individuals who have been in prison during the month.

4.—The "Total population," column 8, is the sum of columns 6 plus 7, and necessarily includes many who are counted more than once.

5.—The "Daily average number," column 3, is obtained by adding together the number presented on each day of the month, vide column 2, and dividing the whole by the number of days in the month.

6.—When prisoners are transferred from one Jail to another on their way to undergo transportation beyond seas, they should be entered by the transferring Jail in column 6 B, and by the Jail which received them, they should be entered in column 11. When prisoners sentenced to transportation beyond seas are despatched from any Jail, so that they will leave the Province without passing through any other Jail in it, they should be entered in column 11.

It will be observed that transportation applies only to those prisoners sent beyond seas.—Transportation to a Central Prison is regarded merely as a transfer.

7.—When the gangs are employed extramurally under the orders of Government No. 1652-43, dated 28th October 1889, they should be considered as forming a separate Jail, and the name of the Jail, that is, of the place where they are employed, should be entered in italics in each statement.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

AJMER JAIL;
The 3rd March 19

STATEMENT No. II.—Showing the religion, age and previous occupation of the convicts in Jail at Ajmer for the year 1905.

1	2		3				4												5			
Sex.	Religion.					Age.				Previous Occupation.												Total.
										Male.						Female.		Total.				
	A		B	C	D	E	A	B	C	D	E	F	G	H	I	J	K		L	M		
	a	b	c	Christians.																		
	European.	Eurasian.	Native.																			
Male .	...	1	3	186	486	...	...	...	...	...	...	...	...	...	...	...	...	...	...			
Female .	...	...	2	9	28	...	...	...	...	...	...	...	...	...	...	...	...	...	...			
TOTAL .	...	1	5	195	464	...	...	...	...	...	...	...	...	...	...	...	...	...	...			

NOTE.—It is of importance that the particulars given in this, and also in No. 3, should not include the same individual more than once, and hence all transfers should be omitted. The totals should correspond with the number in column 5, Statement I : "Imprisoned during their month." But they should do so with the "Total" Column 6, for January only, as the number remaining on the last day of the previous year (31st December) is to be included in that month.

STATEMENT No. III.—Statement showing the convicts admitted into the Jail at Ajmer during the year 1905, and those remaining on the 31st December of that year, according to the nature and length of sentence.

The female column is filled in italics.

1	2														3	
	NUMBERS ACCORDING TO LENGTH OF SENTENCE.														TOTAL.	
	A														M.	
	Not exceeding one month.														F.	
A.—Prisoners sentenced to simple imprisonment	48	5	1	...	...	...	...	...	...	...	...	...	...	...	...	...
B.—Ditto rigorous do.	170	11	8	...	...	...	...	...	...	...	...	...	...	...	...	...
C.—Ditto do.	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...
D.—Prisoners sentenced to rigorous imprisonment with whipping	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...
Total Admissions (A)														213	16	...
* Total remaining on 31st December 1905														14	...	...

(A) Prisoners admitted during the year should only be shown here, vide column 5 of monthly statement No. 1, from January to December.
* Classes A., B., C. and D. should be amalgamated for this total. Prisoners who escaped and were recaptured during the year 1905 should not be shown in this and Annual Statement No. IV.
(a) This figure should tally with those shown in column 16 of Monthly Return No. 1 for December.

AJMER JAIL OFFICE ;

The 3rd March 1906.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. IV.—Statement showing the convicts admitted into the Ajmer Jail during the year 1905 who had been previously convicted.

SEX.	1	2				3	4	
	Number admitted during the year.	NUMBER PREVIOUSLY CONVICTED.				Ratio of column 2 D to column 1.	JUVENILE PRISONERS UNDER 16 YEARS OF AGE (SECTION 399 OF THE CRIMINAL PROCEDURE CODE).	
		A	B	C	D		A	B
		Once.	Twice.	More than twice.	TOTAL.		Number admitted during the year.	Number previously convicted.
Male	626	44	26	39	109	17.41	44	8
Female	39	...	...	1	1	2.56	2	...
TOTAL	665(a)	44	26	40	110	16.54	46 (b)	8

(a) NOTE.—In column 1 will be entered the prisoners admitted during the year, vide column 5 of Monthly Statement No. 1, from January to December 1905. Numbers in column 2 will be inclusive of the number in column 4.

(b) The figures in column 4 A should tally with those shown in column 3A of Monthly Return No. II for the year.

STATEMENT No. V.—Statement showing the escapes and recaptures of convicts in the Central Jail at Ajmer for the year 1905.

1	2			3	4			5			6			
Remaining uncaptured on the last day of the past year.	ESCAPED DURING THE YEAR.			GRAND TOTAL.	RECAPTURED DURING THE YEAR.			REMAINING UNCAPTURED.			UNEXPIRED PORTION OF SENTENCE OF THOSE WHO ESCAPED DURING THE YEAR.			
	A	B	C		A	B	C	A	B	C	A	B	C	D
	From inside the Jail.	From outside the Jail.	TOTAL.		Those who escaped in previous years.	Those who escaped during the present year.	TOTAL.	Of previous years.	Of present year.	TOTAL.	Under 1 year.	Above 1 and under 3 years.	Above 3 and under 7 years.	Above 7 years.
	...	...	...		...	...	...	1	...	1	...	...	...	...

In column 1, and also in column 5 A, only those should be included who have escaped during the previous seven years. In 4 A, if any are entered who have been at large for upwards of seven years, a special note should be added. A footnote should show how many have been struck off, each having escaped more than seven years previously.

STATEMENT No. VI.—Showing the offences committed by the convicts, and the punishments inflicted on them in the Jail of Ajmer during the year 1905.

1	2	3	4			5							6
SEX.	Average number of convicts.	Criminal offences.*	BREACHES OF JAIL RULES.			PUNISHMENT INFLICTED:							Ratio of column 5 C to column 2.
			Smoking or having possession of forbidden articles.	Offences relating to work.	Other offences against prison discipline.	A	B.—BY JAIL OFFICERS.					Total punishment.	
						By Criminal Court.	A	B	C	D	E		
							Solitary confinement.	Solitary confinement, with reduced diet.	Reduced diet.	Corporal punishment.	Other punishment.

Female	10.85	...	...	...	...	...	...	...	...	...	...	...	...
TOTAL	388.23	...	32	64	107	...	10	...	1	4	188	203	52.26

The nature of the Criminal offences committed should be noted on the back of this return.

* In contradistinction to offences against prison discipline.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,

Superintendent, Central Jail, Ajmer.

AJMER JAIL OFFICE;
The 3rd March 1906.

STATEMENT No. VIII.—Statement showing the employment of convicts as Prison Officers in the Central Jail at Ajmer for the year 1905.

1	2	3	4	5	6	7
SEX.	Average No. of convicts.	Average number employed as Prison officers.	Ratio of column 3 to column 2.	Total number employed as Prison officers.	Number of reductions or other punishments.	REMARKS.
Male . . .	377.38	18.00	4.77	20	18	Convict Warders . . . 3 Do. Overseers . . . 13 Do. Writer . . . 1 Do. Mohurrir . . . 1 Total . . . 20
Female . . .	10.85	...	...	...	...	
TOTAL	388.23	18.00(c)	4.64	20(a)	18(b)	

(a) The nature of the offices held by convicts should be given in column of remarks.
(b) Detail of the nature of punishments ordered should be given as directed in paragraph 19 of the Government Review on the Jail Reports for 1884.
(c) Column 3 should tally with column 7 B of Return No. XII. Column 5 should show the total number of convicts employed as Warders, etc., and not merely the total sanctioned number of situations.

STATEMENT No. IX.—Statement showing the Scales of Diet in force in the Ajmer Central Jail during the year 1905.

1	2	3	4
Diet Scales of Labouring Prisoners.	Diet scale of non-labouring prisoners.	Punishment Diet Scale.	Note of any change effected in diet scales during the year.
Atta of Gram 1/3 } " Barley 2/3 } 12 Chittaks daily. " Wheat 1/3 } Dál alternately . . . 2 Chittaks. Vegetables alternately 8 " Oil with vegetables 4/25 " Salt " " 1/4 " " " Dál . . . 1/6 " Chillies with vegetables 2 M. " " Dál . . . 1 " Fuel 4 Chittaks.	Atta 8 Chittaks on Sundays and Mondays and 10 Chittaks on other days. Other articles are same as for labouring prisoners.	Labouring prisoners 8 Chittaks atta, with the usual quantity of salt; the period of this diet is ninety-six consecutive hours.	Prisoners on Mills are given 14 Chittaks of atta instead of 12 Chittaks, vide paragraph 7 of letter No. 344 II, dated 20th July 1899, from the First Assistant to the Honourable the Agent to the Governor-General and Chief Commissioner, Ajmer-Merwara.

NOTE.—A complete statement of all the Diet Scales in use for labouring prisoners according to length of sentence should be given in column 1, with details as to the articles used, and the variations in different days of the week.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

AJMER JAIL OFFICE;
The 3rd March 1906.

STATEMENT No. XIII.—Showing the net cash earnings of convicts sentenced to labour in the Central Jail at Ajmer during the year 1905.

1	2	3	4	5	6	7	8	9	10	11	12	13
Serial No.	NAME OF JAIL.	Average number sentenced to labour.	Average number employed on jail manufacture.	Cash balance on manufacturing account in hand on the 1st January.	Cash drawn on manufacturing account during the year.	TOTAL.	Paid into Treasury on manufacturing account.	Cash balance in hand on manufacturing account on the 31st December.	TOTAL.	Cash Earnings (being total of column 10 less total of column 7).	Average earning per head calculated on column 3.	Average earning per head calculated on column 4.
1	Ajmer Central Jail .	(a) 385-83	218-20	R a. p. 147 6 10	R a. p. 6,277 6 1	R a. p. 6,424 12 11	R a. p. 10,143 12 9	R a. p. 61 13 0	R a. p. 10,205 9 9	R a. p. 3,780 12 10	R a. p. 9 12 9	R a. p. 17 5 3

NOTE.—All proceeds of labour whether paid for by transfer account, by other Departments, or by cash are to be included in this Statement; but no mere estimate of work done by convicts as prison servants or in manufacturing clothing or other articles required for Jail purposes is to be included.

(a) Figures in columns 3 and 4 should correspond with those entered in columns 3 and 4 of Annual Return No. XII.

STATEMENT No. XIV (FINANCIAL).—Showing the net cost of the prisoners in the Ajmer Central Jail for the year 1905.

1	2	3	4	5	6	7	8
Serial No.	NAME OF JAIL.	Total cost of maintenance (column 10 of Statement X).	Average cost of maintenance per head (column 11 of Statement X).	Total cash earnings (column 11 of Statement XIII).	Average cash earnings per head of average strength.*	Net cost to Government (column 3 less column 5).	Average net cost per head of average strength (column 4 minus 6).
1	Ajmer Central Jail .	R a. p. 22,827 0 0	R a. p. 55 5 10	R a. p. 3,780 12 10	R a. p. 9 2 9	R a. p. 19,046 3 2	R a. p. 46 3 1

* To calculate the "average cash earnings per head" for column 6 of this statement, the total cash earnings in column 5 should be divided by the total of column 3, Statement X.

AJMER JAIL OFFICE;
The 3rd March 1906.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. XVIII (Vital).—Showing the mortality among the convicts in the Ajmer Central Jail during the year 1905 according to the length of time passed in Jail.

REPORT

ON

SANITATION, DISPENSARIES, AND JAILS IN
RAJPUTANA FOR 1906,

AND ON

VACCINATION FOR THE YEAR 1906-1907.

Published by Authority.

CALCUTTA :
OFFICE OF THE SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA.
1907.

CALCUTTA:
GOVERNMENT OF INDIA CENTRAL PRINTING OFFICE,
8, HASTINGS STREET.

No. $\frac{316}{2-VIII}$ OF 1907.

FROM

THE HON'BLE MR. E. G. COLVIN, C.S.I., I.C.S.,
*Agent to the Governor-General,
in Rajputana, and Chief
Commissioner of Ajmer-Merwara,*

TO

SIR LOUIS W. DANE, K.C.I.E., C.S.I., I.C.S.,
*Secretary to the Government of India
in the Foreign Department.*

Dated Mount Abu, the 31st August 1907.

SIR,

WITH reference to the correspondence ending with the letter from the Government of India in the Foreign Department, No. 215-I.A., dated the 16th January 1907, I have the honour to forward the Annual Report on Sanitation, Dispensaries and Jails in Rajputana for the year 1906, and on Vaccination for 1906-1907, prepared by Lieutenant-Colonel H. N. V. Harington, I.M.S., Residency Surgeon and Chief Medical Officer in Rajputana.

2. The question of the sanitation of Ajmer has received particular attention during the year under report. Since its close the services of Mr. Silk, Sanitary Engineer, Bengal, have been secured through the Government of India to inspect and report on a sanitary scheme for Ajmer City and his conclusions are now receiving special consideration from myself and from the Ajmer Municipal Committee. The first step towards the amelioration of the sanitary condition of Ajmer is the provision of an ample and permanent water supply and this question is being carefully examined by the local authorities.

3. In the hot weather of 1906, when famine was at its height, cholera visited 13 States in Rajputana and Ajmer-Merwara with a total mortality of 4,998 persons up to the end of November 1906 when the epidemic ceased. Fortunately plague was less virulent than on previous occasions and 826 deaths only occurred during the year against 22,263 in the year 1905. It is satisfactory to observe that the value of evacuation is generally recognised, though other measures, such as disinfection, inoculation and rat destruction, have still to contend with caste and other prejudices.

4. Fever was very prevalent in the Province during the year but its mortality was, relatively to the population, less than in the years 1905 and 1904. The vital statistics of Native States are not sufficiently accurate to enable reliable conclusions to be drawn; but the drop in the birth-rate in 1906 to 10.36 per mille of the population from 15 per mille in the preceding year was doubtless due to the famine and scarcity which prevailed in the first

eight months of the year. The decrease in the birth-rate appears to have been most marked in Kotah, Bundi, Karauli, Bharatpur and Dholpur.

5. The circumstances of the year were not such as to make any considerable improvement possible in medical and sanitary arrangements in the Native States. The Mewar and Bharatpur Darbars, however, each added a new Dispensary to those already existing, and 169 Hospitals and Dispensaries now administer to the medical needs of the Province. Better results may be anticipated when good seasons have improved the finances of the States.

6. The medical arrangements in connection with the famine in Ajmer-Merwara were adequate.

I have the honour to be,

SIR,

Your most obedient Servant,

E. G. COLVIN,

*Agent to the Governor-General
in Rajputana, and Chief
Commissioner of Ajmer-Merwara.*

REPORT
ON
SANITATION, DISPENSARIES, AND JAILS IN
RAJPUTANA FOR 1906,

AND ON
VACCINATION FOR THE YEAR 1906-1907.

SECTION I.—SANITATION AND VACCINATION.

METEOROLOGY AND ITS RELATION TO FOOD-SUPPLY.

1. During the year under report 19·34 inches of rain were registered in Ajmer against 7·11 inches in the previous year, the average of previous six years was 16·40 inches.

Rainfall in Ajmer-Merwara.
2. The rainfall recorded in Rajputana generally has been much more than in the previous year. In Western Rajputana States, Eastern Rajputana States, Bikaner, Kotah, Jhalawar and Mewar the rainfall was above the yearly average.

Rainfall in Native States.

The rainfall during the year under report in Jaisalmer State was unusually heavy, the heaviest since 1893, when the rainfall was 15·24. In Jaipur, Alwar and Kishangarh the rainfall was below the average.
3. Wells and tanks have generally been replenished to some extent by showers during the cold weather and there is sufficient water throughout the States of Rajputana. The crops have been mostly good and grass has been fairly abundant.

VITAL STATISTICS, BIRTHS AND DEATHS.

4. According to the birth-return there were 13,789 births registered in Ajmer-Merwara in 1906 against 17,802 in 1905, a decrease of 4,013, which may largely be attributed to the conditions of scarcity in the previous year, general poverty, and consequently fewer marriages. Of the total births registered 7,335 were males and 6,454 females, and the birth-rate was 28·91 per mille of population against 37·32 per mille in the previous year. The percentage of male to female births was 113·65 against 116·10 in 1905. The birth-rate exceeded the death-rate in 10 out of 23 circles of registration against 18 in the previous year.

Births in Ajmer-Merwara.
5. During the year there were 15,367 deaths registered in this Division against 16,332 in 1905, a decrease of 965, which is mainly due to the absence of plague in a severe epidemic form, and to generally more healthy climatic conditions. This gives a death-rate of 32·22 per mille of population against 34·25 in 1905. The total mortality from Respiratory diseases was 322 against 561 in the previous year, a decrease of 239.

Deaths in Ajmer-Merwara.
6. The mortality from fever shows an increase of 1,956 as compared with previous year, the figures for 1905 and 1906 being 10,336 and 12,292, respectively; this increase is largely due to malarial fever the result of a better rainfall; the fever was prevalent from August to December.
7. The mortality among children under 5 years of age was 53 per cent against 37 per cent. in the previous year, an increase of 16 per cent. which it

probably due to the prevalence of malaria and diarrhœa among children whose systems were weakened during previous years of scarcity.

8. The total number of deaths from cholera was 284 against *nil* in 1905.

9. The deaths exceeded births in 13 circles against 5 in the previous year.

TABLE I.—Births and Deaths of Native States.

*NOTE.—The information required for this table cannot be obtained in full from Jaisalmer. The total, therefore, of column 16 does not agree with the totals of nine preceding columns.

10. The above table shows the registration of births and deaths in the Native States of Rajputana. Registration has been attempted in 20 Native States chiefly in their capital cities, as in the previous year.

Births and Deaths in the Native States of Rajputana.

11. The agencies for collecting Vital Statistics in these States are still very imperfect and attempts are being made to have a special registration department formed under the direct control of each Agency Surgeon and to impress on the Darbars the advisability and advantages of correct returns of Vital Statistics, especially in relation to their value in the early detection of epidemics, and the prompt institution of protective measures.

TABLE II.—*Number of Cholera cases and Deaths reported in Ajmer-Merwara and in Native States during the year 1906.*

12. The above table shows the cases and deaths from cholera reported in Ajmer-Merwara and in Native States during 1906.

13. There were 410 cases and 284 deaths from cholera reported from Ajmer-Merwara during the year against *nil* in the previous year. The first cases occurred in May at Pushkar, the patients being some visitors from Malwa where cholera then prevailed. Of these 308 cases with 228 deaths occurred in the Ajmer District and 102 cases and 56 deaths in Merwara. The epidemic continued in the Division till the 31st August 1906.

14. The cholera in the Merwara District was associated with a very scanty water-supply, the wells at the time it commenced being abnormally low. This—together with the fact that the people were in many cases so poor that they had to subsist on cheap and indifferent grain food—predisposed them to choleric attacks.

15. In 13 Native States 8,632 cases of Cholera and 4,714 deaths from the disease were reported, against 4 cases and 3 deaths in 1905.

16. Cholera broke out in Bharatpur, Marwar, Jaipur, Alwar, Bikaner Kotah and Partabgarh about the same time in May, and extended to Jhalawar, Shahpura, Dholpur, Mewar, Tonk and Karauli; the disease was originally probably imported into the East and North of Rajputana, from Gwalior and the Sirsa Districts, it was most prevalent in the States noted in July 1906, there was a considerable decrease in cases and deaths in October and it totally disappeared from the Province before the end of November. Importation, infection, a low and poor water-supply, and the use of indifferent grain foods were the chief causes of cholera in Native States.

17. Kotah, Dholpur, Jaipur and Bharatpur suffered most but the disease was not of a very virulent type anywhere, and in many places only sporadic cases occurred.

IMPERIAL SERVICE TROOPS.

18. Infection was also brought into the Imperial Service Infantry lines at Alwar by a sepoy returning from a local fair called "Bhartri." He developed cholera on the 29th August and died in the Hospital on 31st. The Regiment at once marched into cholera camp. Thirty-four cases occurred among the sepoys and 2 in the Transport, 14 of these cases proved fatal, the last occurring on 11th September 1906.

19. Cholera broke out also in the Imperial Service Transport lines at Bharatpur in June 1906, where 49 cases occurred of which 22 died, and in the Imperial Service Infantry where 2 fatal cases occurred in July. The usual measures for its eradication were taken.

20. Disinfection of wells with permanganate of potash, lime and alum was regularly carried out and every possible sanitary precaution taken to prevent the spread of the epidemic.

21. A cholera map showing the districts where outbreaks occurred, the dates of first and last cases, and the death-rate per 10,000 of population is attached.

SANITATION.

22. *Ajmer City.*—The chief source of drinking water is by pipes from the Foy Sagar and to a lesser degree from certain wells both in the city and suburbs.

23. The question of removing cultivation and village sites from the catchment area and from the valley of the Foy Sagar, and other projects for perfecting and improving the quality of the water-supply is now under consideration and a specially qualified Engineer has been deputed to inspect and advise on these and other measures relating to public health.

24. If however the new sources of drinking water-supply suggested, from wells or underground dams in the Sagarmati and Sursuti river beds, prove successful, it may not be so necessary to expend a large sum of money on the sanitation of the Foy Sagar catchment area or the filtration of Foy Sagar water.

25. The sanitation of the Ajmer City is not satisfactory. The Sanitary Engineer noted above who has recently been deputed to Ajmer, is making recommendations and suggestions for the improvement of the sanitary arrangements of the town.

26. The site for trenching nightsoil and the arrangements for its removal and disposal are not good and cause a considerable nuisance to persons living in the vicinity. New proposals and a more thorough method of disposing of night refuse are being submitted.

27. The question regarding the substitution of open saucer drains for covered drains in the principal streets and bazaars in the city is still under the consideration of the Municipality.

28. The sanitary tramway has worked fairly satisfactorily during the year.

29. The huts in the plague observation camp near the Railway Station at Ajmer are kept in good order.

30. The sanitary improvements if they prove successful in Ajmer will be, as far as possible, recommended for adoption in the Beawar and Kekri Municipal areas, if sufficient funds are available.

31. The Municipal Committee continues to supervise sanitation in *Beawar*. A scheme for bringing water from reservoirs to the town is under contemplation in order to provide a permanent supply of wholesome potable water.

32. The old fashioned masonry built public latrines and urinals in the city are gradually being replaced by galvanized iron ones, which admit of better cleanliness. The drainage of the town, which at present is not satisfactory, is being improved.

33. Rules for the improvement of village sanitation have been introduced in the villages noted in the margin. But it is a question whether they are really enforced effectively, village authorities being proverbially apathetic; also the Civil Surgeon has no time to tour in the districts so he is unable to assist with his personal advice and encouragement.

Ajmer—Junia, Ramsar, Harmara, Pushkar, Srinagar and Jethana.

Merwara—Beawar, Jawaja, Todgarh, Bhim and Barar.

34. The Commissioner, Ajmer-Merwara, reports that no regular forms for Girdawars' inspection reports have as yet been introduced, nor have any periodical returns of results of such inspections and of other matters pertaining to the enforcement of the rules, been called for. Action is being taken in this direction.

NATIVE STATES.

35. *Jaipur*.—The light railway continues to perform valuable work in removing foul water, nightsoil, and dead animals, etc. Owing to the deficient rainfall it was necessary to again deepen the city wells and 29 wells have been provided with cutstone masonry or wooden curbs.

36. *Jodhpur*.—The sanitary arrangements at present in force in Jodhpur city are not satisfactory. The Residency Surgeon, Western Rajputana States, reports that sanitary defects, etc., have been frequently noted in the weekly reports, but no action to remedy them seems to have been taken. The Mehkma Khas Raj Marwar write that to improve the sanitation of the Jodhpur City the Darbar are contemplating the reorganization of the Municipality on a partially elective system and mean to extend the scope of their authority, a measure which it is hoped will result in better general sanitation and improved conservancy. They are also contemplating introducing rules for public health on the lines of those in force in the Ajmer Municipality and regulations for town and village sanitation throughout the State.

37. *Bharatpur*.—The report from Mr. C. A. White, M.I.C.E., Superintending Engineer, Indian Public Works Department, on the drainage system, is still under the consideration of the Administration.

38. *Alwar*.—Owing to the scarcity of water in Alwar City, 8 wells were deepened and cleaned by the Alwar Municipality on which a sum of Rs. 2,182-8 was expended.

39. The Agency Surgeon is not now President of the Municipality of Alwar and consequently is not in so good a position to supervise the municipal sanitary arrangements, etc., as formerly. However, the Assistant Surgeon is a member of the Committee so sanitary measures are not neglected.

40. *Partabgarh*.—There is some improvement in conservancy arrangements reported in Partabgarh City. The Hospital Assistant attached to the Dispensary has been appointed "Health Officer" during the year under report.

GENERAL REMARKS.

41. There are good conservancy arrangements in most capital cities under the general supervision of Agency Surgeons. The exceptions are those under Western Rajputana States, Eastern Rajputana States, Mewar and Haraoti Agencies, in which conservancy arrangements are worked by a Committee or Board, or the Police Department, under the direct control of the Council or Darbar.

42. Owing to famine and scarcity the tours of most of the Agency Surgeons were curtailed. However, the necessity for improvement in village sanitation and its effects on the public health is constantly being urged upon Darbar officials.

VACCINATION.

STATEMENT I.

43. In the Ajmer Division the number of successful primary vaccination during 1906-1907 was 11,717 against 14,263 in 1905-1906 and successful revaccination 105 against 347 in the previous season. This decrease may be

Ajmer-Merwara.

attributed to the smaller number of births during the year and from causes already noted under vital statistics in paragraph 4 of report.

44. Each vaccinator operated on 807 against 996 in 1905-1906; and the average cost of each successful case advanced from 37 pies to 46 pies.

45. The number of vaccinators was the same as in 1905-1906 with one Native Superintendent.

46. The Civil Surgeon inspected 624 children against 923 in the previous year, all of whom were found successfully vaccinated, and the Native Superintendent inspected 261 villages and saw 6,076 vaccinated children against 9,369 in 1905-1906.

47. The vaccination returns from the Native States also show a falling-off in numbers during the last season which is attributed to a fall in the birth-rate following the famine of 1905-1906, small-pox, plague and prevalence of

Native States.

malarial fever after the rains. Even the vaccinators themselves suffered from fever and were frequently unfit to work. The average total number of primary successful vaccination in Native States was 253,055 against 275,550 in 1905-1906.

48. The average number of vaccinators was 166 against 168 in 1905-1906. Alwar and Tonk having reduced establishment by two and Jaisalmer by one and Marwar, Bharatpur and Karauli having employed one extra man; the cost of each case was 20 pies instead of 18 pies.

STATEMENT II.

49. The expenditure on vaccination in Native States was R26,692-14-7 compared with R25,420-14-6 in 1905-1906, the increase in cost being due chiefly to increased travelling allowances to vaccinators in Jaipur State.

50. The Residency Surgeon, Jaipur, reports that the defects in the vaccination work done in the different Thikanas still exist, but they are kept in view and attempts are constantly being made to remedy them.

51. Lieutenant-Colonel P. D. Pank, I.M.S., Residency Surgeon, Jaipur, has formulated a new scheme with a view to improve the entire Vaccination Department in Jaipur and to ensure greater regularity, better quality and a larger value of work; this scheme has now been sanctioned by the State Council.

52. Of the work performed in Marwar State 2,263 primary vaccinations were done by Hospital Assistants in Marwar Dispensary towns with a successful percentage of 99.71 and the Hospital Assistants in Sirohi State performed 320 vaccinations, 98.12 per cent. of which were successful.

Marwar State.

Sirohi State.

53. The presence of plague in most of the States in Rajputana during the end of the season had an appreciable effect on vaccination work; it also prevented Agency Surgeons inspecting as many vaccinated children as they might otherwise have done.

54. Vaccinations were performed entirely by the Hospital Assistant attached to the Agency Hospital at Deoli, and consequently no expenditure incurred on establishment. A sum of R8-2 shown in column "Contingencies" is the cost of the lymph.

Deoli.

55. The following table shows the number of towns and villages inspected and successful vaccinations seen by the Agency or Residency Surgeons in Native States :—

Designation.	Number of towns and villages inspected.	Number of successful Vaccination cases seen.
Residency Surgeon, Jaipur	766	16,968
Agency Surgeon, Kotah and Jhalawar	1,031	6,894
Agency Surgeon, Eastern Rajputana States	72	3,951
Agency Surgeon, Alwar	329	3,586
Residency Surgeon, Western Rajputana States	148	3,079
Residency Surgeon, Mewar	181	2,736
Civil Surgeon, Bikaner	25	2,137
Agency Surgeon, Haraoti and Tonk	5	342
Medical Officer, Dungarpur State	2	198

56. In addition to the presence of plague, to the numerous transfers of Agency Surgeons in some of the States is attributed, to a large extent, the comparatively small number of villages and towns inspected by them.

57. The Residency Surgeon and Chief Medical Officer in Rajputana in his winter tour of inspection examined 2,099 vaccinated children, the results showing very good work on the whole.

58. Lymph is kept up throughout the year in most of the important States by arm-to-arm vaccination during the hot weather, and humanized lymph is generally used. Buffalo calf lymph is also largely employed in several States.

SECTION II.—DISPENSARIES.

STATEMENT A.

Number of Dispensaries.

59. During the year under report there were 169 hospitals and dispensaries in Rajputana against 167 in the previous year: two dispensaries were established, one at Bareta in Bharatpur State on the 20th July 1906, and another at Rajnagar in Mewar on the 21st July 1906.

60. The dispensaries have been classified as under:—

I. State Public	9
II. State special	10
V. Private non-aided (<i>i.e.</i>) Native States	150

Improvements and additions to Hospitals and
Dispensaries.

61. Considerable improvements to existing hospitals and dispensaries have been carried out during the year under report.

62. The name of the Ajmer

Ajmer.

General Hospital has been changed to "Victoria Hospital" in consequence of local subscriptions to the Victoria Memo-

rial Fund being devoted to the enlargement and improvement of the Hospital.

63. The operation room of the Hewson Hospital at Jodhpur has been improved both in construction and appli-

Jodhpur.

ances, and the removal of the out-patient

department from the inside main-building to the Hospital entrance has greatly facilitated work. The floor of the Jaswant Hospital for women is being laid with marble slabs and new aseptic furniture is being provided for it.

64. Arrangements are being made to open and equip the new medical Ward for the Marwar Police Force and the Darbar have sanctioned Rs. 1,500 for the purpose.

65. Plans and suggestions for the arrangement and extension of the 1st Branch Dispensary, Jodhpur, have been submitted to the Darbar for sanction.

66. The new dispensary buildings at Kaman and Nadbai were completed during the year and occupied on the 1st August, and 19th November 1906, respectively, the latter in consequence of the transfer of the Tehsil and Headquarters from Akhegarh.

Bharatpur.

67. A new operating room for the Walter Female Hospital at Tonk, sanctioned by the Tonk State Council, is under construction.

Haraoti and Tonk.

68. Wire gauze doors to the operating room and the provision of better store rooms have been sanctioned by Government for the Agency Hospital, Deoli.

69. The new operating theatre at the Bhagwan Dass Hospital at Bikaner is still in course of construction. Rs. 30,000 have been sanctioned by the Darbar for the construction of a Female Hospital in the city.

Bikaner.

70. The new Alexandra Hospital at Alwar is progressing slowly in construction and there is no hope of its being completed during the current year. The

Alwar.

Agency Surgeon, Alwar, trusts that electricity will be installed in this hospital so that X ray and other electrical medical appliances may be instituted. The new Rajgarh Hospital has been determined on and the foundations laid. The construction of new dispensary at Tijara is under the consideration of the Darbar. New instruments have been supplied to many of the out dispensaries

STATEMENT B.

Medical Relief.

71. Shows the total number of patients treated both in-door and out-door separately during the year under report.

72. One million two hundred eighty thousand one hundred and forty-three patients of all classes, excluding those in famine relief works in Rajputana, were treated against 1,090,945 in 1905, an increase of 189,198 in the number treated in the hospitals and dispensaries as shown in the regular standard—Statements B, C and F. This increase is attributed to the prevalence of malarial fever, cholera and small-pox.

73. The general physical tone of a large section of the poorer classes in some States and districts was much reduced from previous years of scarcity and insufficiently nutritious food, and this must have been an important factor in the increased sickness.

74. Of the total number of patients treated 16,598 were in-door and 1,263,545 out-door against 14,624 in and 1,076,321 out-door in the previous year. The percentage of mortality amongst in-patients was 7·69.

STATEMENT C.

75. Shows the diseases for which patients were treated in hospitals and dispensaries in Rajputana. The percentage of cases treated under each chief cause during the years 1905 and 1906 is as follows:—

Diseases.	Percentage during 1905.	Percentage during 1906.
(a) Malarial fevers and spleen	14·83	20·83
(b) Rheumatism	4·80	3·83
(c) Diseases of the eye	12·07	12·00
(d) Lungs and Respiratory diseases	7·73	6·72
(e) Dysentery and Diarrhoea	3·62	4·26
(f) Ulcers	10·51	9·30
(g) Skin diseases	10·34	9·55
(h) Injuries	2·45	2·17
(i) Syphilis	1·89	1·69

76. Some valuable work has been done with the X rays apparatus and Finsen light in the Victoria Hospital, Bharatpur, during the year under report.

LEPROSY.

77. Three hundred and forty-two patients were treated for leprosy in Rajputana hospitals and dispensaries during the year under report against 319 in 1905 and 368 in 1904. No special methods of treatment have been employed.

78. In Marwar a Hospital Assistant has been put in visiting medical charge of the Leper Asylum at Nimba Nimbri 8 miles from Jodhpur.

SERUM TREATMENT.

1. SNAKE POISON.

79. During the year under report only one case of snake bite was treated with Antivenine in Rajputana. The case occurred at Deoli, the snake was a "Karait," the patient rallied but died on the third day from hæmorrhage and consequent heart failure.

2. DIPHTHERIA.

80. Anti-diphtheritic serum was used with success in two cases of Diphtheria in Ajmer. Two other persons were also inoculated as a precautionary measure.

3. ANTI-PLAGUE SERUM.

81. Preventive inoculation with anti-plague serum was performed on 549 persons and has been noted under "Plague."

PLAGUE.

82. During the year from 1st April 1906 to 31st March 1907 2,685 cases of plague and 2,066 deaths were reported and 108 towns and villages infected in Rajputana, including Ajmer-Merwara, against 25,715 cases and 22,564 deaths and 693 infected towns and villages in 1905-1906. The percentage of total plague deaths to population was 0.58—*vide* Table attached, which shows the severity of the epidemic in Rajputana since 1896.

83. There were only 59 cases of plague with 36 deaths reported in Ajmer-Merwara in 1906-1907 against 2,113 cases and 1,648 deaths in the previous year. Of these 54 cases and 31 deaths occurred in Ajmer and 5 fatal cases in the Beawar Town in Merwara.

84. Practically speaking there was no plague in the district during 1906-1907, as only 4 indigenous cases and 2 deaths occurred in April 1906 at Jaithana in the Mangaliawas Circle in Ajmer where the disease prevailed in the previous year; all the other cases were imported, as noted below :—

	Cases.	Deaths.
Nasirabad Town	3	1
Kekri Town	1	0
Beawar	5	5
Ajmer Railway Station	46	28

85. Much credit is due to the thorough and tactful manner in which Honorary Captain Thompson, I.S.M.D., performed his duties as Plague Inspecting Officer, Ajmer Railway Station.

86. Two thousand six hundred and twenty-six cases and 2,030 deaths were reported from Native States of Rajputana during the year under report against 23,602 cases and 20,916 deaths in 1905-1906. Of these 68 cases with 46 deaths were imported, 2,527 cases and 1,963 deaths were indigenous and 31 cases and 21 deaths were detected at the Railway Inspecting Stations as follows :—

	Cases.	Deaths.
Abu Road Railways Station	28	21
Marwar Junction Station	3	0

87. The inspection at Railway Stations for plague is most valuable in Rajputana. Each of the cases detected would have been a probable centre of an epidemic, and when such centres occur in some of the outlying districts in Native States, considerable delay occurs in starting precautionary and controlling measures, and the impossibility of proper and early supervision results in further sources of infection, and the disease spreading.

88. Plague continued to exist in Native States till the end of May 1906 after which the States were free for four months. In October, it again broke out at Bhilwara in Mewar State, by importation from Central India where the disease was in epidemic form.

89. In ten Native States both indigenous and imported plague cases were reported.

In three States only imported cases occurred while six States were free from this disease.

90. In infected towns and villages of Native States evacuation, disinfection, desiccation, segregation and surveillance were carried out. Also inoculation in Mewar.

General precautionary measures.

91. It is satisfactory to note that the villagers are beginning to appreciate the advantages of early evacuation. The people, however, as a rule, object to disinfection of houses and effects.

92. Four hundred and forty-three prisoners and 106 other persons were inoculated by the Residency Surgeon, Mewar, with anti-plague serum obtained from the Research Laboratory, Bombay.

93. Destruction of rats with "Common-sense Rat Exterminator" was attempted at Udaipur in the Jail, Jail guard lines and Lansdowne Hospital, but as the measure could not be carried out generally owing to caste prejudices, it was probably of little utility.

94. It will be noticed that the months of February, March and April are those in which plague breaks out and is most prevalent in Rajputana and these times correspond with the intensity of the disease in the Punjab, United Provinces, Bombay and Karachi, in fact all round the borders. It is also a time of year many native persons are travelling, and these import the disease, their numbers being too great for the ordinary plague inspecting staff to grapple with. Many of those coming from infected areas, alight at small stations and escape observation and thus introduce the disease into Native States.

95. On the 31st March 1907 plague was in existence in Bharatpur, Jaipur, Alwar, Mewar, Partabgarh, Banswara, Tonk, Shahpura and Marwar.

96. As the plague outbreak in Rajputana was comparatively slight, no map has been attached to the report.

CANCER.

97. Reports on cancer investigation have been necessarily incomplete owing to local difficulties in research, and no remarks of any special value can be deducted from them.

STATEMENT F.

98. Shows the classes and sexes of both in-door and out-door patients treated in the dispensaries of Ajmer-Merwara and of Native States of Rajputana as noted below :—

	1905.	1906.
Europeans and Eurasians	2,009	2,261
Hindus	739,287	868,647
Musulmans	278,668	324,289
Other classes	70,981	24,946

99. This calls for no comment as it is merely introduced for statistical purposes.

STATEMENT G.

Operations.

100. During the year under report a total number of 65,758 operations were performed on 65,032 patients in Ajmer-Merwara and in Native States of Rajputana against 65,010 operations done in the previous year. Of the persons operated on 64,612 or 99·00 per cent. were "cured," 192 or 0·29 per cent. were "relieved," 122 or 0·19 per cent. were "discharged otherwise," and 66 or 0·10 per cent. "died," while 273 or 0·42 per cent. remained under treatment on 31st December 1906.

101. Of the operations performed 998 were extraction of the lens for cataract of which 766 or 76·75 per cent. proved successful, 45 lithotomies, 107 litholapaxies and 201 amputations against 854 extraction of the lens for cataract, 43 lithotomies, 61 litholapaxies and 147 amputations in 1905.

102. In Native States, Jaipur stands well ahead of all others in surgery.

103. Owing to improvements introduced into several hospitals abdominal operations are now able to be performed with better prospects of success, under thorough aseptic conditions.

STATEMENT H.

104. Shows the income and expenditure of Government dispensaries and hospitals and the expenditure only on those in Native States.

105. In Ajmer-Merwara the total expenditure during the year under report amounted to R17,514 against R34,695 in 1905, the decrease of R17,159 is mainly under expenditure on "buildings and repairs."

106. The Ajmer Victoria Hospital has lately been much improved in resources and equipment and needs only a somewhat larger income to enable it to meet the larger demands on it by the public.

107. The invested capital of the dispensaries in Ajmer-Merwara remained the same as in the previous year.

108. The Civil Surgeon, Ajmer, reports that the Deolia Dispensary is the only institution in the district which shows a diminished number of attendance. The abolition of this dispensary and the establishment of a good

dispensary at Bhinai, which is much more favourably situated for the needs of the southern part of the district, have therefore been recommended. The plans for the new dispensary are in the hands of the Executive Engineer and it is hoped that this much-needed reform will soon be undertaken.

109. The total expenditure on Political Agency and Salt Dispensaries fell from Rs12,713 to Rs12,673 in 1906, but there was a considerable reduction in expenditure on establishment owing to the services of Dr. P. Deb in medical charge of the Salt Department at Sambhar having been dispensed with, and the appointment of a Military Assistant Surgeon in his place on a reduced pay of Rs150 per mensem; the pay of the former was Rs416-10-8 per mensem or Rs5,000 a year as sanctioned by the Government of India. Also the transfer of a senior Hospital Assistant from Pachbadra and appointment of a junior Hospital Assistant there.

110. The total expenditure on hospitals and dispensaries in the Native States of Rajputana rose from Rs3,34,734 in 1905 to Rs3,36,418 in 1906 which is due to increase in expenditure on medical staff on account of promotion of Hospital Assistants, and in most other remaining heads owing to a considerable increase in the number of both in and out-door patients treated, due to the prevalence of malarial fevers, cholera, etc. In expenditure on buildings and repairs however there was a decrease of Rs10,371 in Jaipur and Bikaner.

111. Of the total cost on hospitals and dispensaries in these States Rs69,460 were expended in Jaipur, Rs47,886 in Marwar, Rs35,357 in Alwar, Rs35,063 in Kotah, Rs32,662 in Bharatpur, Rs29,266 in Bikaner, Rs28,350 in Mewar, Rs10,351 in Tonk, Rs8,090 in Jhalawar, Rs7,681 in Dholpur, Rs4,846 in Karauli, Rs4,119 in Bundi, Rs3,186 in Kishengarh, Rs2,761 in Sirohi, Rs2,708 in Jaisalmer, Rs2,267 in Banswara, Rs2,037 in Dungarpur, Rs1,713 in Shahpura, Rs1,425 in Partabgarh and Rs543 in Kushalgarh.

112. The average cost of each case treated in Ajmer-Merwara and in Native States Hospital and Dispensaries was 49 pies and 54 pies respectively against 127 pies and 63 pies in 1905.

113. In most of the Native States a scheme for improving the position and pay of compounders, dressers, and others of the menial departmental staff has been sanctioned. The pay and prospects of these men in Ajmer-Merwara and other Government institutions are most unsatisfactory, and proposals for improving them will be submitted shortly.

114. As regards Kekri in the Ajmer District, a large town in a populous neighbourhood, recommendations for the entertainment of an Assistant Surgeon there in place of a Hospital Assistant have already been made.

MISSION HOSPITALS.

115. During the year under report there were six Mission Hospitals in Rajputana, the same as in the previous year.

116. The following table shows the total number of in and out-door patients treated and operations performed in Mission Hospitals during the year 1906:—

Name of Hospital.	OUT-DOOR PATIENTS.		In-patients.	Operations.	REMARKS.
	Old.	New.			
Ajmer (Male)	53,394	16,318	128	1,258	
Ajmer (Female)	9,932	4,709	147	352	1,525 patients were visited at their homes.
Nasirabad	30,838	10,129	220	907	
Ashapura	7,869	2,629	...	96	
Udaipur	29,727	11,410	247	934	121 patients were visited at their homes.
Jodhpur	28,700	6,592	98	687	
TOTAL	160,460	50,787	840	4,234	

RAILWAY HOSPITALS.

117. There were six Railway dispensaries on the Rajputana-Malwa Railway within the limits of Rajputana, viz., one at Abu Road, one at Sojat Road, two at Ajmer, one at Phalera and one at Bandikui.

118. Twenty-three thousand three hundred and seven persons were treated in these hospitals during the year under report, *viz.*, 3,834 at Abu Road, 2,336 at Sojat Road, 9,246 at Ajmer, 2,661 at Phalera and 5,230 at Bandikui.

INSPECTIONS.

119. The Residency Surgeon and Chief Medical Officer in Rajputana inspected the hospitals and dispensaries during the past season in the following cities :—

Tonk, Shahpura, Deoli, Bharatpur, Dholpur, Ajmer, Kishengarh, Jaipur, Alwar, Udaipur, Jodhpur and Bikaner.

His tour was curtailed owing to (1) the visit of His Highness the Amir of Kabul to Agra and Ajmer, (2) the difficulty of inspecting certain capitals of States off the line of rail owing to no means of conveyance being available locally on hire, Raj carriage not having been sanctioned and (3) the temporary transfers of the Chief Medical Officer from 1st January 1906 to 9th March 1906 and again from 26th June to November 1906, for seven months.

JAILS.

120. *Ajmer.*—The daily average number of prisoners in the Ajmer Jail rose, owing to famine, from 412.29 to 461.58, the total number of cases admitted in the hospital from 161, to 192, the mortality from 7 to 10 and the death-rate from 16.98 to 21.52 per mille of average strength in 1906. The Jail has been more or less overcrowded during the greater part of the year partly probably as an effect of the famine.

121. The following additions to the Jail buildings were carried out during the year by the Public Works Department.

Additions and Alterations to Buildings.

Construction of a stage to facilitate the steady working of the pump, covering of the new well, sun sheds and iron bars to the windows of officials' quarters and construction of cellular and cubicle barracks.

The renewal of wooden frames and shutters of the hospital barrack, the substitution of iron netted gratings for glass panes, improvement in ventilation of European and Eurasians barrack. Triangular additions over the entrances of workshops and gallows enclosure as suggested by the Inspector General of United Provinces and Oudh and various other structural additions. The total cost of all improvements was Rs. 4,173.

122. Of the 10 deaths in the Jail during the year 3 were due to Pneumonia, 1 to acute Bronchitis, 2 to Tuberculous disease, 1 to Dilatation of the heart, 1 to Debility, 1 to Diabetes Mellitus and 1 to Influenza.

123. The review by the Commissioner, Ajmer-Merwara, on the strength, classification, health, employment and conduct of prisoners, nature of sentences, Jail manufactures and expenditure of the Ajmer Jail is given as Appendix A of the report, together with statements.

124. *Native States.*—The daily average number of prisoners in these Jails rose from 4824.97 to 4964.02, a slight increase which is probably due to famine and scarcity, the number of admissions from 2,026 to 2,489, the mortality from 95 to 117 and ratio of deaths per mille of average strength from 19.68 to 23.55 in 1906.

125. *Jaipur.*—There has been still some overcrowding in the Central Jail throughout the year. The daily average sick rose from 5.08 in 1905 to 6.38 in 1906. In the District Jail the average daily sick fell from 5.63 to 4.52 in the year under report. The health of the prisoners in both the Jails was fairly satisfactory.

126. The Residency Surgeon, Jaipur, reports with regret the death of Rai Sahib Hira Singh, Superintendent of Jails, Jaipur, in 1906, under whose management the City Jails made great and substantial progress in all departments especially in factories. He was succeeded by Rai Sahib Nourang Rai, an able and experienced Jail Officer. The steady improvement in the health and condition of the prisoners and in the management of these Jails as noted annually still continues.

127. The City Hawalats (Foujdari and Police) are both periodically visited by the Superintendent and recommendations made to the Council in regard

to them. During the past four years the accommodation of these lockups has been much improved.

128. *Jodhpur*.—The mortality and the death-rate in this Jail decreased from 16 and 14·77 per mille of average strength in 1905 to 11 and 10·98 in 1906. There was a large amount of scurvy among the prisoners during the early part of the year and energetic measures were taken to combat the disease. A very large proportion of prisoners are admitted into the Jail suffering from this disease, probably owing to the scarcity of fresh vegetables in Marwar generally.

129. The late Jailor Bichen Ram Gupta was suspended in March 1906 and Munshi Rodha Mull was put in temporary charge with Police Inspector Ram Singh to assist him, till permanent arrangements could be made. The improvement in the Jail under these officers in spite of their inexperience in Jail management, is very greatly to their credit.

130. In November the services of an European Superintendent Mr. McGraith were obtained, and further improvement is anticipated, especially when the full staff sanctioned by the Darbar is entertained.

131. The Jail was inspected by the Inspector-General of Jails, United Provinces, at the request of the Darbar, the improvements now instituted in Jail administration are largely due to his advice.

132. The Jail factory is undergoing a complete renovation and it is hoped that the Jail will soon be able to supply all Raj departments with blankets, clothing and many other articles of general utility and thus cause a saving to the State.

133. A new cook-house is under construction and the conservancy of the Jail and its water-supply, both for drinking and bathing purposes, is gradually to be put on a better and improved basis.

134. *Kotah*.—The health of the Jail has not been so good as in 1905, the average daily number of sick was 14·09 as against 8·98 in the previous year, the increase of sickness is attributable to the malarial epidemic which prevailed throughout Kotah after the rains. One case of cholera occurred in the Jail, the patient was transferred to cholera camp where he died.

135. *Udaipur*.—There has been overcrowding in the Jail throughout the year. The total number of cases admitted into hospital rose from 50 to 120, the mortality from 9 to 16 and the death-rate from 19·96 to 31·81 per mille of average strength in 1906, which is attributed to the prevalence of malarial fever and bowel diseases after the rains. Of the 16 deaths, 4 were due to old age and debility and 2 were from amongst the prisoners received in bad health from the Morella Jail.

136. A tiled Durrie shed has been added to the Jail and a dead-house has also been constructed outside the Jail.

137. The Morella Jail (Hawalat) is under the supervision of the Foujdari Court and is only occasionally seen by the Residency Surgeon. He suggests that a Hospital Assistant should be put in medical charge of this Jail.

138. *Partabgarh*.—In Partabgarh the building of a new Jail is in progress. The daily average number of sick in this Jail rose from 1·68 in 1905 to 1·92. The mortality was 2 against *nil* in the previous year.

139. *Dungarpur*.—The Jail is at present undergoing considerable improvement, a new story is being added to the main building. This will give greater accommodation (for 44 prisoners) and prevent overcrowding. The mortality in this Jail fell from 31·05 to 19·29 per mille of average strength.

140. There were no deaths in the Jails at Shahnoura and Banswara and the daily average number of sick fell from 1·46 and 4·27 in 1905 to ·95 and 2·97 in 1906.

141. *Alwar*.—Two new barracks for 158 prisoners and 4 solitary cells have been constructed during the year to prevent overcrowding. Of the 296 cases admitted into the hospital 204 in-patients were suffering from malarial fevers with 3 deaths and 14 cases from Pneumonia with one death.

142. Two cases were admitted into the hospital with small-pox in May and June. They were segregated outside the Jail and their clothes, etc., were disinfected. All prisoners who had no former marks of vaccination were vaccinated, some were also revaccinated. Mr. McGraith, Superintendent, Central Jail, Alwar, was transferred to Jodhpur Jail during the year.

143. *Bharatpur*.—There has been considerable overcrowding in the Central Jail at Bharatpur especially since the abolition of the District Jail at Dig in April 1906 and in consequence the daily average number of sick rose from 6.17 in 1905 to 7.76 in 1906 and ratio of death per mille of average strength from 32.85 to 44.73.

144. There was a considerable increase in daily average strength, number of sick and mortality in the Central Jails at *Dholpur* and *Karauli* which was partly due to famine and partly to prevalence of malarial fevers and bowel complaints after rains.

145. *Bikaner*.—The Jail, as usual, is quite up to date in every way. There were 4 deaths against 3 in 1905 from Anæmia, Ascites, Asthma and Typhoid fever.

146. Steady if slow progress is being made year by year in Jail management in the Rajputana States and most of the Jails are in good order. The water-supply, the food of prisoners and the vegetable gardens of the Jails are receiving more attention than hitherto.

147. The Residency Surgeon and Chief Medical Officer in Rajputana inspected the Jails at Ajmer, Kishengarh, Jaipur, Alwar, Udaipur, Jodhpur, Bikaner, Tonk, Shahpura, Bharatpur and Dholpur, with the result that many improvements were sanctioned which will be carried out gradually as funds are available.

148. *Qualified Medical Staff*.—The following table shows the names of Commissioned Medical Officers who served in the different appointments and States in Rajputana during the years 1905-1906 respectively :—

DESIGNATION.	PERIOD FOR				Name of officer.
	19 5.		1906.		
	From	To	From	To	
Residency Surgeon and Chief Medical Officer, Rajputana.	1st January 1905.	26th December 1905.	10th March 1906.	25th June 1906	Lieutenant-Colonel D. ff. Mullen, I.M.S.

	...	...	7th December 1906.	31st December 1906.	Major W. E. Scott-Moncrieff, I.M.S.

149. Captain J. R. J. Tyrrell, I.M.S., was Famine Medical Officer, Ajmer-Merwara, from 13th January to 18th November 1906.

150. *Warrant Officer*.—Honorary Captain Thompson, I.S.M.D. (retired), was on plague duty at Ajmer during the year.

151. *Assistant Surgeons*.—Assistant Surgeon I. T. Mittra on Famine Inspection duty in Merwara District was transferred to Bharatpur as Assistant Surgeon to the Victoria Hospital there from the 1st September 1906 and Assistant Surgeon Onkar Singh on Rajputana unpensionable graded list, late in charge of the Kishengarh Raj Dispensary, was taken into Government pensionable service and appointed to the Beawar Dispensary on the 31st August 1906. The appointment of the Medical Adviser to the Maharaja of Bharatpur was vacant throughout the year. Assistant Surgeons Harak Chand and William Sadgun Desai were taken on Rajputana unpensionable graded list and put in charge of the Alwar General Hospital and Tonk Suddar Dispensary on the 24th February and 17th April 1906 respectively. Assistant Surgeons on this list are also at Jodhpur, Dholpur, Jhalawar, and Kishengarh. There is also a locally entertained Assistant Surgeon at Bundi.

152. At Jaipur and Khetri there are also Government pensionable Assistant Surgeons.

153. The Services of Dr. P. Deb, late in Medical charge of the Northern India Salt Revenue Dispensary at Sambhar, were dispensed with from the 13th November 1906, when he was relieved by Military Assistant Surgeon R. E. Murray, I.S.M.D., as this appointment is reserved specially for Military Assistant Surgeons.

154. In addition to 21 Hospital Assistants permanently employed by the British Government there were 164 Government Hospital Assistants in service

in Native States, 6 local class Native Doctors (one having died during the year and been replaced by a Government Hospital Assistant) and 3 locally entertained Native Doctors.

155. *Military Hospital Assistants*.—There were ten Military Hospital Assistants employed with the Imperial Service Corps in Rajputana as in the previous year.

156. *Lady Doctors*.—There were 5 Lady Doctors employed in Rajputana against 6 in the previous year, the Lady Doctor at Bharatpur having resigned.

157. *Female Hospital Assistants*.—There were only 10 Female Hospital Assistants against 12 in 1905, as two Hospital Assistants, 1 at Beawar and another at Bharatpur, resigned. Bibi Rup Kunwar, who was appointed as Medical attendant to the palace ladies at Bharatpur, has been again put in charge of the Female Dispensary there.

158. A new out-patient department and quarters for a Female Hospital Assistant are ready at Ajmer. If funds permit a female Hospital Assistant will be appointed to the medical charge of the Women's Wards of the Victoria Hospital, Ajmer.

FEMALE HOSPITALS AND DHAI CLASS FOR WOMEN.

159. Miss Campbell has been in charge of the Mission Hospital for women at Ajmer throughout the year. The number of patients treated is shown under "Mission Hospitals."

160. *Beawar*.—The female ward of the Charitable Dispensary at Beawar was closed throughout the year except for a period of one month and 11 days, viz., only 7 days in January 1906 when Female Hospital Assistant Anku Bai was in charge, and from 28th October to 30th November 1906 when Female Hospital Assistant Mrs. Lal Mahomed was in charge. During these short periods only 7 in-door and 1,221 out-door patients were treated.

161. The returns received from the Women's Hospitals in Native States of Rajputana show on the whole an increase of work done during the year under report in these institutions, which is attributed to the effects of scarcity on the health of the population and prevalence of malarial fever after the rains.

162. *Alwar*.—The Dufferin Hospital at Alwar continues to be popular and a Dhai Class is doing good work under Miss Lauder, M.D. There are 6 pupils attending the class.

163. *Jodhpur*.—There was a considerable increase in the number of both in and out-door patients in the Jaswant Female Hospital for women which is partly attributed to the fact that Miss Marsh, M.D., Lady Superintendent, was in charge of the institution throughout the greater part of the year and partly to the prevalence of malarial fever in the city.

164. The Lady Superintendent brought with her from London, on her return from leave, an up-to-date operating table presented by Her Excellency the late Lady Curzon to the Hospital. Great improvements have been made in the operation room.

165. *Udaipur*.—There was a decrease in the number of attendance in the Walter Zeunna Hospital at Udaipur during the year under report which is mainly due to the fact that there is neither a Female Hospital Assistant nor a Compounder in the hospital, without whom the successful treatment of the sick cannot be carried out, and partly to scare caused by an outbreak of plague in the vicinity of the Hospital. Miss McGlasban is most hard working and keen at her professional work, which is necessarily carried on under difficulties for want of trained staff.

166. *Bharatpur*.—Miss Hetherington held charge of the Female Hospital at Bharatpur up to the 19th February 1906 when she was relieved by Miss Reed who was succeeded by Female Hospital Assistant Mrs. Lal Mahomed on 9th June 1906. Miss Mary Campbell was appointed on the 1st August 1906 as House Surgeon but she together with Mrs. Lal Mahomed resigned on the 8th October 1906. Female Hospital Assistant Bibi Rup Kunwar was therefore recalled from the palace to take over charge of the hospital. However there was an increase in the number of both in and out-door patients treated as compared with the previous year owing chiefly to the prevalence of malarial fever in the city after rains.

167. *Karauli*.—There was a decrease in the number of out-patients treated in the Female Dispensary at Karauli which is partly due to a qualified Female Hospital Assistant not being available for the dispensary which remained in charge of the Male Hospital Assistant in charge of the Suddar Dispensary there, and partly to an outbreak of cholera in the city.

168. *Jaipur*.—It has been proposed at various times to establish a separate Female Hospital for Pardah Nashin ladies where it is much needed.

169. *Dhai Class Ajmere*.—The 6 pupils, who were mentioned in the previous year's report as being under instruction, continued to work till the end of the session, when they were examined by the Civil Surgeon, Ajmer, on the 17th April 1906. All passed, 4 taking a high place two with 90 per cent. of marks and two with 84-80 respectively. One of these women is working in Ajmer, and the rest returned to their Native States, viz., 2 to Sirohi, 2 to Kishengarh and 1 to Udaipur. The Lady Superintendent reports that she has had no opportunity of judging how these women now carry on their work. The one in Ajmer, she reports, works with her mother who is a Dhai and has a

good practice. The Lady Superintendent has seen her work on several occasions and is quite satisfied that she is working intelligently.

170. The new session opened on 1st July 1906, with 7 pupils of whom 2 came from Kishengarh, 1 from Udaipur, 1 from Rupnagar in Kishengarh State, 1 from Shahpura and 2 from Ajmer. Two of them proved utterly incapable and after a three months' trial they were advised to return to their homes.

171. All the pupils live on the premises. The accommodation being limited, it was always difficult to make suitable arrangements for them, so to house them more comfortably and at the same time to make better arrangements for operation cases, a house adjoining was also rented, at R12 a month in August 1906 and equipped at a cost of R133-10. There is now comfortable accommodation for 5 patients and 7 pupils besides the staff which consists of the matron, the nurse and a maid servant.

172. The Dhari Classes at Jaipur, Bharatpur, Alwar and Tonk have been kept up throughout the year; but the Dhari Class at Kotah was closed on the 30th November 1906, as pupils do not appear to be forthcoming.

IMPERIAL SERVICE CORPS.

173. The three Regiments of Cavalry, the Camel Corps, the two Transport Corps, and the two Regiments of the Imperial Service Infantry at Alwar, Jodhpur, Bikaner, Jaipur and Bharatpur have well equipped hospitals, which have been regularly inspected by the Residency Surgeon and Chief Medical Officer in Rajputana.

174. These Imperial Service Corps have their own medical arrangements and are under the medical charge of Military Hospital Assistants, except in the Sardar Risala at Jodhpur, where there is a Raj Assistant Surgeon. The Agency or Residency Surgeons of the States concerned have no jurisdiction over these Imperial Troops but *ex-officio* inspect and advise when required to do so.

INSANES.

175. There were 12 lunatics in the Ajmer Central Jail during the year under report, of these 3 were transferred to the Lahore Lunatic Asylum, 3 were discharged "cured" and 5 were handed over to their friends and relatives. Only one lunatic remained in the Jail on the 31st December 1906.

176. There is no Lunatic Asylum at Ajmer and consequently the insane are confined in the Central Jail, where a set of six cells is set apart for their use.

177. In Native States 182 lunatics were treated in 1906, of whom 61 were cured, 13 made over to their friends and relatives, 10 transferred to Lahore Lunatic Asylum from Jodhpur and 1 to the Agra Asylum from Kotah, 8 died and 90 remained under treatment. No lunatics were admitted in 1906 to the Lunatic Asylum at Jaipur from the Kishengarh State.

178. There are no Lunatic Asylums at Sirohi, Kishengarh, Dholpur, Tonk, Bundi, Shahpura, Partabgarh, Banswara and Dungarpur. Lieutenant-Colonel D. ff. Mullen, M.D., I.M.S., late Residency Surgeon and Chief Medical Officer in Rajputana, suggested that a Central Asylum might be started at Ajmer supported by Native States in which the insanes could be scientifically treated and supervised by an experienced staff.

FAMINE.

179. *Special Medical staff on famine duty in Ajmer-Merwara.—*

Captain J. R. J. Tyrrell, I.M.S., Medical Officer, from 13th January 1906 to 18th November 1906 in Ajmer-Merwara.

Assistant Surgeon Ajudhia Pati, from 25th January to 28th May 1906 in Ajmer.

Assistant Surgeon I. T. Mittra, from 1st September 1905 to 31st August 1906 in Merwara.

Assistant Surgeon Onkar Singh, from 1st September to 25th September 1906 in Merwara.

In Ajmer.

1 Hospital Assistant at Ramsar, from 16th October 1905 to 15th July 1906,

1 Hospital Assistant at Barla from 26th November 1905 to 30th April 1906,

- 1 Hospital Assistant at Talornia from 1st February 1906 to March 1906,
- 1 Hospital Assistant at Deoli Link Road from 15th February to 31st May 1906,
- 1 Hospital Assistant at Lambana from 1st March to 29th July 1906,
- 1 Hospital Assistant at Jalia from 1st June to 15th June 1906,
- 1 Hospital Assistant at Akhri from 1st July to 31st August 1906, with a compounder in each hospital.

In Merwara.

- 1 Hospital Assistant at Makrera from 15th September 1905 to 31st August 1906,
- 1 Hospital Assistant at Barakhan-Sojat Road from 10th September 1905 to 31st August 1906,
- 1 Hospital Assistant at Bhim from 22nd September 1905 to 25th September 1906.
- 1 Hospital Assistant at Suraghata from 1st January 1906 to 31st August 1906,
- 1 Hospital Assistant at Devatan from 15th January to 12th April 1906,
- 1 Hospital Assistant at Chandela from 19th April to 25th September 1906, with a compounder in each hospital.

180. Most of the Hospital Assistants had to look after two or three scattered works which they visited twice or thrice a week.

181. The following table gives the number of Famine Camp Hospitals opened during the year in Ajmer-Merwara in addition to the two at Ramsar and Barla in Ajmer and the 3 at Barakhan-Sojat Road, Makrera and Bhim-Todgarh Road opened in the previous year, with numbers treated, mortality and dates of opening and closing :—

Name of Relief Works.	TOTAL PATIENTS TREATED.			Died.	DATE OF	
	In-door.	Out-door.	Total.		Opening.	Closing.
<i>Ajmer District.</i>						
Ramsar	100	1,512	1,612	2	1st January 1906	15th July 1906.

Akhri	1	159	160	...	1st July 1906	31st August 1906.
TOTAL	185	4,806	4,991	2	1st January 1906	31st August 1906.
<i>Merwara District.</i>						
Makrera	85	1,706	1,791	7	1st January 1906	31st August 1906.
Suraghata	3	534	541	...	Ditto	Ditto.
Barakhan Sojat Road	35	1,383	1,418	...	Ditto	Ditto.
Devatan	12	308	320	...	15th January 1906	12th April 1906.
Bhim	76	1,216	1,292	3	22nd September 1906	25th September 1906.
Chandela	8	968	976	...	19th April 1906	Ditto.
TOTAL	219	6,119	6,338	10	1st January 1906	25th September 1906.
GRAND TOTAL	404	10,925	11,329	12	1st January 1906	25th September 1906.

182. The number of in-patients treated in relief hospitals was small owing to the fact that there was no immigration from the famine area of the surrounding Native States and famine measures were taken in hand early before the people had become emaciated.

183. The mortality in both districts was below normal. On the whole the general health of the labourers was good.

184. Cases of emaciation were seldom seen.

185. *Epidemics.*—Fifty-seven cases of small-pox were treated during the year, 21 cases in Ajmer and 36 cases in Merwara Famine works and 3 cases of Cholera occurred in the latter district only.

186. The Famine Medical Officer reports that in Ajmer relief works a very large majority of the people lived in their villages and came on the work each morning, returning again to their villages in the evening. This system answered very well and considerably lessened the danger of Cholera or other diseases breaking out amongst the people, as it might have done if large numbers had lived on the works.

187. *Kitchen and Poor-houses.*—It was not found necessary to open any kitchens or poor-houses during the famine, the hospitals being able to cope with all cases of inanition both amongst adults and children.

188. The sanitation of the works and camps was carefully and constantly supervised by the Famine Medical Officer and staff. The water-supply on the whole was sufficient and potable. In each camp "Piaos" were made and provided with some kind of receptacles which answered the purpose admirably. The wells were regularly treated with permanganate of potassium.

189. The supply of food stuffs was sufficient and of good quality. Special arrangements were made for feeding, from the hospitals, all delicate and emaciated children, the smaller children receiving milk, Mellin's food and various other kinds of baby foods, and the larger children "Rubri" composed of milk, flour and sugar. They preferred this form of diet to all others and they were found to do well on it.

190. During the period Assistant Surgeon Ishan Tosh Mittra was on special famine duty in Merwara District, he practically held independent charge and made all the medical and sanitary arrangements for the earlier opened works. He did excellent work and displayed considerable ability.

191. *In Native States of Rajputana.*—There were 24 special famine hospitals and poor-houses opened during 1906 on account of the failure of the monsoon rain of 1905, viz., 6 in Alwar, 3 Relief work Hospitals and 3 poor-houses in Karauli, 4 relief camp hospitals and 2 poor-houses in Tonk, 1 poor-house and 1 famine relief camp and small-pox hospital in Jaipur, 2 Famine Relief Camp Hospitals in Marwar, 1 poor-house in Bharatpur and 1 poor-house in Dholpur.

192. There were 2,365 in and 11,634 out-door patients treated in these hospitals and poor-houses of whom 133 died, giving a percentage mortality of 5.62 as shown in General Statement B appended.

193. *Epidemic diseases.*—There was a small outbreak of small-pox and Cholera amongst persons in relief camps and in poor-houses in Jaipur, Bharatpur, Alwar, Dholpur, Karauli and Tonk as per detail below:—

	Small-pox.	Cholera cases.
Famine Relief work and small-pox hospital, Jaipur	58	...
Bharatpur poor-house	9	16
Famine Relief Camp at Govindgarh in Alwar	10	...
Poor-house at Sirmuthra in Dholpur	26	36
Central Poor-house, Karauli	1	...
Famine Relief Camp at Bogri in Tonk	5	1
TOTAL	109	53

194. All necessary precautions were taken to stamp out the epidemics.

195. The largest attendance was for the diseases noted below in Famine Camps and poor-houses in Native States:—

Ulcers	2,296
Diseases of the eye	1,790
Malarial fevers	1,385
Respiratory	1,169
Dysentery and diarrhoea	918
Skin diseases	853
Injuries	744

196. Only one death was reported to have occurred from starvation in Alwar. The Agency Surgeon, Alwar, reports that the man was an immigrant and the *post-mortem* report did not justify the diagnosis made by the Hospital Assistant.

197. Proper provision was made in all Famine Camps and poor-houses for the supply of pure drinking water and for its protection against contamination, food supply and sanitation received most particular attention. Hospital accommodation was ample and separate huts for the segregation of persons suffering from epidemic or contagious diseases were provided.

APPENDIX A.

AJMER JAIL, 1906.

Lieutenant-Colonel H. R. Woolbert, M.B., I.M.S., held charge of the office of Superintendent of the Central Jail at Ajmer throughout the year 1906.

The first statement of "General Summary" shows the distribution of the prisoners of all classes confined in the Jail during the year.

2. At the commencement of the year there were 466 prisoners of all classes. The number of prisoners admitted during the year was 1,469, and that of discharge was 1,524. The number in confinement at the end of the year was therefore 411 or 55 less than at the beginning of the year. Compared with the figures of the previous year there was an increase of 85 in the number of admissions. The daily average number of prisoners rose from 412.29 in 1905 to 464.58 in 1906 indicating an increase of petty crime for which short time punishments were inflicted.

Population.

3. Statement No. I shows the number of convicts and their disposal during the year.

The number of convicts imprisoned during the year was 761 as compared with 665 during 1905.

Compared with the previous year the disposal of convicts was as under :—

	1905.	1906.
Released on appeal	32	28
Released on expiry of sentence	412	613
Released on payment of fine	24	16
Released under remission rules	122	112
Transferred to other jails	5	7
Died in jail	7	9
On account of sickness	1	...

Four hundred and two convicts remained in the Jail at the close of the year as against 421 on the last day of the year 1905.

4. The total number of under-trial prisoners was 741. Of these 182 were released, 500 were convicted and sentenced, 50 were transferred, 1 died and 8 remained in the Jail at the close of the year.

5. Of the seven civil prisoners admitted during the year, 6 were released and discharged and 1 remained under detention at the close of the year.

Disposal of civil prisoners.

6. Of 761 convicts admitted during the year 202 were Mahomedans, 554 Hindus and 5 Native Christians.

Classification of convicts.

By age classification 51 were under 16 years of age, 604 between 16 to 40 years, 96 between 40 to 60, and 10 above 60 years.

The number of juvenile prisoners admitted to the Jail shows an increase of 5 over the number of the previous year.

Of the 700 male convicts, 247 were agriculturists, 296 labourers, 25 shop-keepers and traders, 35 domestic servants, 31 Government servants and 66 were without occupation. The majority of the prisoners admitted to Jail were as usual agriculturists and labourers. There were 61 female convicts, against 39 in the previous year.

7. Seven hundred and sixty-one convicts admitted during the year, 38 were sentenced to simple imprisonment and 696 to rigorous imprisonment as against 52 and 595 in the previous year. Solitary confinement was awarded to 17 convicts in addition to rigorous imprisonment. A sentence of rigorous imprisonment with whipping was inflicted on 10 convicts.

Two hundred and seventy-five convicts were sentenced to terms of imprisonment not exceeding one month; 152 were sentenced to imprisonment exceeding one month but not exceeding 3 months; 139 to terms of imprisonment above three months but not exceeding six months; 102 to imprisonment above six months but not exceeding one year; 60 to imprisonment above one year but not exceeding two years; 24 to imprisonment exceeding two years but not exceeding 5 years; 5 to imprisonment above five years but not exceeding 10 years; 2 to imprisonment exceeding 10 years and 2 were sentenced to transportation for life. Compared with the previous year the increase in the number of prisoners admitted to the Jail was practically confined to those sentenced to two years or less.

8. One hundred and thirty one previously convicted prisoners were admitted during the year as compared with 110 in 1905. Of this, 51 were habitual convicts, and the percentage of habituals

• Previous conviction.

to the total number of admissions was 17.21 as compared with 16.54 in the preceding year.

9. The daily average number of convicts sentenced to labour on working days was 383·66.

Employment of convicts. Of these 250·03 were employed on manufactures; 54·98 were engaged on prison duties; 18·47 were employed as prison officers; 4·18 were exempted from labour on account of their health; 8·96 were sick; 40·32 were employed as prison servants; 4·72 were engaged on gardening and 2 on Jail repairs.

10. The total number of Jail punishments of all kinds inflicted on convicts was 160 as compared with 203 in the previous year. The figures indicate that discipline was well maintained.

Conduct of prisoners.
The punishments inflicted are as follows :—

Solitary confinement	.	.	.	.	.	.	.	.	.	.	.	8
Reduced diet	.	.	.	.	.	.	.	.	.	.	.	21
Corporal punishment	.	.	.	.	.	.	.	.	.	.	.	2
Other punishments	.	.	.	.	.	.	.	.	.	.	.	129
												<u>160</u>

No prisoner escaped from the Jail during the year.

11. The health of the prisoners continued to be good during the year. The number of admissions into the Jail Hospital was 192 against 161 in 1905. There were 10 deaths as compared with 7 in the preceding year. It shows a death-rate of 21·52 per thousand for prisoners of all classes.

12. Sixty-eight juvenile offenders were confined in the Jail against 53 in the previous year. Of these, 50 were released during the year, 4 were transferred to the Reformatory School at Chunar and 14 remained in the Jail at the close of the year.

There were 13 prison offences during the preceding year. None of the 9 prison offences during the year under report were of a very serious nature.

13. The Jail manufactures earned a profit of Rs4,606 as compared with Rs3,781 in 1905. This is a very considerable improvement on the figures of the previous year. The cash earnings per head of those sentenced to labour amounted to Rs12-0-1 as against Rs9-12-9 in 1905.

14. The guarding and maintenance of the prisoners during 1906 involved an expenditure of Rs40,821 as compared with Rs30,613 in 1905. This sum includes the expenditure incurred by the Magistrates (Rs1,052) on guarding and maintaining under-trial prisoners and by the Executive Engineer, Ajmer Provincial Division (Rs14,922) on buildings and repairs. The average cost per head per prisoner was Rs87-13-10 against Rs74-4-0 in the previous year, or an increase of Rs13-9-10 per head. The increase in expenditure was due to the large outlay incurred by the Public Works Department in providing additional accommodation in the Jail.

15. Including the cost of under-trial prisoners incurred by Magistrates the net cost of the Jail to Government was Rs38,422 as compared with Rs20,569 in the preceding year.

16. The Jail remained more or less overcrowded during the greater part of the year on account of famine. The Ajmer Jail both in appearance and system presents a marked improvement to what I knew it 8 years ago as Assistant Commissioner, Ajmer. Lieutenant-Colonel Woolbert has taken great interest in its improvement in all departments. Discipline was well maintained in the Jail, and the report of the Superintendent shows that due attention has been paid to the taking of a full daily task from the prisoners. The health of the Jail population was good. The financial results were very satisfactory. The subordinate staff of the Jail are reported to have done their work well.

The Jail was inspected by the Honourable the Agent to the Governor-General, Rajputana, the Inspector General of Jails, United Provinces, and Chief Medical Officer, Rajputana, and the Commissioner, Ajmer-Merwara.

The Superintendent has been asked to submit separately the proposal made by him that the names of the Darogha and Deputy Jailor and Jail Clerk the Assistant Jailor should be included in the local Civil list.

C. PRITCHARD, Major,

Commissioner, Ajmer-Merwara.

NOTE. 1.—This and the other statements numbered 1 to 7 only convicted prisoners are to be included.
2.—Deaths and others detained for default of Government revenue will appear in No. 8.
3.—The "Total" column 6, is obtained by adding together the totals of columns 1 to 7, and represents with sufficient accuracy the number of different individuals who have been in prison during the month.
4.—The "Total population" column 8, is the sum of columns 9 to 11, and necessarily includes many who are carried more than once in the month, and dividing the whole by the number of days in the month.
5.—The "Daily average number" column 2, is obtained by adding together the number present on each day of the month, and dividing the total by the number of days in the month.
6.—When prisoners are transferred from one jail to another, they should be entered in column 6, and by the jail which received them they should be entered in column 7 B. When prisoners are sent to transportation beyond sea, they should be entered in column 10, and by the place to which they are sent they should be entered in column 11.
7.—When the gauges are employed extra-murally under the orders of Government No. 1032-43, dated 28th October 1899, they should be considered as forming a separate Jail, and the name of the Jail, that is, of the place where they are employed, should be entered in italics in each statement.

AJMER JAIL;
The 14th February 1907.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. II.—Statement showing the religion, age, and previous occupation of the Convicts in Jail at Ajmer for the year 1906.

[illegible]

NOTE.--It is of importance that the particulars given in this schedule should not include the same individual more than once, and hence all transfers should be omitted. The Totals should correspond with the number in column 6, Statement I. * Impressed during the month. ** Total. * Column 6, for January only, as the number remaining on the last day of the previous year (31st December) is to be included in that month.

STATEMENT No. III.—Statement showing the convicts admitted into the Jail at Ajmer during the year 1906 and those remaining on the 31st December of that year, according to the nature and length of sentence.

The Female column should be filled in *italics*.

(A) Prisoners admitted during the year should only be shown here *vide* column 5 of monthly statement No. 1, from January to December.

AJMER JAIL;
The 14th February 1907.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT NO. IV.—Statement showing the convicts admitted into the Ajmer Jail during the year 1906 who had been previously convicted.

SEX.	1	2				3	4	
	Number admitted during the year.	NUMBER PREVIOUSLY CONVICTED.				Ratio of column 2D to column 1.	JUVENILE PRISONERS UNDER 16 YEARS OF AGE (SECTION 399 OF THE CRIMINAL PROCEDURE CODE).	
		A	B	C	D		A	B
		Once.	Twice.	More than twice.	TOTAL.		Number admitted during the year.	Number previously convicted.
Male	700	45	33	51	129	18.43	47	12
Female	61	2	...	...	2	3.28	4	1
TOTAL	761(a)	47	33	51	131	17.21	51 (b)	13

(a) NOTE.—In column 1 will be entered the prisoners admitted during the year, vide column 5 of Monthly Statement No. *1, from January to December 1906. Numbers in column 2 will be inclusive of the number in column 4.
(b) The figures in column 4 A should tally with those shown in column 3A of Monthly Return No. II for the year.

STATEMENT NO. V.—Statement showing the escapes and recaptures of convicts in the Central Jail at Ajmer for the year 1906.

1	2			3	4			5			6			
Remaining uncaptured on the last day of the past year.	ESCAPED DURING THE YEAR.			GRAND TOTAL.	RECAPTURED DURING THE YEAR.			REMAINING UNCAPTURED.			UNEXPIRED PORTION OF SENTENCE OF THOSE WHO ESCAPED DURING THE YEAR.			
	A	B	C		A	B	C	A	B	C	A	B	C	D
	From inside the Jail.	From outside the Jail.	TOTAL.		Those who escaped in previous years.	Those who escaped during the present year.	TOTAL.	Of previous years.	Of present year.	TOTAL.	Under 1 year.	Above 1 and under 3 years.	Above 3 and under 7 years.	Above 7 years.
...	...	...	...	...	...	...	...	...	...	...	...	...	...	...

In column 1, and also in column 5 A, only those should be included who have escaped during the previous seven years. In 4 A, if any are entered who have been at large for upwards of seven years, a special note should be added. A footnote should show how many have been struck off, each having escaped more than seven years previously.

STATEMENT NO. VI.—Showing the offences committed by the convicts, and the punishments inflicted on them in the Jail of Ajmer during the year 1906.

1	2	3	4			5						6	
SEX.	Average number of convicts.	Criminal offences.*	BREACHES OF JAIL RULES.			PUNISHMENT INFLICTED.						Ratio of column 5 C to column 2.	
			Smoking or having possession of forbidden articles.	Offences relating to work.	Other offences against prison discipline.	A	B.—BY JAIL OFFICERS.						C
						By Criminal Court.	A	B	C	D	E		Total punishment.
Male .	426.13	...	9	63	87	...	7	...	21	2	129	159	37.31
Female .	13.87	...	...	...	1	...	1	...	...	...	...	1	7.11
TOTAL .	440.00	...	9	63	88	...	8	...	21	2	129	160	36.36

The nature of the Criminal offences committed should be noted on the back of this return.
* In contradistinction to offences against prison discipline.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

AJMER JAIL OFFICE;
The 14th February 1907.

STATEMENT No. VIII.—*Statement showing the employment of convicts as Prison Officers in the Central Jail at Ajmer for the year 1906.*

1	2	3	4	5	6	7
SEX.	Average No. of convicts.	Average number employed as Prison officers.	Ratio of column 3 to column 2.	Total number employed as Prison officers.	Number of reductions or other punishments.	REMARKS.
Male . . .	426.13	17.47	4.10	22	11	No. Convict Warders . . . 4 Do. Overseers . . . 17 Do. Writer . . . 1 Do. Mohurrir . . . 1 Total . . . 23
Female . . .	13.87	1.00	7.21	1	...	
TOTAL	440.00	18.47(c)	4.20	23(a)	11(b)	

(a) The nature of the offices held by convicts should be given in column of remarks.
(b) Detail of the nature of punishments ordered should be given as directed in paragraph 19 of the Government Review on the Jail Reports for 1884.
(c) Column 3 should tally with column 7B of Return No. XII. Column 5 should show the total number of convicts employed as Warders, etc., and not merely the total sanctioned number of situations.

STATEMENT No. IX.—*Statement showing the Scales of Diet in force in the Ajmer Central Jail during the year 1906.*

1	2	3	4
Diet Scales of Labouring Prisoners.	Diet scale of non-labouring prisoners.	Punishment Diet Scale.	Note of any change effected in diet scales during the year.
Atta of Gram 1/3 } " Barley 2/3 } 12 Chittaks daily. " Wheat 1/3 } Dāl alternately . . . 2 Chittaks. Vegetables alternately 8 " Oil with vegetables 4/25 " Salt " " 1/4 " " " Dāl . . 1/6 " Chillies with vegetables 2 M. " " Dāl . 1 " Fuel . . . 4 Chittaks.	Atta 8 Chittaks on Sundays and Mondays and 10 Chittaks on other days. Other articles are same as for labouring prisoners.	Labouring prisoners 8 Chittaks atta, with the usual quantity of salt; the period of this diet is ninety-six consecutive hours.	Prisoners on Mills are given 14 Chittaks of atta instead of 12 Chittaks, vide paragraph 7 of letter No. 345 II, dated 20th July 1899, from the First Assistant to the Honourable the Agent to the Governor-General for Rajputana.

NOTE.—A complete statement of all the Diet Scales in use for labouring prisoners according to length of sentence should be given in column 1, with details as to the articles used, and the variations in different days of the week.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. X (FINANCIAL).—Showing the expenditure in guarding and maintaining the prisoners in the Central Jail at Ajmer during the year 1906, excluding the cost of building new Jails, of Additions, Alterations, or Repairs.

Serial No.	2	3				4	5	6*		7			8		9		10	11	12

		..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	
		GRAND TOTAL																				

When prisoners of different classes are confined in the same Jail, the expenditure on establishment and other items with which all are concerned should be divided over all. The cost per head under any item of expenditure is to be calculated on prisoners actually concerned in it or contributing to it, and not otherwise. Hospital charges (col. 7) should include rations and also the cost of medicines supplied from the Bazar and the Medical Store Depot. In this series (Financial) annas and pies are only to be shown where there are columns for them.

AJMER JAIL.

STATEMENT No. XII.—Showing the employment of convicts in the Jail at Ajmer during the year 1906.

1	2	3	4	5	6	7										8	9								
SEX.	Average number not sentenced to labour.	Average number under sentence of labour on working days.*	Average number sick.	Average number convalescent and infirm.	Average number not employed for other reasons.	A	B	AVERAGE NUMBER EMPLOYED ON WORKING DAYS.										Average number of convicts hired out to Municipalities, private individuals, or Departments other than the Public Works Department.	Ratio per cent. of column 8 of those employed on working days as—						
								ON PRISON DUTIES.						ON JAIL BUILDINGS.

N.B.—Column 7 L a will only be filled up in a Public Works Jail, i.e., a Jail the inmates of which are solely employed on Public Works, and column 7 L b in any Jail which employs a part of its prisoners on Public Works.

* That is exclusive of holidays and Sundays.

† Unremunerative labour means shot drill, crank, and the like.

AJMER JAIL OFFICE;

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

The 14th February 1907.

STATEMENT No. XIII.—Showing the net cash earnings of convicts sentenced to labour in the Central Jail at Ajmer during the year 1906.

1	2	3	4	5	6	7	8	9	10	11	12	13
Serial No.	NAME OF JAIL.	Average number sentenced to labour.	Average number employed on Jail manufacture.	Cash balance on manufacturing account in hand on the 1st January.	Cash drawn on manufacturing account during the year.	TOTAL.	Paid into Treasury on manufacturing account.	Cash balance in hand on manufacturing account on the 31st December.	TOTAL.	Cash Earnings (being total of column 10 less total of column 7).	Average earning per head calculated on column 3.	Average earning per head calculated on column 4.
1	Ajmer Central Jail .	(a) 383'66	250'03	₹ a. p. 61 13 0	₹ a. p. 6,950 13 0	₹ a. p. 7,012 10 0	₹ a. p. ₹1,566 10 2	₹ a. p. 52 5 9	₹ a. p. ₹1,618 15 11	₹ a. p. 4,606 5 11	₹ a. p. 12 0 1	₹ a. p. 18 6 9

NOTE.—All proceeds of labour whether paid for by transfer account, by other Departments, or by cash are to be included in this Statement; but no mere estimate of work done by convicts as prison servants or in manufacturing clothing or other articles required for Jail purposes is to be included.

(a) Figures in columns 3 and 4 should correspond with those entered in columns 3 and 4 of Annual Return No. XII.

STATEMENT No. XIV (FINANCIAL).—Showing the net cost of the prisoners in the Ajmer Central Jail for the year 1905.

1	2	3	4	5	6	7	8
Serial No.	NAME OF JAIL.	Total cost of maintenance (column 10 of Statement X).	Average cost of maintenance per head (column 11 of Statement X).	Total cash earnings (column 11 of Statement XIII).	Average cash earnings per head of average strength.*	Net cost to Government (column 3 less column 5).	Average net cost per head of average strength (column 4 minus 6).
1	Ajmer Central Jail .	₹ a. p. 24,847 6 0	₹ a. p. 53 8 0	₹ a. p. 4,606 5 11	₹ a. p. 9 14 7	₹ a. p. 20,241 0 1	₹ a. p. 43 9 5

* To calculate the "average cash earnings per head" for column 6 of this statement, the total cash earnings in column 5 should be divided by the total of column 3, Statement X.

H. R. WOOLBERT, M.B., Lt.-Col., I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. XVIII (VITAL).—Showing the mortality among the convicts in the Ajmer Central Jail during the year 1906 according to the length of time passed in Jail.

NOTE.—1. When female, Civil and Under trial convicts are placed in the part of the Jail devoted to female convicts, columns 7 and 8 will be blank. In columns 2 and 3 enter the number of beds that the Hospital is intended to hold.
2. In column 16 draw attention to defects in the Jail, and to alterations made during the year, also explain how prisoners were accommodated when there was overcrowding.
3. Total average population of sick prisoners who were accommodated in Hospital should be shown in columns 2 and 3.
4. Here state the total accommodation in square yards of the Jail, calculated at 38 square feet of superficial area and 648 cubic feet of capacity per prisoner in association.
5. To obtain column 16 divide the figures shown under note 4 by the number in column 15.
6. The capacity should be shown according to the number of berths, or according to measurement, whichever is found to be larger than the other.

STATEMENT No. B.—Showing the condition of the Prisoners discharged from the Central Jail at Ajmer during the year 1906.

* The European Supervising Officers are the Agency Surgeons of the different States and the Civil Surgeon, Ajmer.
† The Hospital Assistant attached to the Dispensary performs these duties in Jaisalmer and Banswara.

ANNUAL STATEMENT No. III.—*Showing Dispensary Vaccination in Rajputana during the year 1906-1907.*

District.	Number of Dispensaries in each district to which a Vaccinator is attached.	Average number of Vaccinators attached to Dispensaries during the season.	Total number of persons vaccinated.	Average number of persons vaccinated by each Vaccinator.	PRIMARY VACCINATION.				RE-VACCINATION.		PERCENTAGE OF SUCCESSFUL CASES.		Re-vaccination.
					Total.	SUCCESSFUL		Total of all ages.	Total.	Successful.	Primary.		
						Under one year.	One and under six.						
1	2	3	4	5	6	7	8	9	10	11	12	13	
					None.								

There are no Vaccinators attached to Dispensaries in Rajputana.

COMPARATIVE STATEMENT No. IV.—Showing the number of persons primarily vaccinated and the number of those persons who were successfully vaccinated in Rajputana in each of the undermentioned years.

[illegible]

STATEMENT NO. V.—Showing total number of vaccinations performed and number inspected by the Civil or Agency Surgeons or other Inspecting Officers, the percentages of those inspected, together with the percentages of cases found successful by them, as contrasted with the percentages reported by the Vaccinators in each District or State of Rajputana during the year 1906-1907.

Sl. No.	NAMES OF DISTRICTS OR STATES.	Total number of persons vaccinated.	TOTAL NUMBER INSPECTED.		PERCENTAGES OF INSPECTIONS TO TOTAL NUMBER VACCINATED.		PERCENTAGES OF CASES FOUND SUCCESSFUL OF TOTAL NUMBER INSPECTED.		Percentage of success reported by Vaccinators.
			By Civil or Agency Surgeons.	By Native Superintendents or other Inspecting Officers.	By Civil or Agency Surgeons.	By Native Superintendents or other Inspecting Officers.	By Civil or Agency Surgeons.	By Native Superintendents or other Inspecting Officers.

No. $\frac{289}{2-VIII}$ OF 1908.

FROM

THE HON'BLE MR. E. G. COLVIN, C.S.I., I.C.S.,

*Agent to the Governor-General
in Rajputana,*

TO

S. H. BUTLER, Esq., C.I.E., I.C.S.,

*Secretary to the Government of India
in the Foreign Department.*

Dated Mount Abu, the 1st September 1908.

SIR,

WITH reference to the correspondence ending with the letter from the Government of India in the Foreign Department, No. 522-I. A., dated the 3rd February 1908, I have the honour to forward the Annual Report on Sanitation, Dispensaries and Jails in Rajputana for the year 1907, and on Vaccination for 1907-1908, prepared by Lieutenant-Colonel W. H. B. Robinson, I.M.S., Officiating Residency Surgeon and Chief Medical Officer in Rajputana.

2. During the year under report practical steps have been taken to give effect to the suggestions made by Mr. Silk, Sanitary Engineer, Bengal, in connection with the scheme for the improvement of the water-supply of Ajmer. A complete Engineering Staff has been engaged to test the water level of the surrounding country, and the boring of test wells is in progress. The Municipal Committee is also moving in the matter of improved sanitation, and proposes to raise a small loan of half a lakh of rupees to be spent on this object.

3. The province was almost free from Cholera and Small-pox during the year, but plague spread in an epidemic form in 11 of the Native States during the months from September 1907 to March 1908. It was most severely felt in Jaipur City which returned 3,441 deaths against 3,470 cases. Although evacuation was freely resorted to in villages it is unsatisfactory to notice that the people have made little progress towards recognizing the value of inoculation and other preventive measures. During the epidemic at Jaipur, a strong effort was made to induce the people in this direction. Facilities for inoculation were freely provided but very few of the residents cared to take advantage of them.

4. The birth-rate in the Native States rose from 10·36 in 1906 to 12·06 per mille in 1907, while the death rate dropped from 13·23 to 12·28 per mille during the same period. This change was probably due to the somewhat healthier climatic conditions of 1906. The 1907 monsoon though fair was

short lived and several States notably those in Eastern Rajputana suffered from scarcity. The effect of this was apparent in the increased mortality of fever and dysentery, which rose from 29,015 and 1,586 in 1906 to 33,158 and 2,589 in 1907 respectively.

5. The number of Hospitals and Dispensaries in the Province now stands at 170, two new dispensaries having been opened during the year, one in Banswara and one in the Jodhpur State. Considerable improvements in the Buildings, Establishments, and Medical appliances have been completed in the Native States during the year under report, the most noticeable of which are the new operating theatre block at the Bhagwan Dass Hospital at Bikaner and the new operating room for the Walter Female Hospital at Tonk.

I have the honour to be,

SIR,

Your most obedient Servant,

E. G. COLVIN,

*Agent to the Governor-General
in Rajputana.*

REPORT
ON
SANITATION, DISPENSARIES, AND JAILS IN
RAJPUTANA FOR 1907,
AND ON
VACCINATION FOR THE YEAR 1907-1908.

SECTION I.—SANITATION AND VACCINATION.

METEOROLOGY AND ITS RELATION TO FOOD-SUPPLY.

1. During the year under report 13·98 inches of rain were registered in Ajmer against 19·34 in the previous year, a rainfall of 1·38 inches less than the average of previous six years.

Rainfall in Ajmer.

Ajmer against 19·34 in the previous year, a rainfall of 1·38 inches less than the average of previous six years.
2. In most of the Native States of Rajputana the rainfall was less than the previous year; in Bikaner, however, it was unusually heavy, the heaviest since 1892, when 20·02 inches of rain was registered.

Rainfall in Native States.

the previous year; in Bikaner, however, it was unusually heavy, the heaviest since 1892, when 20·02 inches of rain was registered.
3. Rain throughout the country ceased in the last week of August and from that date to the end of the year was practically *nil*. The result was a partial failure of the Kharif crop.
4. A statement is appended showing the average annual rainfall in each State.

VITAL STATISTICS, BIRTHS AND DEATHS.

5. There were 14,881 births registered in Ajmer-Merwara in 1907, against 13,789 in 1906, an increase of 1,092 which is attributed to a healthier year and improved registration.

Births in Ajmer-Merwara.

against 13,789 in 1906, an increase of 1,092 which is attributed to a healthier year and improved registration.
6. Of the total registered, 8,076 were males and 6,805 females. The birth-rate was 31·20 per mille of population against 28·91 per mille in the previous year. The percentage of male to female births was 118·68 against 113·65 in 1906. The birth-rate exceeded the death-rate in 13 out of 23 circles of registration against 10 in the previous year, and the total birth-rate was in excess over deaths by 1·57 per thousand of population in the Ajmer-Merwara District.
7. According to the death returns for 1907 there were 14,131 deaths registered in this Division against 15,367 in 1906, a decrease of 1,236 which is generally due to more healthy climatic conditions of the year and partly to the absence of cholera. The death-rate per mille of population was 29·63 against 32·22 in 1906. The total number of deaths from fevers was 11,117 against 12,292 in 1906, a decrease of 1,175 which is probably due to early cessation of rain.

Deaths in Ajmer-Merwara.

registered in this Division against 15,367 in 1906, a decrease of 1,236 which is generally due to more healthy climatic conditions of the year and partly to the absence of cholera. The death-rate per mille of population was 29·63 against 32·22 in 1906. The total number of deaths from fevers was 11,117 against 12,292 in 1906, a decrease of 1,175 which is probably due to early cessation of rain.
8. The mortality from small-pox was 497 against 271 in 1906, an increase of 226. It was most fatal in May when 117 deaths were reported.
9. The deaths exceeded births in 8 circles against 13 in 1906.

TABLE I.—*Births and Deaths in Native States.*

NOTE.—The information required for this table cannot be obtained in full from Jaisalmer. The total, therefore, of column 16 does not agree with totals of nine preceding columns.

10. Registration has been attempted in 20 Native States chiefly in their capital cities as in the previous year but so far with unsatisfactory results.

TABLE II.—*Number of Cholera cases and deaths reported in Ajmer-Merwara and in Native States of Rajputana during the year 1907.*

NAME.	JUNE.		AUGUST.		SEPTEMBER.		NOVEMBER.		DECEMBER.		TOTAL.		Percentage of deaths to cases.
	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.	Cases.	Deaths.

GRAND TOTAL	1	1	10	10	10	6	117	44	6	3	144	64	44·44

* Imported.

11. There were no cases of cholera reported in Ajmer-Merwara during the year under report with the exception of one imported case in Ajmer suburbs.

The patient was isolated in cholera camp at Ajmer on the 27th June 1907, and died the same day. Four hundred and ten cases and 284 deaths were reported from the disease in 1906.

12. During the year only 143 cases of cholera were reported from the Native States of Rajputana of which 63 proved fatal against 8,632 cases and

4,714 deaths in the previous year.

13. The usual measures for its eradication were taken.

14. As the cholera outbreak in Rajputana was comparatively slight, no map has been attached to the report.

SANITATION.

15. *Ajmer City.*—The Foy Sagar filled during the rainy season and supplied sufficient drinking water to the people of the city and suburbs as well as to the Railway Workshops.

16. A scheme regarding a new source for a drinking water-supply is now under consideration. The Commissioner, Ajmer-Merwara, reports that the sinking of borings and the testing of trial wells in the Sagarmati and Sarsuti river beds have monopolised attention during the year.

17. The sanitation of the Ajmer City is still unsatisfactory. This question will be taken up as soon as the water-supply which may be expected from the Sagarmati scheme, is definitely known.

18. There is room for considerable improvement in the working of the conservancy arrangements. Solids and liquids are dealt with separately as before, this is the most suitable arrangement taking into account the local conditions.

19. The question regarding the substitution of open saucer drains for covered drains in the principal streets and bazars in the city is still under the consideration of the Municipality.

20. *Village sanitation.*—During the year under review the rules for the improvement of village sanitation were extended to the village of Bir in Ajmer but, owing to want of funds, demarcation pillars have not yet been erected.

21. In Pushkar Village a Jamadar of sweepers on suitable pay has been appointed, and it is hoped that, by means of making one person responsible for the proper working of the sweeper staff, the sanitation of Pushkar village may be improved.

22. The question of forms for inspection reports and for more effectively systematising to the enforcement of the rules, is still under consideration.

23. *Beawar city*.—The Municipal Committee continues to supervise sanitation at Beawar. The scheme for starting water works in this town is still under contemplation.

24. The old fashioned public latrines and urinals are gradually being replaced by galvanized iron ones which are more cleanly. The drainage of the town is fairly satisfactory.

NATIVE STATES.

25. *Jaipur*.—As the continued deficiency in the rainfall has resulted in a further fall in the spring level of the wells in the city, 5 wells have been deepened and provided with cylinders of cut stone masonry.

26. The main thorough-fares of the city are clean, with the exception of the covered drains on either side which might be oftener and more thoroughly emptied and cleaned, but the smaller side streets are, in places, very dirty and there are accumulations of filth and sewage in them which ought to be removed.

27. Lieutenant-Colonel H. N. V. Harington, I.M.S., Chief Medical Officer in Rajputana, has remarked at his recent inspection that it is hoped the Municipal Committee will direct their attention to the Sanitary condition of the back streets.

28. *Jodhpur*.—The tanks and wells in and around Jodhpur city and in the districts were well filled with water on account of the heavy rainfall.

29. The sanitary arrangements in Jodhpur city are still defective. The Residency Surgeon, Western Rajputana States, reports that the Municipal Committee appear to be still somewhat supine in regard to practical matters of public health, but there are signs of awakening interest and it is hoped some improvement may be manifested during 1908.

30. *Bharatpur*.—The sanitary Boards in the following towns in the Bharatpur State were started on the 1st May 1907 :—

Kaman.		Biana.
Bhusawar.		Weir.
	Kumher.	

VACCINATION.

STATEMENT. I.

31. In Ajmer-Merwara there was an increase in primary vaccination, *viz.*, 13,880 against 11,973 in 1906-1907 and the percentage of success rose from 97.87 to 97.94 and re-vaccination rose from 127 to 695 during the year under report. The marked increase in the number of re-vaccinations is specially attributed to the small-pox out-break in the city and district.

32. Of the successful primary vaccinations 10,455 were performed on infants of one year of age and 2,828 on children over one and under six years.

33. During 1907-1908, 29.48 per mille of the population of Ajmer-Merwara were successfully vaccinated against 24.79 per mille in the previous year and, although it is satisfactory to be able to note an increase in this direction, there is still much room for improvement.

34. One Native Superintendent and 15 Vaccinators have been employed in this Division as in the previous year. The average number of persons vaccinated by each vaccinator rose from 807 in 1906-1907 to 972 in 1907-1908, but the average cost of each successful case fell from 46 to 41 pies.

35. The Civil Surgeon, Ajmer, inspected 821 vaccinated children, against 624 in the previous year, and the Native Superintendent inspected 267 villages and saw 6,977 vaccinations against 6,076 in 1906-1907.

36. In Native States there was a very large increase in primary vaccinations, *viz.*, 277,603 against 256,551 in 1906-1907 and the percentage of success rose from 98.63 to 98.65. The increase in the number of primary operations performed and in the successful percentage both indicate satisfactory progress. Re-vaccinations fell from 1,361 in 1906-1907 to 590 in 1907-1908, 78.30 per cent. of these were successful.

37. There were 164 vaccinators employed against 166 in the previous year, 4 less in Jaipur and 1 in Bikaner, one additional vaccinator was employed in Marwar and Alwar, respectively, and one was entertained in Deoli Cantonment.

38. The average number of operations performed by each vaccinator rose from 1,554 to 1,696, but the work varied in different States from 3,862 operations in Sirohi to 281 in Jaisalmer.

39. The Residency Surgeon, Jaipur, reports that the vaccination work in the different Thikanas is still most defective and unsatisfactory but attempts are continually being made to remedy it.

40. The inspection of vaccination work in the Jaipur State under the recently revised scheme sanctioned by the Jaipur Darbar, has been more thorough and of greater extent.

41. Lieutenant-Colonel P. D. Pank, I.M.S., reports that the increase in the vaccination work done in Kishangarh and the decrease in the cost of each case is gratifying and is due in a great measure to the personal interest taken by Mr. K. L. Paonashker, Chief Member of Council, and it is to be hoped that this improvement will be maintained in the next vaccination season.

42. The Residency Surgeon, Western Rajputana States, reports that of the work performed in Marwar 2,583 primary vaccinations and 12 re-vaccinations were done by Hospital Assistants in Marwar Dispensary towns with a percentage of successes of 99.23 and 91.67 respectively. The Hospital Assistants at Sirohi and Sheogunge in Sirohi State performed 155 and 77 operations and the Hospital Assistant at Jaisalmer 72 only.

43. Lieutenant-Colonel R. C. Mac-Watt, I.M.S., reports that the vaccination work in Jaisalmer is not satisfactory as the vaccinators do not appear to receive the active support of the State authorities. The matter has been referred to the Resident and by him to the Jaisalmer Darbar.

44. During the year under report 1,348 children were vaccinated by Hospital Assistants in Kotah Dispensary towns and in neighbouring villages. This plan was adopted this year for the purpose of explaining the benefits of vaccination to the people and appears to have been a success.

45. There was a falling off in the number of vaccinations performed in Bharatpur and Mewar States during the year under report, which was due to the prevalence of plague in their villages and districts.

46. Vaccination in the Bikaner State, owing to the active support of the Darbar, is highly satisfactory.

STATEMENT. II.

47. The expenditure on vaccination in Native States was Rs27,899-9-8 compared with Rs26,692-14-7 in 1906-1907, the increase in cost being due chiefly to the fact that during the season vaccinators in Jodhpur State have drawn Rs13 a month camel allowance as they provided camels for themselves whereas formerly each vaccinator was allowed a camel from the State and received Rs6 per mensem for its feeding and up-keep.

48. The following table shows the number of towns and villages inspected and successful vaccinations seen by the Agency or Residency Surgeons in Native States—

Designation.	Number of towns and villages inspected.	Number of successful Vaccination cases seen.
Residency Surgeon, Jaipur	789	14,458
Residency Surgeon, Western Rajputana States	561	8,622
Civil Surgeon, Bikaner	70	3,528
Agency Surgeon, Eastern Rajputana States	120	5,556
Agency Surgeon, Alwar	464	5,119
Agency Surgeon, Haraoti and Tonk	3	411
Agency Surgeon, Kotah and Jhalawar	277	1,561
Residency Surgeon, Mewar	64	2,434
Medical Officer, Dungarpur State	3	111

49. The Residency Surgeon and Chief Medical Officer in Rajputana in his winter tour of inspection examined 3,628 vaccinated children and found the work mostly very good.

50. Lymph is kept up throughout the year in most of the important States. Humanized lymph is generally used.

SECTION II.—DISPENSARIES.

STATEMENT A.

Number of dispensaries.

51. The year opened with 169 hospitals and dispensaries and closed with 170 in Rajputana or an increase of one, two dispensaries were established, one at Garhi in Banswara State on the 28th April and another at Jodhpur for Police on the 1st April 1907. A dispensary at Bareta in Bharatpur State was closed on the 27th April, 1907.

52. The dispensaries have been classified as under :—

I. State Public	9
II. State Special	10
V. Private non-aided (<i>i.e.</i>) Native States	151

53. *Marwar*.—The improvement and extension of the First Branch Dispensary, Jodhpur, is still under the consideration of the Marwar Darbar.

Improvements and additions to Hospitals and Dispensaries.

54. The new Operating Theatre Block at the Bhagwan Dass Hospital, Bikaner, was completed and occupied in March 1907. This is now the finest and most up-to-date theatre in Rajputana and is equipped with recent aseptic furniture and appliances and is wired for electric light, etc., it reflects much credit on the liberality of the Darbar.

55. The new dispensary building at Rajgarh has been completed. The construction of new dispensary at Tijara and Nimrana is still engaging the attention of the Darbar. In the district dispensaries obsolete and useless instruments and appliances are being replaced by simple and more modern appliances.

56. The new Alexandra Hospital at Alwar is progressing. The Agency Surgeon trusts that if funds are available it will be ready for use in a year's time. This will be a very fine hospital and it is hoped that the Darbar will fit it with electricity so that X-Rays and other electrical medical appliances may be installed.

57. The new operating room for the Walter Female Hospital Tonk, was completed and fitted with modern furniture.

58. The operating room of the Agency Hospital, Deoli, was further improved at the cost of the Charitable Fund and some new appliances were obtained.

59. The Medical Officer, Dungarpur, reports that arrangements have been made for providing more suitable quarters for the dispensary servants, for a new store room and for the digging of a well for the dispensary at Dungarpur.

60. A new *post-mortem* room has been built and is equipped and in use, and a site has been selected for building a new dispensary at Sagwara.

STATEMENT B.

Medical Relief.

61. During the year 1,292,254 patients were treated at State Public, State Special and Private non-aided (Native States) dispensaries and hospitals as compared with 1,280,143 in 1906 and 1,090,945 patients in 1905. The increase of 12,111 over the 1906 attendance and of 201,309 over the 1905 attendance, shows that the hospitals continue to increase in popularity.

62. Of the total number of patients treated 16,253 were in-door and 1,276,001 out-door against 16,598 in and 1,263,545 out-door in the previous year. The percentage of mortality amongst in-patients was 4.23.

STATEMENT C.

63. Shows the diseases for which patients were treated in hospitals and dispensaries in Rajputana. The percentage of cases treated under each chief cause during the years 1906 and 1907 is shown below :—

Diseases.	Percentage during 1906.	Percentage during 1907.
(a) Malarial fevers and spleen	20.83	17.65
(b) Syphilis	1.69	1.71
(c) Rheumatism	3.83	4.01
(d) Diseases of the eye	12.00	13.16
(e) Lungs and Respiratory diseases	6.72	7.77
(f) Dysentery and Diarrhoea	4.26	3.53
(g) Ulcers	9.30	9.64
(h) Skin diseases	9.55	10.62
(i) Injuries	2.17	2.41

64. There were 1,842 patients treated for Tubercular diseases throughout the Province against 1,755 in 1906 chiefly in Jaipur, Bikaner, Bharatpur and Alwar where the attendance under this head was 430, 213, 170 and 187 against 262, 175, 153 and 145, respectively, in the previous year.

65. There were 15 patients treated with the X-Rays apparatus and "Finsen light" at the Victoria Hospital, Bharatpur, during the year under report. Besides these four cases of injuries were examined under X-Rays for purposes of diagnosis.

LEPROSY.

66. Three hundred and ninety-eight patients were treated for leprosy in Rajputana Hospitals and dispensaries in 1907 against 342 in 1906 and 319 in 1905. No special methods of treatment have been adopted.

SNAKE POISONING.

67. Chalmette's Anti-venine is kept in stock and used for the treatment of snake-bite when opportunity offers for testing its value. Brunton's "snake bite" lancets are stocked.

PLAGUE.

68. During the year from 1st April 1907 to 31st March 1908, 13,717 cases of plague and 9,930 deaths were reported and 354 towns and villages infected in Rajputana including Ajmer-Merwara, against 2,685 cases and 2,066 deaths and 108 infected towns and villages in 1906-07. The percentage of total plague deaths to population was 0.69—*vide* table attached, which shows the severity of the epidemic in Rajputana since 1896.

69. There were 135 cases of plague with 57 deaths reported in the Ajmer District in 1907-1908 against 54 cases and 31 deaths in the previous year. Merwara district was free from pestilence throughout the year.

70. Practically speaking there was no plague in the Ajmer District from the 1st April to the 31st December 1907, as only 17 cases were detected at the Ajmer Railway station till the end of October 1907, of which 9 proved fatal. In January 1908, plague broke out in the Deoli village in the Ajmer District, 25 cases and 16 deaths were reported till the 14th February 1908. The disease is said to have been imported into the village from Deoli Cantonment where it first prevailed.

71. In March 1908, it appeared in the Sawar Circle and the Kekri town from which 93 cases and 32 deaths were reported as per detail below from the 10th to the end of March 1908 :—

	Cases.	Deaths.
Kekri Town	31	13
Sawar Circle	62	19

72. In the Ajmer District only 8 towns and villages were infected from plague against 5 towns and villages in 1906-1907.

73. Thirteen thousand five hundred and eighty-two cases and 9,873 deaths were reported from Native States of Rajputana during 1907-08 against 2,626 cases and 2,030 deaths in 1906-1907. Of these 105 cases with 78 deaths were imported, 13,453 cases and 9,778 deaths were indigenous and 24 cases and 17 deaths were detected at the Railway Inspecting stations as follows:—

	Cases.	Deaths.
Abu Road Railway Station	7	5
Marwar Junction Station	2	2
Bharatpur Railway Station	1	0
Alwar Railway Station	14	10

74. The epidemic affected 11 States and 346 towns and villages including Deoli Cantonment against 13 States and 103 towns and villages. In Bikaner only imported cases occurred, *viz.*, 30 with 19 deaths.

75. Plague was reported in epidemic form in the Jaipur State during the year under report from 1st April 1907, to end of June and from September to 31st March 1908, 4,791 cases and 4,670 deaths were returned of which 3,470 attacks and 3,441 deaths occurred in the city of Jaipur. In Mewar 3,983 seizures and 1,569 deaths were reported.

76. In accordance with the orders contained in the Government of India, Home Department, letter No. 1517—1526, dated 13th September 1907, concise pamphlets in English and Vernacular were circulated and distributed widely throughout the towns and villages in Rajputana giving in the simplest language, instructions for—

- (1) Evacuation of houses in which plague is prevalent.
- (2) Inoculation.
- (3) Destruction of rats.

77. In infected villages of all Native States, evacuation, disinfection and segregation were carried out largely by the people themselves, the poorer being State-aided. It is satisfactory to note that the villages are gradually appreciating the advantages of early evacuation.

78. Six thousand two hundred and seventy three persons were inoculated in Ajmer District and in the Native States of Rajputana during the year as per detail below:—

Ajmer District	1,167
Jaipur State	379
Sirohi „	151
Deoli Cantonment	3,854 (3,118 civilian and 736 men of Deoli Regiment.)
Udaipur State	681 (89 people and, 642 prisoners in the jail.)
Partabgarh	41

79. In the Deoli Cantonment the large amount of inoculation work done was mainly due to the personal courage, tact and energy of Captain C. M. Goodbody, Indian Medical Service.

80. In Ajmer District rat exterminator was used in the infected villages.

81. In most of Native States rat-killing was not resorted to as the people are prejudiced against the practice.

82. A plague map showing the districts where outbreaks occurred, the date of first and last cases and the death-rate per 10,000 of population is attached.

STATEMENT F.

83. From this statement it will be seen that 692,334 men, 264,882 women, 203,973 male children and 131,065 female children obtained medical relief.

The number of “all other classes” patients declined by 3,074, while those of Europeans and Eurasians, Hindus and Muhammadans, considerably increased. Hindu patients exceeded Muhammadans by 552,739.

STATEMENT G.

Operations.

84. The number of surgical operations performed during the year increased from 65,758 to 66,551, the number of patients operated on increasing from 65,032 to 65,169. Of the persons operated on 64,759 or 98·96 per cent. were "cured," 264 or 40 per cent. were "relieved," 123 or 0·19 per cent. were "discharged otherwise" and 77 or 12 per cent. "died" while 219 or 33 per cent. "remained under treatment" on 31st December 1907.

85. Of the operations performed 1,078 were extraction of the lens for cataract of which 959 or 88·96 per cent. proved successful, 33 lithotomies, 132 litholapaxies and 185 amputations against 998 extractions of the lens for cataract, 45 lithotomies, 107 litholapaxies and 201 amputations in 1906.

86. Abdominal operations are slowly increasing as the institutions are levelling up to this class of work.

87. Lieutenant-Colonel P. D. Pank, I. M. S. Residency Surgeon, Jaipur, has long distinguished himself in the field of surgery, this officer's reputation as a general, as well as a first class ophthalmic, Surgeon has extended well beyond Rajputana and people flock to him in a large number from a very wide area. The Jaipur Darbar are to be congratulated for the wide reputation their splendidly equipped Mayo Hospital has obtained and the high class work of this institution.

STATEMENT H.

88. Shows the income and expenditure of Government Dispensaries and Hospitals and the expenditure only on those in Native States.

89. The total income of hospitals and dispensaries in Ajmer-Marwara fell from R20,162 in 1906 to 20,063 in 1907 and the expenditure from R17,514 to R16,139. The Local Fund contributions decreased very considerably by R2,250. It is satisfactory to note that the subscriptions from Native gentlemen increased from R2,908 to R4,074. The value of the invested capital of the dispensaries in this Division remained the same as in 1906. The expenditure on buildings and repairs shows a marked falling-off by R2,075 as compared with the previous year. Dieting and miscellaneous charges also show a decrease.

90. The total expenditure on the Political Agency and Salt Dispensaries fell from R12,673 to R9,734 in 1907, a decrease of R2,939 which is principally due to reductions on establishment.

91. The total expenditure on hospitals and dispensaries in Native States of Rajputana fell from R3,36,418 in 1906 to R3,32,860 in 1907 which is attributed to decrease in expenditure under all heads except on medical staff and Europe medicines.

92. Of the total cost on hospitals and dispensaries in these States, R62,674 were expended in Jaipur, R48,412 in Marwar, R34,976 in Kotah, R34,638 in Bikaner, R33,215 in Bharatpur, R31,586 in Alwar, R29,077 in Mewar, R8,538 in Dholpur, R7,923 in Jhalawar, R7,022 in Tonk, R4,650 in Karauli, R4,075 in Bundi, R3,109 in Dungarpur, R2,986 in Banswara, R2,890 in Kishangarh, R2,794 in Sirohi, R2,023 in Jaisalmer, R1,697 in Pertabgarh, R1,594 in Shabhpura and R543 in Kushalgarh.

93. The average cost of each case treated in Ajmer-Merwara and in the Native States Hospitals and dispensaries was 41 pies and 54 pies, respectively, against 49 pies and 54 pies in 1906.

94. A scheme for improving the position and pay of compounders and dressers in Ajmer-Merwara and other Government institutions is still under consideration.

95. A recommendation for the employment of an Assistant Surgeon for the Kekri Dispensary in the Ajmer District has not been sanctioned by the Government of India.

MISSION HOSPITALS.

96. During the year under report there were 6 Mission Hospitals in Rajputana the same as in the previous year.

97. The following table shows the total number of in and out-door patients treated and operations performed in Mission Hospitals during the year:—

Name of Hospital.	OUT-DOOR PATIENTS.		In-patients.	Operations.	REMARKS.
	Old.	New.			
Ajmer (male)	80,971	22,339	254	1,614	2,084 patients were visited at their homes.
Ajmer (female)	12,023	5,950	183	367	
Nasirabad	31,533	10,511	284	90	
Ashapura	9,144	3,218	443	72	
Udaipur	33,658	14,113	268	1,020	
Jodhpur	33,493	7,712	96	824	435 patients were visited at their homes.
TOTAL	2,00,822	63,843	1,523	3,987	

98. Medical statistics of these Hospitals are for the Mission Financial year from 1st October 1906 to 30th September 1907.

RAILWAY HOSPITALS.

99. There were six Railway dispensaries on the Rajputana-Malwa Railway within the limits of Rajputana, *viz.*, 1 at Abu Road, 1 at Sojat Road, 2 at Ajmer, 1 at Phulera and 1 at Bandikui.

100. There were 24,320 persons treated in these Hospitals against 23,307 in the previous year, *viz.*, 3,240 at Abu Road, 2,357 at Sojat Road, 9,316 at Ajmer, 4,555 at Phulera and 4,852 at Bandikui, and 664 operations were performed against 506 in 1906, *viz.*, 165 at Abu Road, 131 at Sojat Road, 131 at Ajmer, 142 at Phulera and 95 in Bandikui.

INSPECTIONS.

101. The Residency Surgeon and Chief Medical Officer in Rajputana inspected the Hospitals and Dispensaries during the past season in the following cities:—

Ajmer, Bikaner, Jodhpur, Alwar, Sirohi, Bharatpur, Dholpur, Kotah Jhalarapatan, Udaipur, Deoli, Bundi, Shahpura, Tank, Jaipur Kishangarh and Abu Road.

JAILS.

102. *Ajmer.*—The daily average number of prisoners in the Ajmer Jail fell from 464.58 to 386.90. There was a considerable decrease in the total number of cases admitted in the hospital, the daily average number of sick, the mortality and the ratio per mille of average strength which was attributed to the healthiness of the year and the absence of epidemic diseases. The 6 deaths which occurred among the convicts were due 3 to Dysentery, 1 to Pthysis, 1 to Heat stroke and 1 to Emphysema. Out of the 6 men who died during the year, 3 were over 50 years of age. No civil or under-trial prisoners died during the year.

103. Two cellular barracks to accommodate 20 prisoners were completed and two barracks with 80 cubicles are in course of construction.

Additions and alterations to Buildings.

All tile roofed quarters were converted into slab roofed ones.

The tile roofed fuel godowns and cattle sheds, which were adjacent to the guard room, have been dismantled.

104. The review by the Commissioner, Ajmer-Merwara, on the strength, classification, health, employment and conduct of prisoners, nature of sentences, jail manufactures, and expenditure of the Ajmer Jail is given as Appendix A of the report together with statements.

105. *Native States*.—The daily average number of prisoners in the Jails in the Native States of Rajputana fell from 4,964·02 to 4,393·82, this decrease was probably due to a more prosperous year. The number of admissions to hospitals fell from 2,489 to 2,085, the mortality from 117 to 102 and the ratio of deaths per mille of average strength from 23·55 to 23·21 in 1907 on account of a healthier year.

106. There was no Cholera in any of the jails in Rajputana in 1907.

107. *Jaipur*.—There was a little overcrowding in the Central Jail at the beginning of the year which was relieved by the transfer of prisoners to the District Jail. There were only 9 deaths as compared with 19 deaths in 1906. In the District Jail there were 3 deaths against 4 in 1906. The steady improvement in the health and condition of the prisoners and in the management of these jails still continues.

108. The Residency Surgeon, Jaipur, reports that these jails under the able superintendence of Rai Sahib Nawrang Rai, Superintendent of Jails, are excellently managed in every way and substantial progress is being steadily made in all departments and manufactures.

109. *Jodhpur*.—The mortality in this jail decreased from 11 in 1906 to 8 in 1907. Only 32 cases of scurvy were treated as compared with 159 in the previous year.

110. Mr. McGrath took over the duties of Jail Superintendent on the 6th January 1907, and progressive improvement has marked his tenure of office. The general health of the prisoners has undergone a change for the better and the standard of discipline has been raised. The factory work is expanding and beginning to show profits. The jail garden has received attention and has supplied vegetables of good quality with Antiscorbutic properties.

111. The cook-house has been removed to the centre of the circle and constructed on approved principles.

112. *Alwar*.—There has been a good deal of Pneumonia in this jail during the year. Out of 25 in-patients treated from this disease, 6 died.

113. Scurvy cases appeared in the Jail in August there being 20 in-patients and 96 out-patients for this condition, all the cases duly recovered. The Agency Surgeon, Alwar, reports that all men with marked scorbutic symptoms were admitted into Hospital and all with slight symptoms were put under treatment as out-patients and the vegetable diet of all prisoners was increased. Scorbutic prisoners were given "extras" in the shape of meat, mashed potatoes, milk and lemon-juice, a rapid improvement was noticed.

114. *Bharatpur*.—There has been considerable overcrowding in the Jail, surplus prisoners are accommodated in the factory sheds. It is understood that proposals and plans for extending the Jail and providing accommodation for a total number of 400 prisoners has been sanctioned by the Bharatpur State Council and work is to be carried out at once. The factory work is very poor and it is to be hoped will receive greater attention in the future. It is absolutely necessary that the Head Jailor should be a man of jail experience and reliable.

115. *Bikaner*.—The Jail as usual is quite up to date in every way. There were only 2 deaths (Debility and Phthisis) against 4 in 1906.

116. *Dholpur*.—There has been overcrowding throughout the year. The daily average number of sick rose from 1·29 in 1906 to 2·10 in 1907. A small hospital for 15 to 20 beds would help to relieve prisoners. If female prisoners are again sent, suitable accommodation should be provided.

117. *Kotah*.—The health of the Jail has been good throughout the year. Seven deaths occurred. Remittant fever 4, Pneumonia 2 and Diarrhoea 1.

118. *Udaipur*.—There has been overcrowding in the Jail throughout the year. The mortality rose from 16 to 20 and the death rate from 31·81 to 41·74 per mille of average strength in 1907, this high mortality is said to be largely due to prisoners incarcerated in the Morella Hawalat being transferred to the Jail in a debilitated condition, 9 of these transfers died during the year. Improvement in the care and management of this Hawalat is required. Of the 20 deaths in Central Jail, 3 were due to Pneumonia, 3 to Phthisis, 3 to Diarrhoea, 3 to failure of hearts action, 3 to Debility and old age, 1 to Dysentery, 1 to Epilepsy and 3 to Plague.

119. Plague appeared in the Central Jail in February 1908. There were 14 attacks and 3 deaths. All necessary precautions were taken. The Jail staff and all other prisoners were inoculated.

120. *Partabgarh*.—The work of the new Jail building at Partabgarh is progressing.

121. *Dungarpur*.—An upper story barrack for 49 prisoners has been constructed in the old Jail building with raised beds. The building of a new hospital ward and the conversion of the present hospital ward into an under-trial barrack is contemplated.

122. There were no deaths in the Jails at Sirohi, Shahpura, Jhalawar, Partabgarh, Bundi and Dungarpur.

123. The Residency Surgeon and Chief Medical Officer in Rajputana inspected the Jails at Ajmer, Bikaner Jodhpur, Alwar, Sirohi, Bharatpur, Dholpur, Kotah, Jhalrapatan, Udaipur, Bundi, Shahpura, Tonk, Jaipur and Kishangarh.

124. *Qualified Medical Staff*.—There were ten Commissioned Medical officers employed in Rajputana at the end of the year.

Commissioned Medical Officers.

125. Lieutenant-Colonel D. French-Mullen, I.M.S., Residency Surgeon and Chief Medical Officer in Rajputana, was transferred to Ambala as Principal Medical Officer, Sirhind and Jullundhar Brigades, from the 19th March 1907, and Lieutenant-Colonel H. N. V. Harrington, I.M.S., Residency Surgeon, Western Rajputana States, Jodhpur, was appointed in his place from that date.

126. Captain L. J. M. Deas, I.M.S., Agency Surgeon, Alwar, was posted temporarily as Civil Surgeon of Ajmer on departure of Lieutenant-Colonel H. R. Woolbart, I.M.S., to Europe on combined leave for one year and nine months with effect from the 19th March 1907. He remained at Ajmer till the 3rd May 1907. Major P. J. Lumsden, I.M.S., took over charge of the duties of the Civil Surgeon, Ajmer, from 4th May 1907.

127. Lieutenant-Colonel R. Shore, I.M.S., who was appointed on return from furlough as Residency Surgeon, Western Rajputana States, was deputed on special duty with the Maharaj Kunwar of Udaipur from the 19th May 1907. Lieutenant-Colonel R. C. Macwatt, I.M.S., took over charge of the duties of the Residency Surgeon, Western Rajputana States, from 1st June 1907.

128. Lieutenant-Colonel W. H. B. Robinson, I.M.S., was on deputation to Europe with His Highness the Maharaja of Bikaner from 7th May to 13th October 1907. Lieutenant-Colonel Macwatt, I.M.S., Residency Surgeon, Western Rajputana States, was appointed in visiting medical charge of Bikaner from 1st June 1907 in addition to his own duties.

129. The Civil Surgeon, Ajmer, holds collateral charge of the 44th Merwara Infantry, the Medical Officer, Mewar Bhil Corps, Kherwara, is the Medical officer of the Dungarpur State and superintends the Civil Dispensaries at Kherwara and Kotra and the Medical officer of the 43rd Erinpura Regiment inspects the Sheogunge Dispensary close to the Cantonment of Erinpura. A separate Medical Officer has been posted to the 42nd Deoli Regiment.

130. *Warrant Officer*.—Honorary Captain Thomson, I.S.M.D. (retired), was on plague duty at Ajmer during the year.

131. *Civil Assistant Surgeons*.—There were 12 Assistant Surgeons in Rajputana and in Ajmer-Merwara District, viz., 5 Government pensionable Assistant Surgeons, 1 at Ajmer, 1 at Beawar, 1 at Bharatpur, 1 at Jaipur, and 1 at Khetri and 6 Assistant Surgeons on Rajputana Unpensionable graded list, 1 at Jodhpur, 1 at Alwar, 1 at Dholpur, 1 at Tonk, 1 at Jhalrapatan, and 1 at Kishangarh. There is also a locally entertained Assistant Surgeon at Bundi.

132. *Military Assistant Surgeon*.—Assistant Surgeon A. W. Dyer, I.S.M.D., took over charge of the Northern India Salt Revenue Dispensary at Sambhar on the afternoon of the 28th July 1907, from Assistant Surgeon R. E. Murray transferred.

133. In addition to 21 Hospital Assistants permanently employed by the British Government and 169 Government Hospital Assistants transferred for service in Native States, there were only 6 local class Native Doctors (one retired on pension during the year and has been replaced by a Government Hospital Assistant) and 3 locally entertained Native Doctors.

134. *Military Hospital Assistants*.—There were 10 Military Hospital Assistants employed with the Imperial Service Corps in Rajputana as in the previous year.

135. *Lady Doctors*.—There were 4 Lady Doctors employed in Rajputana against 5 in the previous year, the Lady Doctor at Tonk having gone on leave to Europe for study for a higher degree.

136. *Female Hospital Assistants*.—There were 11 Female Hospital Assistants against 10 in 1906 as a Female Hospital Assistant was employed for the Walter Zenana Hospital, Udaipur, on the 3rd July 1907 and at Beawar on the 1st August 1907 respectively. Owing to the financial position of the Jhalawar State the services of the female Hospital Assistant in charge of the female ward of the Chaoni Hospital were dispensed with from the 8th April 1907.

FEMALE HOSPITALS AND DHAI CLASS FOR WOMEN.

137. There is no qualified female Hospital Assistant appointed to the Medical charge of the female wards of the Victoria Hospital, Ajmer, for want of funds but Miss Campbell superintends the Mission Hospital for women where many patients are relieved.

138. *Beawar*.—The female ward of the Charitable Dispensary at Beawar was re-opened on the 1st August 1907 when female Hospital Assistant Mrs. J. Martin was appointed. During the period of five months 24 in and 4,038 out-patients were treated and 172 operations were performed of which 2 were major operations.

139. The returns received from the Female Hospitals in Native States of Rajputana show on the whole a decrease of work done during the year under report in these institutions which is attributed to the healthiness of the year.

140. *Udaipur*.—Miss McGlashan, M.B. Ch. B., has been in charge of the Walter Zenana Hospital at Udaipur throughout the year. There has been a considerable increase in the number of out-door patients treated in the Hospital, which is due partly to her personal energy and the fact that she has been assisted by Hospital Assistant Sitabai since the 3rd July 1907. A female compounder is greatly needed and a woman is being trained for the purpose. This Hospital is unfortunately not suitable for the reception of purdah ladies.

141. *Jodhpur*.—The Jaswant Hospital for women at Jodhpur continues to be popular under Miss Marsh, M.D., Lady Superintendent.

142. Glass aseptic appliances for the Operating Theatre of the Hospital were provided in place of the wooden furniture which was previously used. The old cement floor was replaced by a marble floor.

143. In May 1907, Female Hospital Assistant Mrs. Prascilla Nand Ram resigned her post and was succeeded by Miss Julia Pratt. All the hospital staff are reported to have worked well.

144. *Alwar*.—Miss Lauder, M.D., was in charge of the Dufferin Hospital at Alwar up to the 16th May 1907 when she left for Kashmir. Mrs. Gardoin in the absence of Miss Lauder, kindly overtook general supervision over the Hospital for some months and female Hospital Assistant Sugna Bai was put in charge of the Hospital till the 11th December 1907 when Lady Doctor Miss Turkhud, M.B., B.S., assumed charge of the institution.

145. There was a decrease in the number of both in and out-door patients treated during the year under report which is due mainly to the absence of a Lady Doctor for a long portion of the year.

146. Two out of 6 Dhai class pupils who were in the course of instruction passed their examination during the year. The course is for two years. Eight pupils are still under training.

147. *Tonk*.—Miss K. Reed, L.M.S., was in charge of the Walter Female Hospital at Tonk up to the 8th March 1907, when she proceeded on six months leave to Europe to study for a higher degree and was replaced by Miss A. Harcourt, M.B., on the 31st July 1907, who shortly resigned and Female Hospital Assistant Imaman was dismissed, consequently the Hospital was closed. It was re-opened on the 2nd October 1907 when Female Hospital Assistant Miss Rosie Joseph was appointed. The decrease in the attendance at the Hospital was due to the fact that the Hospital remained closed for nearly four months and the popularity of the Hospital suffered accordingly.

148. The Dhai class was closed on the 8th March 1907 when Miss Reed proceeded on leave to Europe.

149. *Bharatpur*.—Female Hospital Assistant Bibi Rup Kuar has been in charge of the Female Hospital at Bharatpur throughout the year. There has been an increase in the number of both in and out-door patients treated.

150. Five out of 13 pupils (Midwives) at the class last year, passed their examination which was conducted by the Agency Surgeon, Eastern Rajputana States.

151. *Karauli*.—There were 21 in and 1,937 out-patients treated in the Female Dispensary against 46 in and 3,055 out-patients in 1906, a decrease of 25 in and 1,118 out-patients, chiefly due to the Dispensary having been without a qualified Female Hospital Assistant till the appointment of Mrs. A. Williams on the 8th November 1907.

152. *Jaipur*.—Female Hospital Assistant Birji Bai has been in charge of the Female ward of the Mayo Hospital, Jaipur, throughout the year.

153. The Residency Surgeon reports that the State Council have sanctioned the employment of a female Assistant Surgeon and this appointment will add considerably to the efficiency of the Female Medical Staff.

154. The Dhai Class is being worked on the same lines as in previous years.

155. *Dhai Class, Ajmer*.—The five pupils who were mentioned in last year's Report as being under instruction continued to work till the end of the session when they were examined by the Civil Surgeon, Ajmer, on the 27th April 1907; of these 4 passed and obtained their certificates and the reward.

156. The new session was opened on the 1st July 1907, with 5 pupils, *viz.*, 2 from Kishangarh, 1 from Beawar, 1 from Jodhpore and 1 from Ajmer.

157. Mrs. Harris, the Lady Superintendent, Dhai Training Class, Ajmer, relinquished charge of her appointment on the afternoon of the 30th April 1907 and Mrs. Kane, lately on plague duty at the Ajmer Railway Station, was appointed in her place from 1st July 1907.

158. There is now comfortable accommodation for 5 patients and 7 pupils besides the staff which consists of the Matron, the Nurse and a Maid Servant.

IMPERIAL SERVICE TROOPS.

159. The three Regiments of Cavalry, the Camel Corps, the two Transport Corps and the two Regiments of the Imperial Service Infantry at Alwar, Jodhpur, Bikaner, Jaipur and Bharatpur have well equipped hospitals which have been regularly inspected.

INSANES.

160. *Ajmer*.—There were 16 lunatics in the Central Jail, Ajmer, during the year, of these 6 were transferred to the Lunatic Asylum at Lahore, 5 were made over to their friends and relatives, and 3 discharged as cured. Only 2 lunatics remained in the Jail on the 31st December 1907.

161. In Native States 148 lunatics were treated in 1907, of whom 36 were cured, 9 made over to their friends and relatives, 16 died and 87 remained under treatment.

W. H. B. ROBINSON, *Lieut.-Col., I.M.S.*,

*Offg. Residency Surgeon and Chief
Medical Officer, Rajputana.*

APPENDIX A.

AJMER JAIL, 1907.

The following officers held charge of the office of Superintendent of the Central Jail at Ajmer; Lieutenant-Colonel H. R. Woolbert, I.M.S., from 1st January to 18th March 1907, Captain L. J. M. Deas from 19th March to 3rd May 1907 and Major P. J. Lumsden, I.M.S., for the rest of the year.

2. The statement of General Summary shows the classification and distribution of prisoners of all classes confined in the Jail during the year under review.

3. The year opened with a Jail population of 411 and ended with a population of 369 prisoners. The total number of admissions was 974 against 1,469 in 1906. The number of prisoners discharged was 1,016 as compared with 1,524 in the preceding year. The daily average strength fell from 454.58 in 1906 to 386.90.

4. Statement No. I shows the number of convicts and their disposal during the year. The number of convicts imprisoned during the year was 497 as compared with 761 during 1906. Compared with the previous year the disposal of convicts was as under :—

PARTICULARS.	YEARS.		REMARKS.
	1906.	1907.	
(1) Released on appeal	28	14	* These figures include 7 Banswara prisoners who were released on 4th November in honour of the Birthday of His Highness the Maharawal of Banswara.
(2) Released on expiry of the sentence	613	393	
(3) Released on payment of fine	16	17	
(4) Released under remission rules	112	131*	
(5) Transferred to other Jails	7	7	
(6) Died in Jail	9	6	
(7) Transferred to Andamans	...	1	
TOTAL	785	569	

At the close of the year 342 convicts remained in the Jail as against 402 on the last day of the year 1906.

5. The total number of prisoners under-trial was 461, of these 113 were released 264 were convicted and sentenced, 58 transferred and 26 remained in the Jail at the close of the year.

6. There were 13 civil prisoners of whom 12 were discharged and 1 remained under detention at the end of the year.

7. Of 497 convicts imprisoned during the year 166 were Mohomedans, 330 Hindus, and 1 Native Christian.

By age classification 17 were under 16 years of age 421 between 16 to 40 years, 51 between 40 to 60, and 8 above 60 years of age. There were 463 male convicts. Of these 122 were agriculturists, 226 labourers, 26 shop-keepers and traders, 25 domestic servants, 5 of miscellaneous occupation, 25 Government servants, and 34 were without occupation. The majority of the prisoners admitted to Jail was as usual agriculturists and labourers.

8. Of the 497 convicts imprisoned during the year 17 were sentenced to simple imprisonment and 463 to rigorous imprisonment as against 38 and 696 in the previous year. Solitary confinement was awarded to 7 convicts in addition to rigorous imprisonment. A sentence of rigorous imprisonment with whipping was inflicted on 10 convicts. The number of convicts sentenced to terms of imprisonment not exceeding one month was 172; 122 were sentenced to imprisonment exceeding one month but not exceeding three months; 80 to terms of imprisonment above three months but not exceeding six months; 67 to imprisonment exceeding six months but not exceeding one year; 27 to imprisonment above one year but not exceeding two years; 15 above two years but not exceeding 5 years; 11 above five years but not exceeding ten years and 3 were sentenced to transportation for life.

9. The total number of previously convicted prisoners admitted during the year was 94 as compared with 131 in 1906. Of this 85 were habitual convicts. The percentage of habituals to the total number of admissions was 18.91 as compared with 17.21 in the preceding year.

10. The daily average number of convicts sentenced to labour on working days was 321.58 of these 195.42 were employed on manufacturers, 54.45 were engaged on prison duties, 21.85 were employed as prison officers, 3.78 were exempted from labour on account of their health, 5.74 were sick, 37.25 were employed as prison servants, 2.33 were engaged on gardening and 0.76 on Jail repairs.

11. The total number of Jail punishment of all kinds inflicted on convicts was 182 as compared with 160 in the previous year. Discipline was well maintained. The kinds of punishment inflicted were as below :—

	Particulars.	No.
(i) Solitary confinement		9
(ii) Reduced diet		26
(iii) Corporal punishment		2
(iv) Other punishment.		145
	TOTAL	182

No prisoner escaped from the Jail.

12. The health of the prisoners continued to be good during the year. The number of admissions to the Jail Hospital was 167 as against 192 in 1906. There were 6 deaths as compared with 10 in the preceding year.

13. There were 31 juvenile offenders confined in the Jail against 68 in the previous year. Of these, 29 were released on expiration of their sentence during the year and 2 boys remained in the juvenile ward at the close of the year.

There were 10 prison offences among the boys against 9 in the preceding year. They were not of a serious nature.

14. The profit from the Jail manufactures amounted to R3,270-14-4 as against 4,606-5-11 during the previous year. The fall in income was due to—

- (i) Decrease in the average number of prisoners.
- (ii) A sum of over R900 remained outstanding at the close of the year.
- (iii) Durries of the aggregate value of R600 remained unsold.

The average earning per head of prisoners actually employed on manufactures fell from R18-6-9 in 1906 to 16-11-10.

15. The guarding and maintenance of the prisoners during 1907 involved an expenditure of R48,507 as compared with R40,821 in the previous year. This sum includes the expenditure incurred by Magistrates in guarding and maintaining under-trial prisoners and by the Executive Engineer, Ajmer Provincial Division (R26,464 on buildings and repairs). The average cost per prisoner during the year has been R125-10-6 against R87-13-10 in the preceding year. The total number of prisoners during the year under review was much less than what it was in the year 1906, and the dietary charges and clothing expenses show a decrease while the cost for fixed establishment, Hospital charges and contingencies have increased.

The increase in expenditure was mainly due to the large outlay incurred by the Public Works Department in providing additional accommodation in the Jail.

16. Including the cost of under-trial prisoners incurred by Magistrates, the net cost of the Jail to Government was R45,958 as compared with 38,422 in the preceding year.

17. There was no over-crowding in the Jail during the year under review. The Jail was inspected twice by the Chief Medical Officer, Rajputana, and twice by the Assistant Commissioner and District Magistrate, Ajmer, during the year. It was inspected by the Inspector-General of Prisons of the United Provinces on 25th February 1908. The last named officer has recorded a very favourable opinion in respect to the management of the Jail.

C. PRITCHARD, *Lt.-Colonel,*

Commissioner, Ajmer-Merwara.

* Whether a Central Prison, District Jail or Subsidiary Jail. NOTE.—When Civil Prisoners are in a separate place of confinement and under some authority other than that of the Jail Department, such for example as the Nazir of the Civil Court, they should not be included in these statements.

STATEMENT No. I.—Statement showing the number and disposal of Convicts in the Central Jail at Ajmer for the year 1907.

1	2	3	4	5	6	7		8	9		10					11	12	13	14	15	16					
Sex.	Total aggregate number of prisoners during the year.	Daily average number of prisoners.	Remained on the last day of year 1906.	Im- prisoned during the year.	TOTAL.	RECEIVED FROM OTHER JAILS.		Total population.	TRANSFERRED TO OTHER JAILS.		RELEASED DURING THE YEAR.					Trans- ported beyond sea.	Trans- ferred to Lunatic Asylum.	Escaped.	Executed.	Died.	Remaining on the last day of the year 1907.					
						A	B		A	B	C	D	By order of Government.													
													To undergo sentence.	In transit for trans- portation <i>en route</i> to other Jails, etc.	For transportation beyond seas, etc.							On expiry of sentence.	On payment of fine.	On account of sick- ness.	On account of epidemics.	For good conduct.
Male	130,433	337.35	395	433	853	12	...	870	7	1	14	322	16	...	...	...	...	...	6	336						
Female	3,313	9.08	7	134	41	...	...	41	...	...	...	31	1	...	...	...	...	...	...	6						
TOTAL	133,746	66.43	402	467	899	12	...	911	7	1	14	333	17	...	...	...	...	...	6	342						

* Of this number 14 boys under 16 years.

† Of this number 2 girls under 15 years.

NOTE. 1.—In this and the other statements numbered 1 to 7 only convicted prisoners are to be included.

2.—Debtors and others detained for default of Government revenue will appear in No. 8.

3.—The "Total," column 6, is obtained by adding together the totals of columns 2 and 5, and represents with sufficient accuracy the number of different individuals who have been in prison during the month.

4.—The "Total population," column 8, is the sum of columns 6 and 7, and necessarily includes many who are counted more than once.

5.—The "Daily average number," column 9, is obtained by adding together the number presented on each day of the month, vide column 2, and dividing the whole by the number of days in the month.

6.—When prisoners are transferred from one jail to another on their way to undergo transportation beyond seas, they should be entered by the transferring jail in column 7 B, and by the jail which received them they should be entered in column 7 A. When prisoners sentenced to transportation beyond seas are despatched from any jail, so that they will leave the Prison without passing through any other jail in it, they should be entered in column 11.

7.—When the gangs are employed extra-murally under the orders of Government No. 1652-43, dated 25th October 1899, they should be considered as forming a separate Jail, and the name of the Jail, that is, of the place where they are employed, should be entered in italics in each statement.

AJMER JAIL;
The 28th February 1908.

P. J. LUMSDEN, Major, I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. IV.—Statement showing the convicts admitted into the Ajmer Jail during the year 1907 who had been previously convicted.

SEX.	1	2				3	4	
	Number admitted during the year.	NUMBER PREVIOUSLY CONVICTED.				Ratio of column 2D to column 1.	JUVENILE PRISONERS UNDER 16 YEARS OF AGE (SECTION 899 OF THE CRIMINAL PROCEDURE CODE).	
		A	B	C	D		A	B
		Once.	Twice.	More than twice.	TOTAL.		Number admitted during the year.	Number previously convicted.
Male	463	39	17	35	91	19.65	14	1
Female	34	2	1	...	3	8.82	3	...
TOTAL	497(a)	41	18	35	94	18.91	17 (b)	1

(a) NOTE.—In column 1 will be entered the prisoners admitted during the year, vide column 5 of Monthly Statement No. 1, from January to December 1907. Numbers in column 2 will be inclusive of the number in column 4.
(b) The figures in column 4 A should tally with those shown in column 3A of Monthly Return No. II for the year.

STATEMENT No. V.—Statement showing the escapes and re-captures of convicts in the Central Jail at Ajmer for the year 1907.

1	2			3	4			5			6			
Remaining uncaptured on the last day of the past year.	ESCAPED DURING THE YEAR.			GRAND TOTAL.	RE-CAPTURED DURING THE YEAR.			REMAINING UNCAPTURED.			UNEXPIRED PORTION OF SENTENCE OF THOSE WHO ESCAPED DURING THE YEAR.			
	A	B	C		A	B	C	A	B	C	A	B	C	D
	From inside the Jail.	From outside the Jail.	TOTAL.		Those who escaped in previous years.	Those who escaped during the present year.	TOTAL.	Of previous years.	Of present year.	TOTAL.	Under 1 year.	Above 1 and under 3 years.	Above 3 and under 7 years.	Above 7 years.
	...	...	...		...	...	...	...	...	...	...	...	...	...

In column 1, and also in column 5 A, only those should be included who have escaped during the previous seven years. In 4 A, if any are entered who have been at large for upwards of seven years, a special note should be added. A footnote should show how many have been struck off, each having escaped more than seven years previously.

STATEMENT No. VI.—Showing the offences committed by the convicts, and the punishments inflicted on them in the Jail of Ajmer during the year 1907.

1	2	3	4			5							6
SEX.	Average number of convicts.	Criminal offences.*	BREACHES OF JAIL RULES.			PUNISHMENT INFLICTED.							Ratio of column 5 C to column 2.
			Smoking or having possession of forbidden articles.	Offences relating to work.	Other offences against prison discipline.	A	B.—BY JAIL OFFICERS.					C	
						By Criminal Court.	A	B	C	D	E	Total punishment.	
							Solitary confinement.	Solitary confinement, with reduced diet.	Reduced diet.	Corporal punishment.	Other punishment.		
Male	357.35	...	44	70	68	...	9	...	26	2	145	182	50.93
Female	9.08	...	...	...	...	...	...	...	...	...	...	...	...
TOTAL	366.43	...	44	70	68	...	9	...	26	2	145	182	49.67

The nature of the Criminal offences committed should be noted on the back of this return.
* In contradistinction to offences against prison discipline.

P. J. LUMSDEN, Major, I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. VIII.—Statement showing the employment of convicts as Prison Officers in the Central Jail at Ajmer for the year 1907.

1	2	3	4	5	6	7
SEX.	Average No. of convicts.	Average number employed as Prison officers.	Ratio of column 3 to column 2.	Total number employed as Prison officers.	Number of reductions or other punishments.	REMARKS.
						No.
Male . . .	357.35	20.85	5.88	21	12	Convict Warders . . . 4 Do. Overseers . . . 16 Do. Writer . . . 1 Do. Mohurrir . . . 1
Female . . .	9.08	1.00	11.01	1	...	Total . . . 22
TOTAL	366.43	21.85(c)	5.96	22(a)	12(b)	

(a) The nature of the offices held by convicts should be given in column of remarks.
(b) Detail of the nature of punishments ordered should be given as directed in paragraph 19 of the Government Review on the Jail Reports for 1884.
(c) Column 3 should tally with column 7B of Return No. XII. Column 5 should show the total number of convicts employed as Warders, etc., and not merely the total sanctioned number of situations.

STATEMENT No. IX.—Statement showing the Scales of Diet in force in the Ajmer Central Jail during the year 1907.

1	2	3	4
Diet Scales of Labouring Prisoners.	Diet scale of non-labouring prisoners.	Punishment Diet Scale.	Note of any change effected in diet scales during the year.
Atta of Gram 1/3 } " Barley 2/3 } 12 Chittaks daily. Dāl alternately . . . 2 Chittaks. Vegetables alternately 8 " Oil with vegetables 4/25 " Salt " " 1/4 " " " Dāl . . . 1/6 " Chillies with vegetables 2 M. " " Dāl . 1 " Fuel . . . 4 Chittaks.	Atta 8 Chittaks on Sundays and Mondays and 10 Chittaks on other days. Other articles are same as for labouring prisoners.	Labouring prisoners 8 Chittaks atta, with the usual quantity of salt; the period of this diet is ninety-six consecutive hours.	Prisoners on Mills are given 14 Chittaks of atta instead of 12 Chittaks, vide paragraph 7 of letter No. 348 II, dated 20th July 1899, from the First Assistant to the Honourable the Agent to the Governor-General for Rajputana.

NOTE.—A complete statement of all the Diet Scales in use for labouring prisoners according to length of sentence should be given in column 1, with details as to the articles used, and the variations in different days of the week.

P. J. LUMSDEN, Major, I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. X (FINANCIAL).—Showing the expenditure in guarding and maintaining the prisoners in the Central Jail at Ajmer during the year 1907, excluding the cost of building new Jails, of Additions, Alterations, or Repairs.

Serial No.	Name of Jail.	AVERAGE NUMBER OF PRISONERS.			RATIONS.		ESTABLISH- MENT.		MERWARA BATTALION.	HOSPITAL CHARGES.	CLOTHING.	CONTINGENCIES.	Grand Total expended.	Cost per head of average strength.	Serial number.
		Under-trial.	Civil.	Total.	Cost per head of average strength excluding civil prisoners.	Total cost.	Cost per head of average strength.	Total cost.	Cost per head of average strength.	Total cost.	Cost per head of average strength.	Total cost.			
1	Central Jail, Ajmer Add for District Lockups.	366 43	18 18	229	386 90	...	...	...	...	...	...	...	...	...	...
		...	...	...	...	...	...	...	...	...	...	...	...	...	...

When prisoners of different classes are confined in the same Jail, the expenditure on establishment and other items with which all are concerned should be divided over all. The cost per head under any item of expenditure is to be calculated on prisoners actually concerned in it or contributing to it, and not otherwise. Hospital charges (col. 7) should include rations and also the cost of medicines supplied from the Bazar and the Medical Store Depot. In this series (Financial), annas and pies are only to be shown where there are columns for them.

AJMER JAIL.

STATEMENT No. XII.—Showing the employment of convicts in the Jail at Ajmer during the year 1907.

1	2	3	4	5	6	7 AVERAGE NUMBER EMPLOYED ON WORKING DAYS.										8	9 RATIO PER CENT. OF COLUMN 8 OF THOSE EMPLOYED ON WORKING DAYS AS—			
						A	B	ON PRISON DUTIES.						ON JAIL BUILDINGS.				Average number of convicts hired out to Municipalities, private individuals or Departments other than the Public Works Department.

Sex	Average number not sentenced to labour.	Average number under labour on working days.*	Average number sick.	Average number convalescent and infirm.	Average number not employed for other reasons.	On unremunerative labour.†	Prison officers.	C	D	E	F	G	H	I	J	Manufactures.	a	b		
Male	122	314.06	573	378	...	...	20.85	37.25	2.33	54.45	76	Under Superintendent.	Under Public Works Department.	Under Superintendent.	Under Public Works Department.	188.91	...	...		
Female	0.30	7.52	0.01	...	...	...	1.00	...	...	...	...	...	...	...	...	6.51	13.30	...		
TOTAL	1.52	321.58	574	378	...	4.	21.85	37.25	2.33	54.45	76	...	...	...	...	195.42	679	11.78		
																		60.15	60.77	
																		86.57	86.57	

N.B.—Column 7 L a will only be filled up in a Public Works Jail, i.e., a Jail the inmates of which are solely employed on Public Works, and column 7 L b in any Jail which employs a part of its prisoners on Public Works.

* That is exclusive of holidays and Sundays.

† Unremunerative labour means shot drill, crank, and the like.

AJMER JAIL OFFICE;

The 28th February 1908.

P. J. LUMSDEN, Major, I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. XIII.—Showing the net cash earnings of convicts sentenced to labour in the Central Jail at Ajmer during the year 1907.

1	2	3	4	5	6	7	8	9	10	11	12	13
Serial No.	NAME OF JAIL.	Average number sentenced to labour.	Average number employed on jail manufacture.	Cash balance on manufacturing account in hand on the 1st January.	Cash drawn on manufacturing account during the year.	TOTAL.	Paid into Treasury on manufacturing account.	Cash balance in hand on manufacturing account on the 31st December.	TOTAL.	Cash earnings (being total of column 10 less total of column 7).	Average earning per head calculated on column 3.	Average earning per head calculated on column 4.
1	Ajmer Central Jail .	(a) 321.53	195.42	₹ a. p. 52 5 9	₹ a. p. 7,394 9 1	₹ a. p. 7,446 14 10	₹ a. p. 10,347 6 6	₹ a. p. 370 6 8	₹ a. p. 10,717 13 2	₹ a. p. 3,270 14 4	₹ a. p. 10 2 9	₹ a. p. 16 11 10

NOTE.—All proceeds of labour whether paid for by transfer account, by other Departments, or by cash are to be included in this Statement; but no mere estimate of work done by convicts as prison servants or in manufacturing clothing or other articles required for Jail purposes is to be included.

(a) Figures in columns 3 and 4 should correspond with those entered in columns 3 and 4 of Annual Return No. XII.

STATEMENT No. XIV (FINANCIAL).—Showing the net cost of the prisoners in the Ajmer Central Jail for the year 1907.

1	2	3	4	5	6	7	8
Serial No.	NAME OF JAIL.	Total cost of maintenance (column 10 of Statement X).	Average cost of maintenance per head (column 11 of Statement X).	Total cash earnings (column 11 of Statement XIII).	Average cash earnings per head of average strength.*	Net cost to Government (column 3 less column 5).	Average net cost per head of average strength (column 4 minus 6).
1	Ajmer Central Jail .	₹ a. p. 21,351 7 0	₹ a. p. 55 3 0	₹ a. p. 3,270 14 4	₹ a. p. 8 7 3	₹ a. p. 18,080 8 8	₹ a. p. 46 11 9

* To calculate the "average cash earnings per head" for column 6 of this statement, the total cash earnings in column 5 should be divided by the total of column 3, Statement X.

AJMER JAIL OFFICE ;
The 28th February 1908.

P. J. LUMSDEN, Major, I.M.S.,
Superintendent, Central Jail, Ajmer.

STATEMENT No. XVIII (Vital).—Showing the mortality among the convicts in the Ajmer Central Jail during the year 1907 according to the length of time passed in Jail.
